

## Puzzle de Marine.

*Silhouettes créées lors d'un stage de formation continue de Professeurs des Ecoles en 2008 à l'I.U.F.M. de Metz*

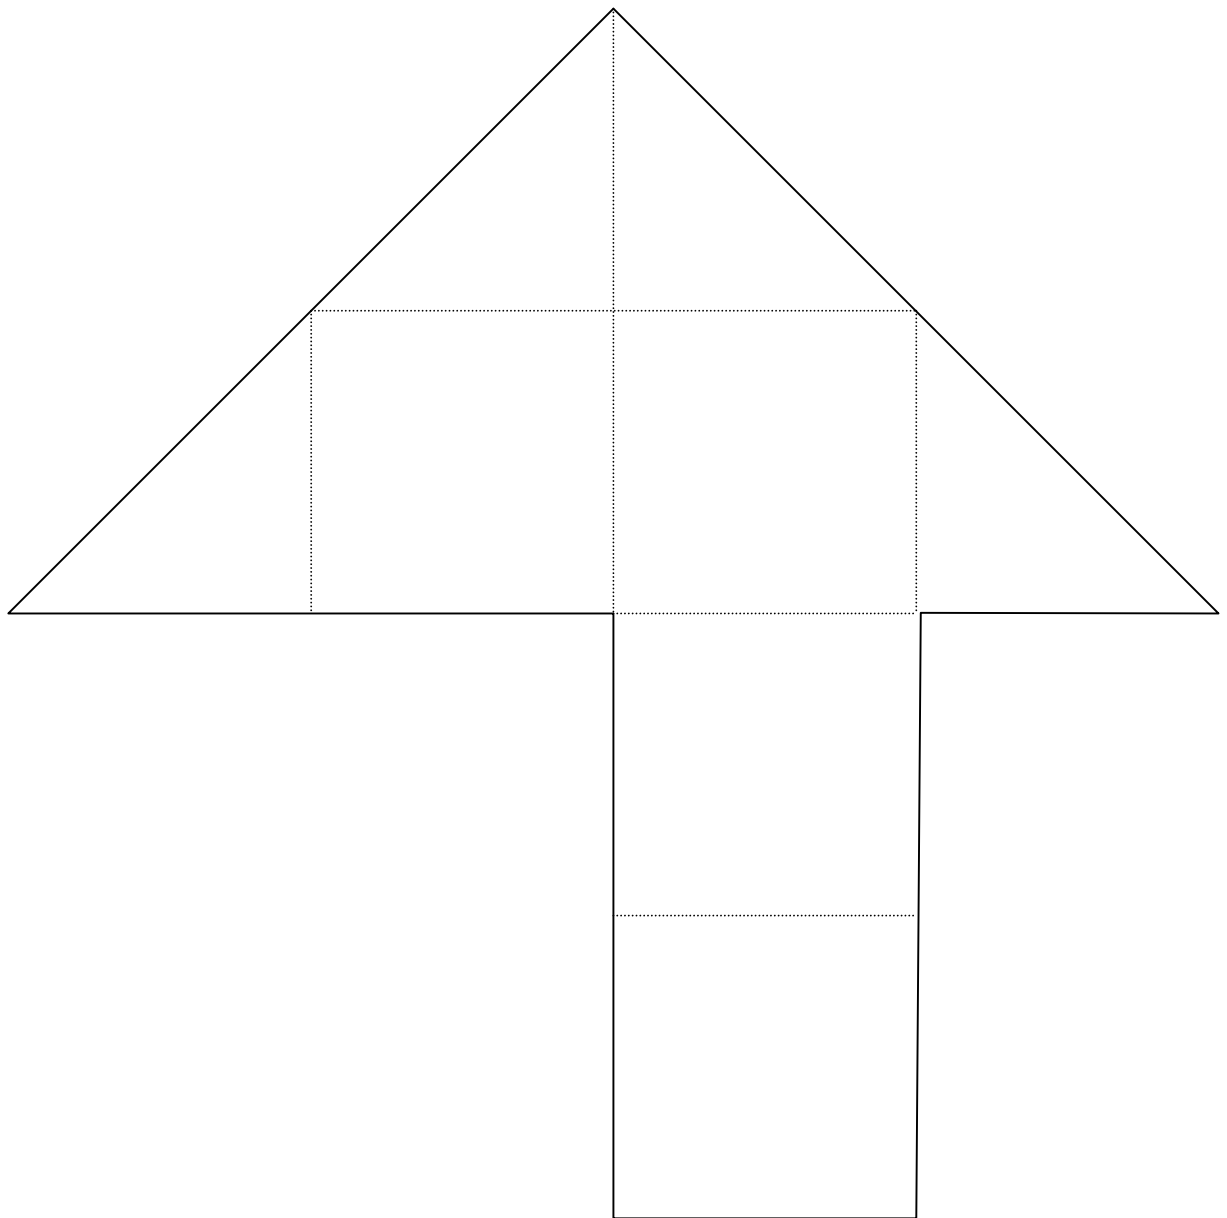

Les six pièces sont à découper le long des traits pleins. Le puzzle a été construit sur un quadrillage, ce quadrillage est apparent sur certaines pièces. Les propositions des participant(e)s au stage sont construites elles aussi sur ce quadrillage : le positionnement de certaines pièces s'en trouve facilité. Photocopier le puzzle sur papier de couleur (puis plastifier) pour une meilleure vision du travail fait par l'élève.

La première série de dessins propose des silhouettes à recouvrir avec les six pièces du puzzle, la deuxième présente des solutions possibles. L'ensemble des dessins est à l'échelle des pièces du jeu dessiné ci-dessus. Une troisième série de dessins présente la silhouette à recouvrir accompagnée de la solution échelle réduite. Selon l'âge ou les possibilités des élèves, une des trois séries pourra être utilisée.

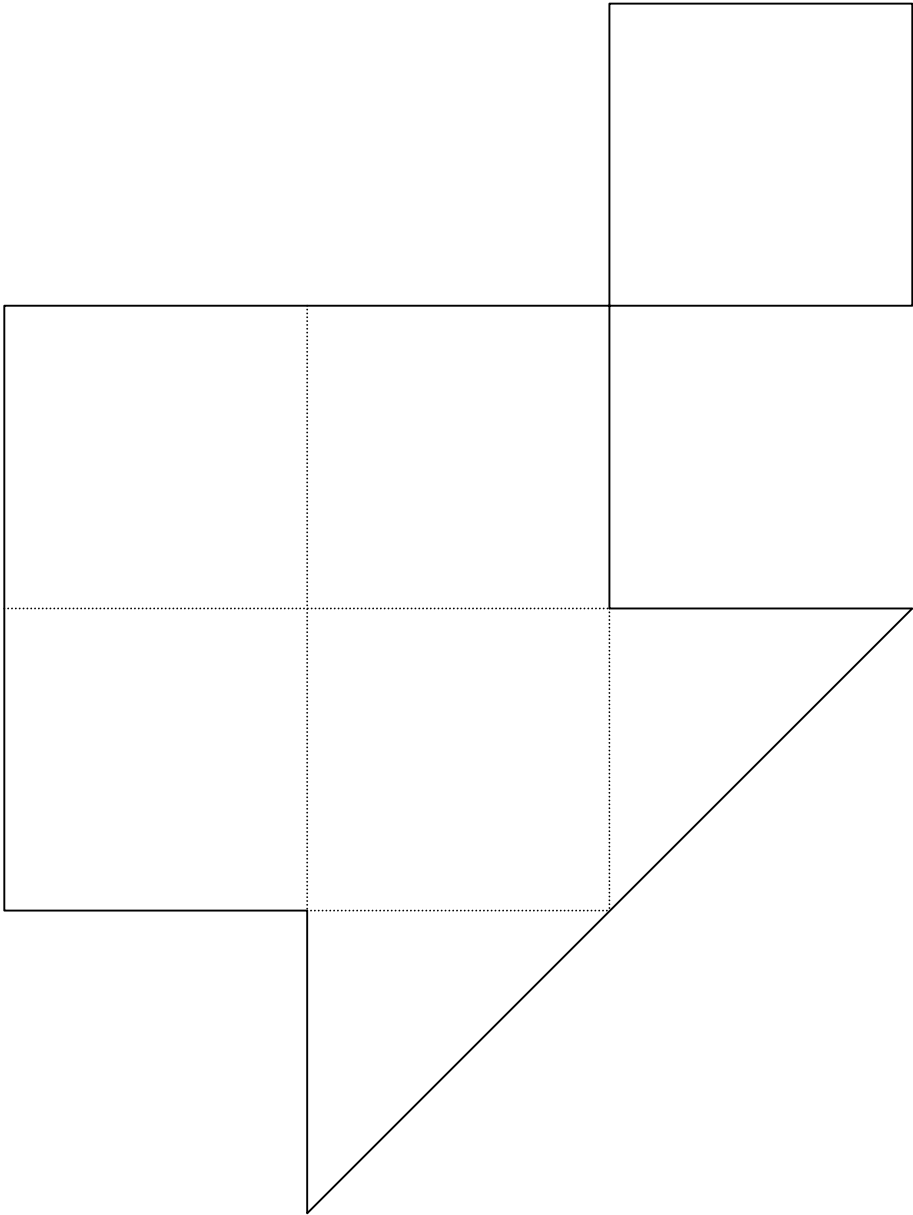

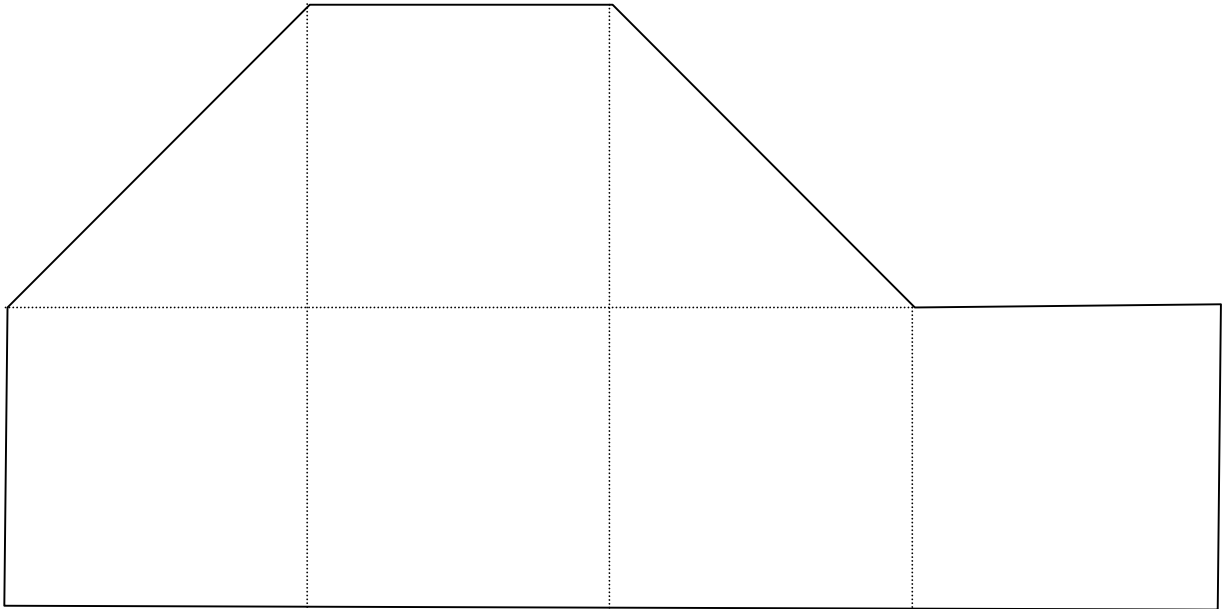

Une fusée

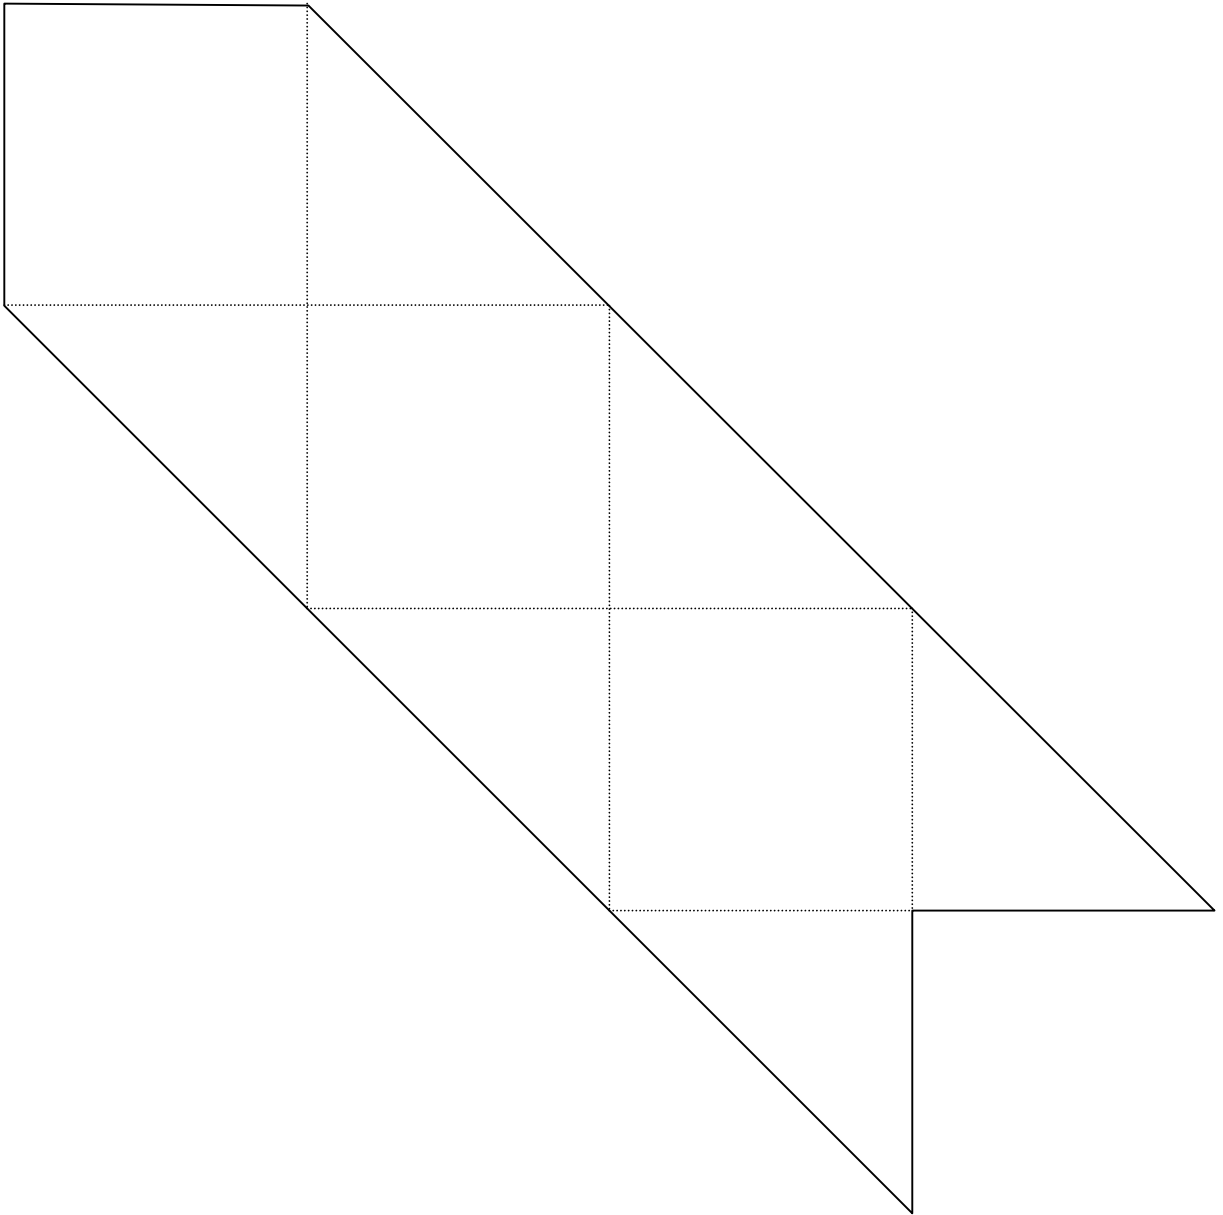

Un parasol

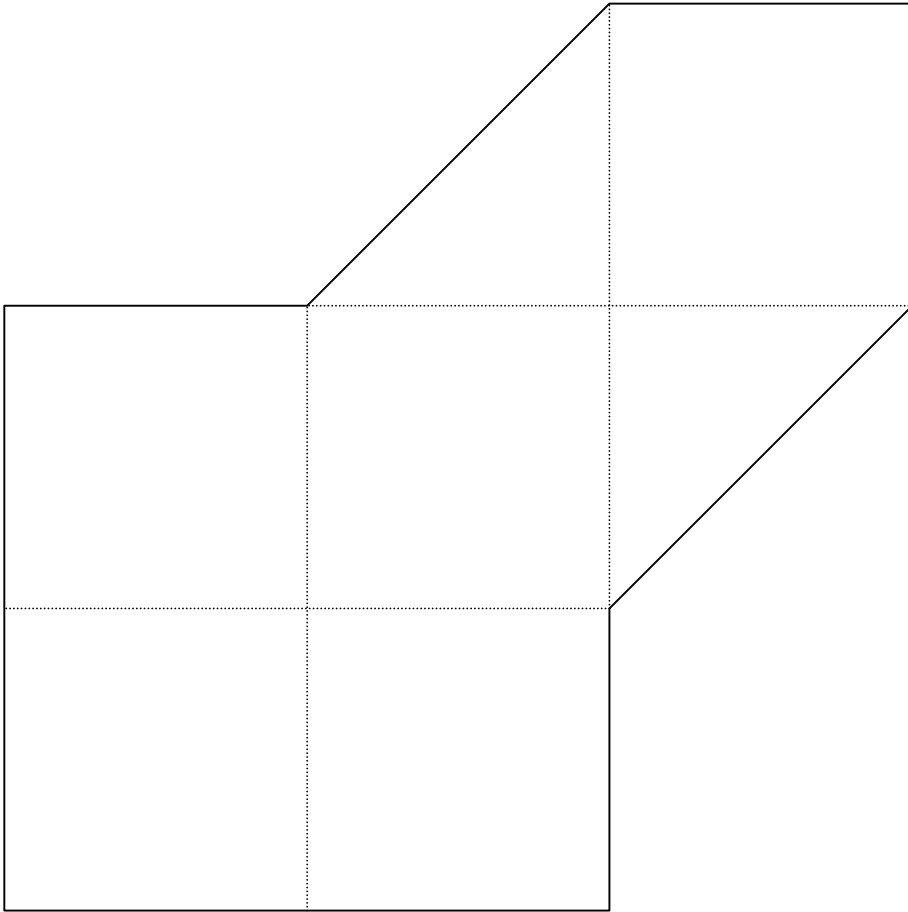

Heaume sweet heaume

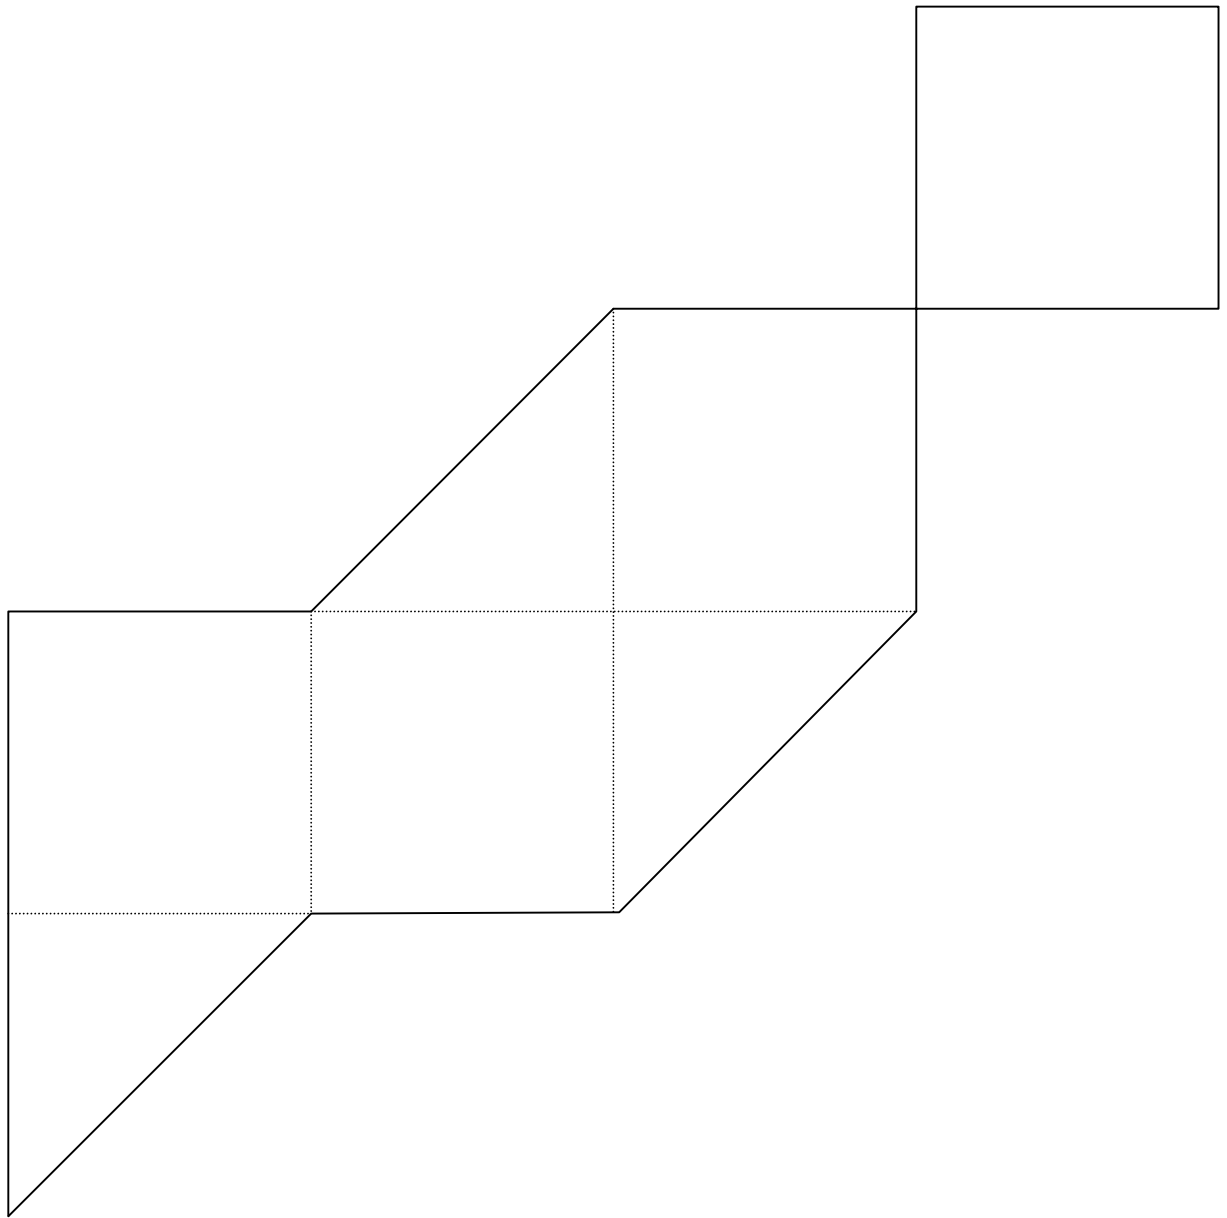

Un igloo ? Une tortue ?

Une fusée

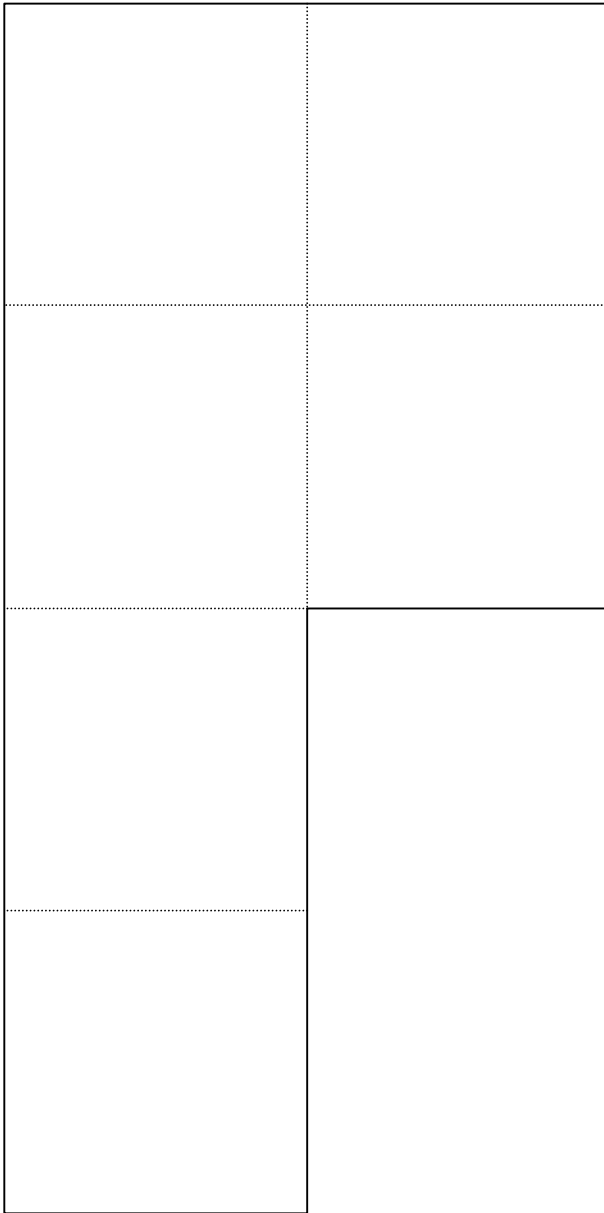

Une flèche ou une fusée

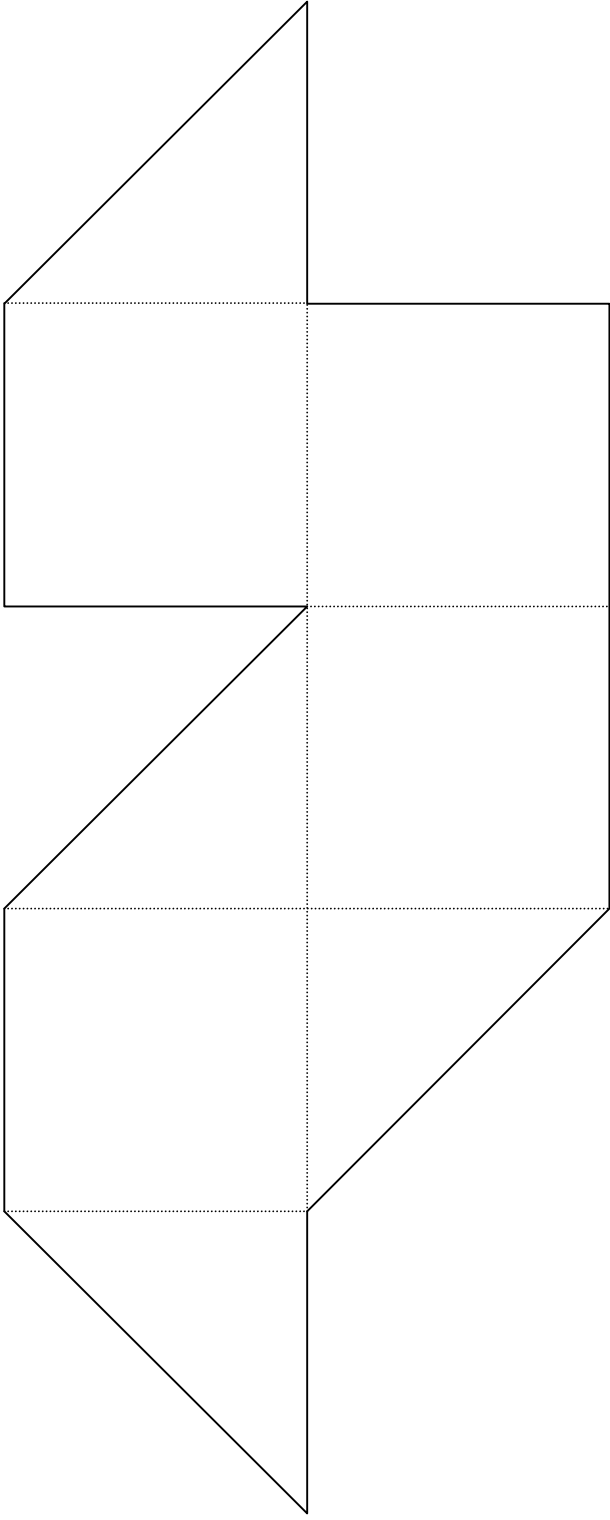

Un bonbon

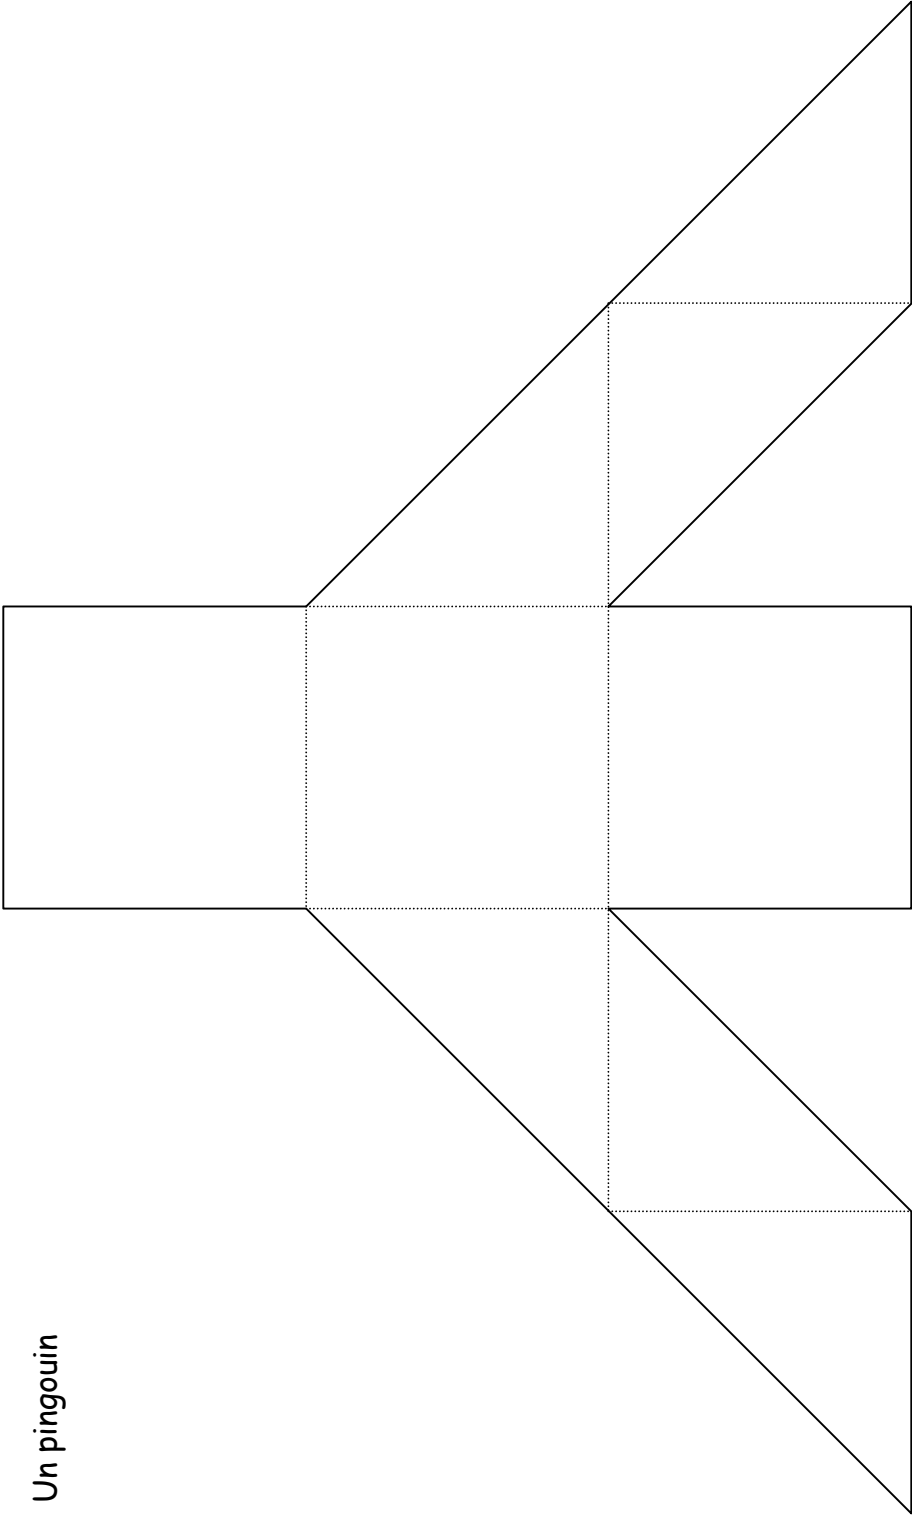

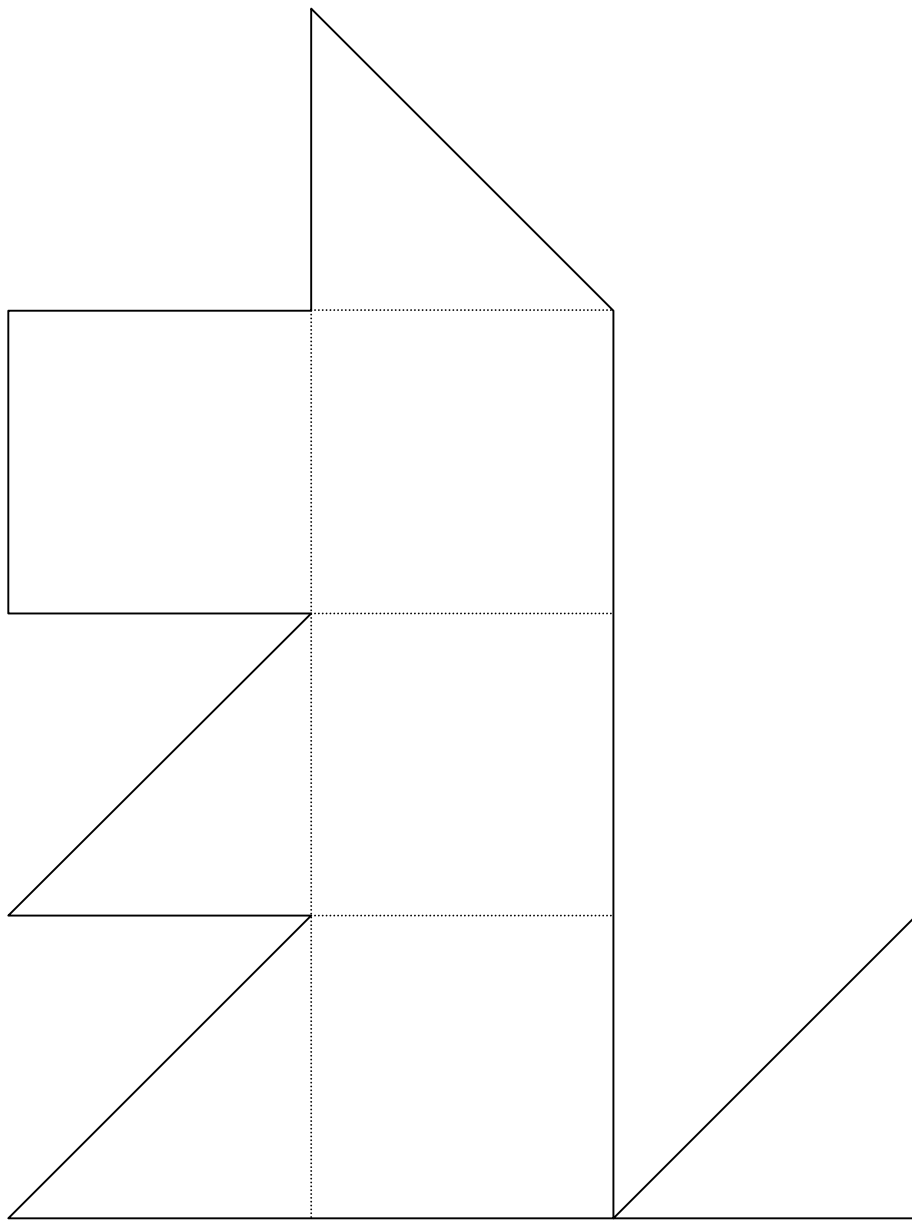

Un « P'' »

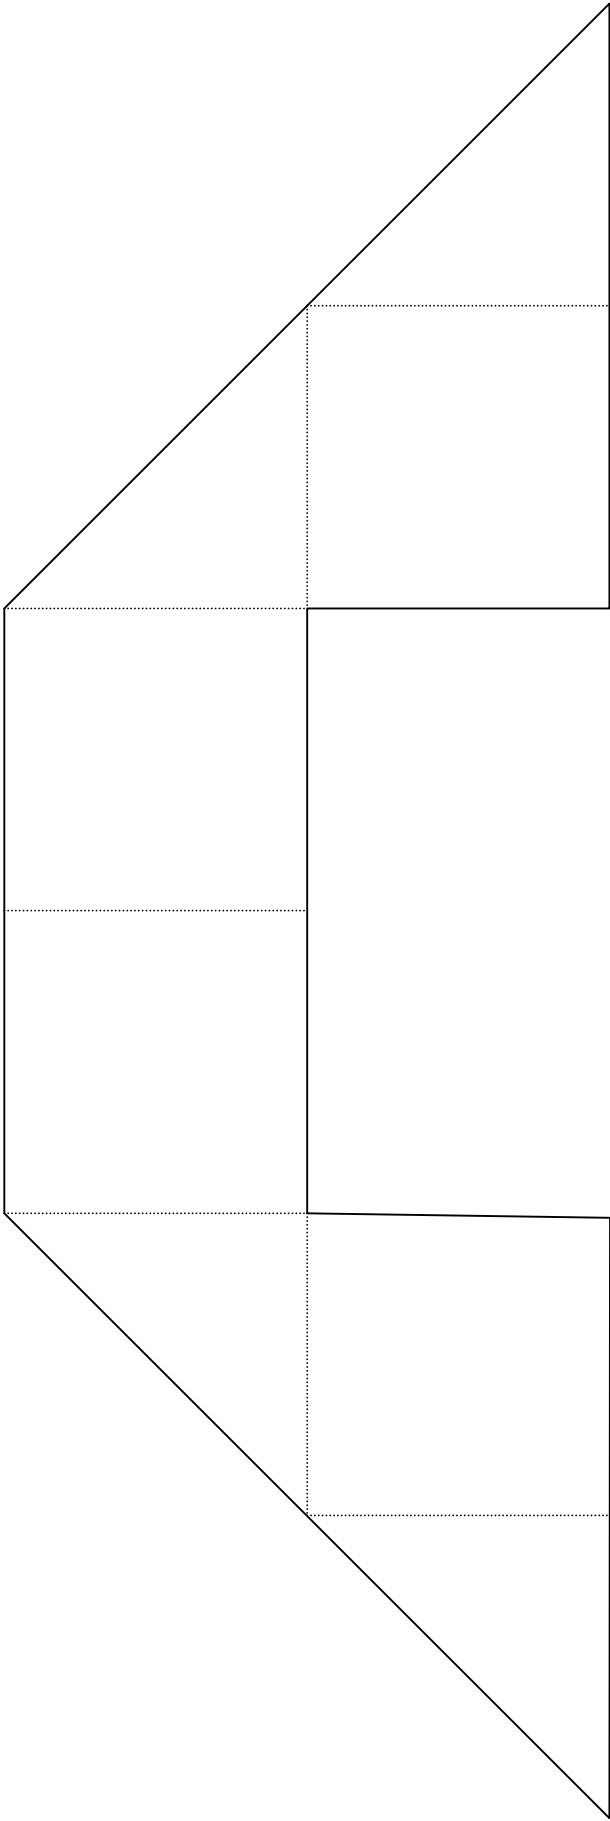

Un canard

Un pingouin

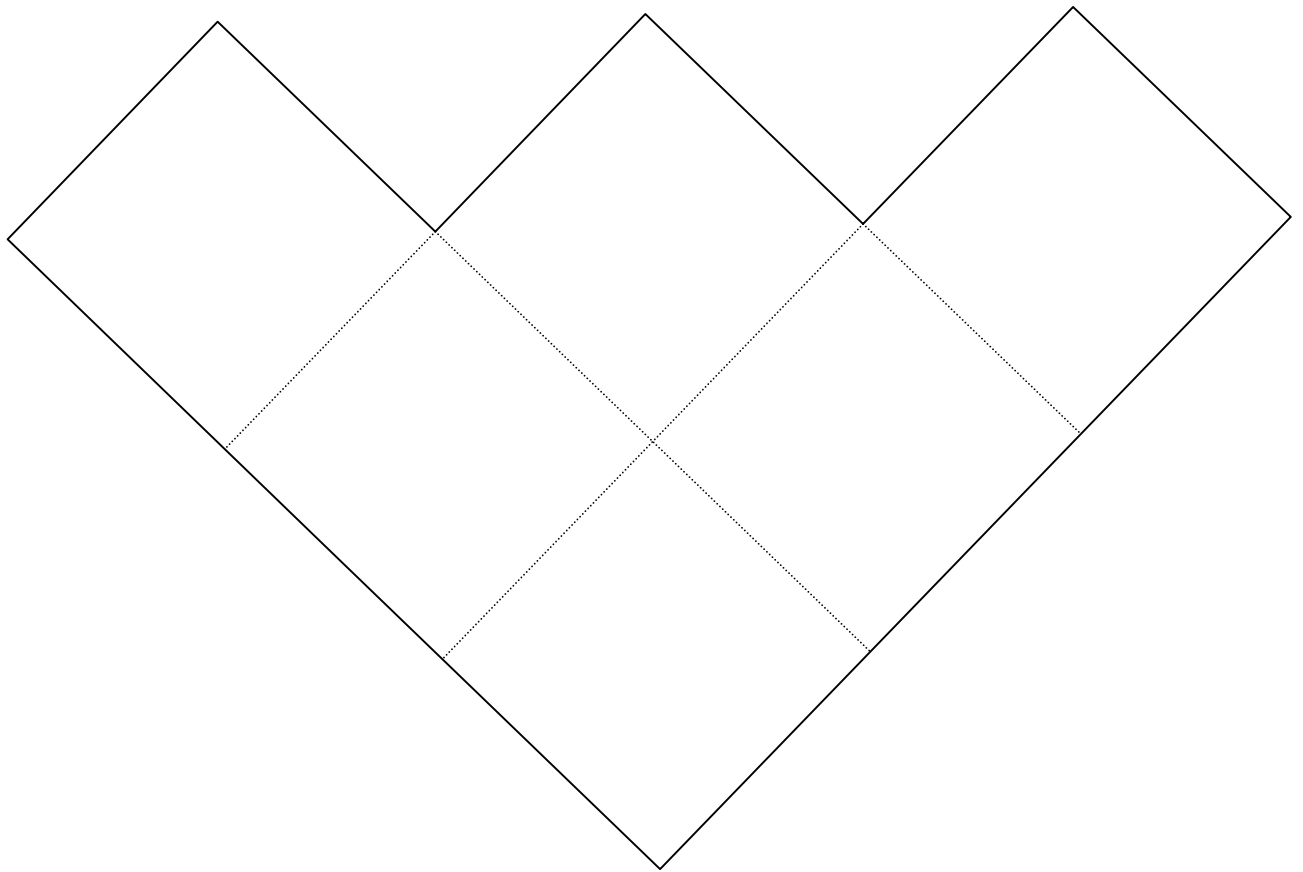

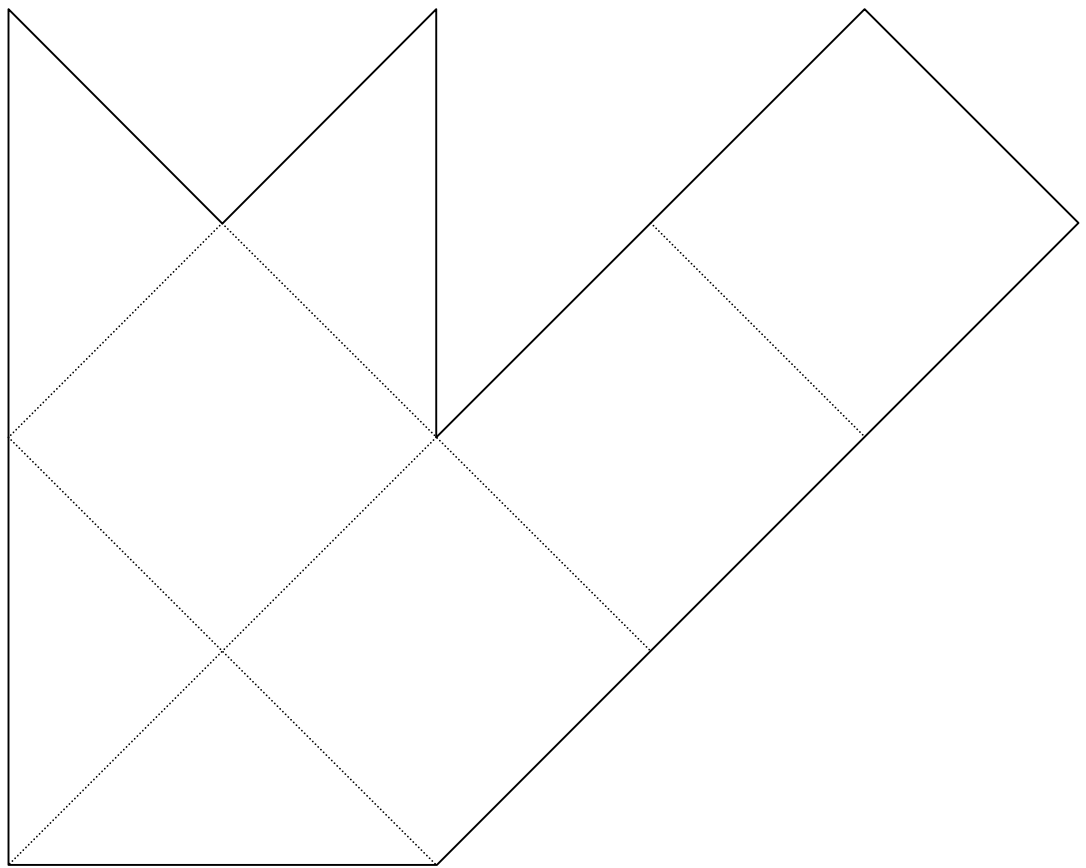

Un loup

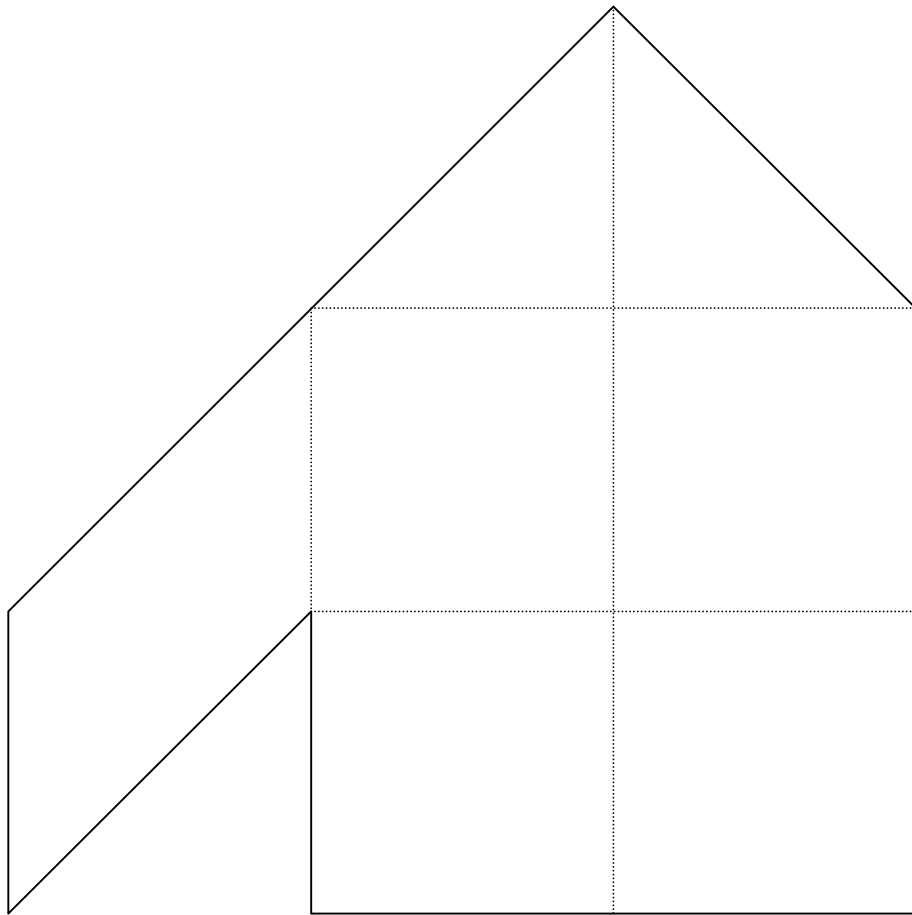

Un pont

Une tulipe

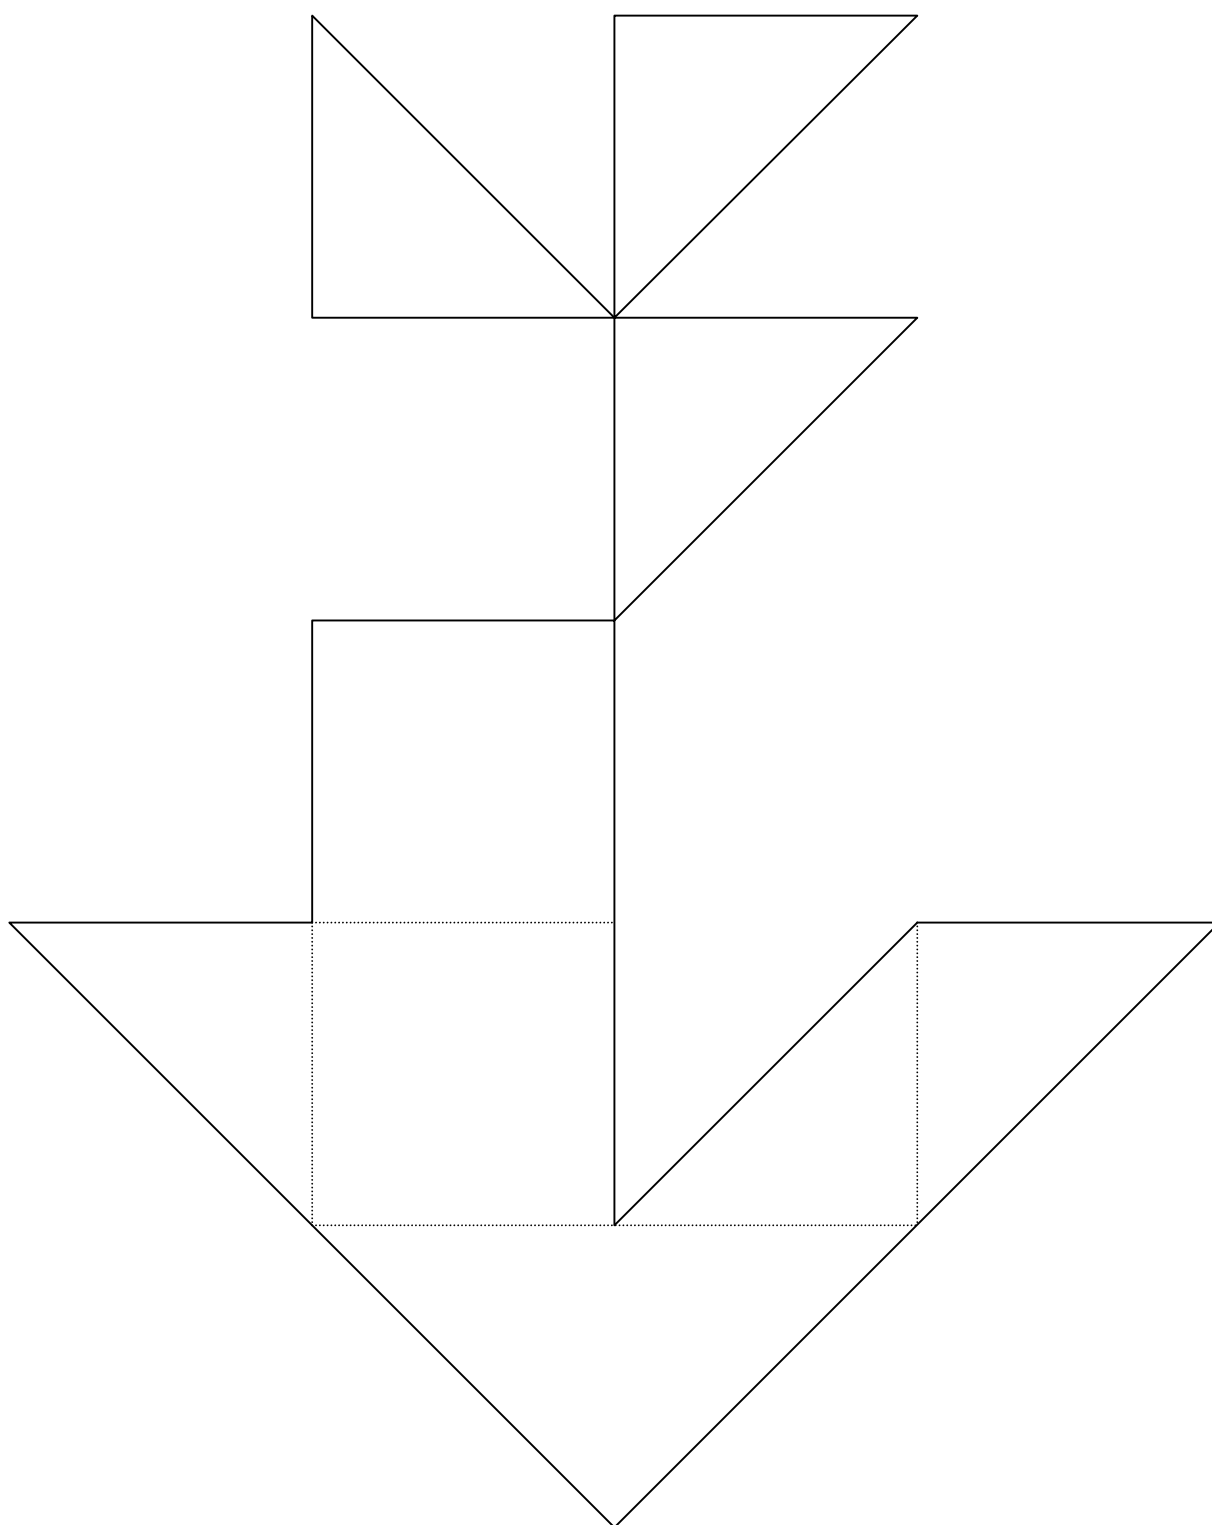

Un chat

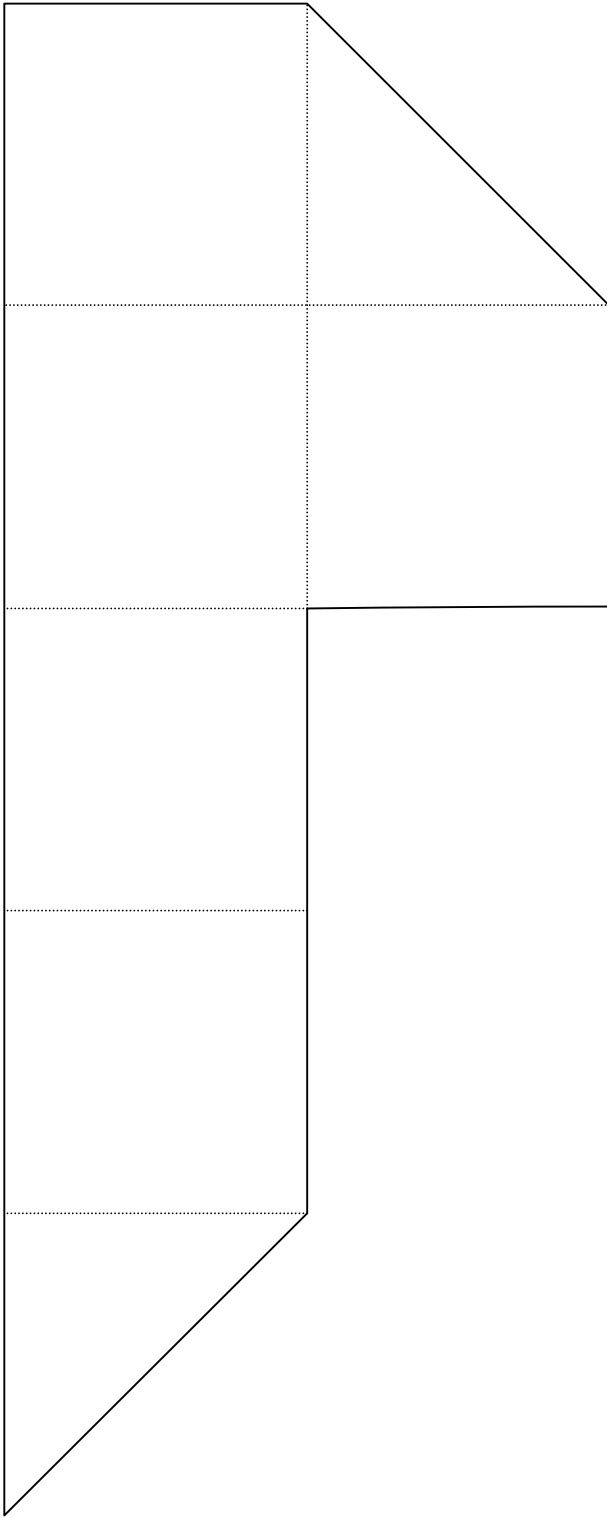

Une maison

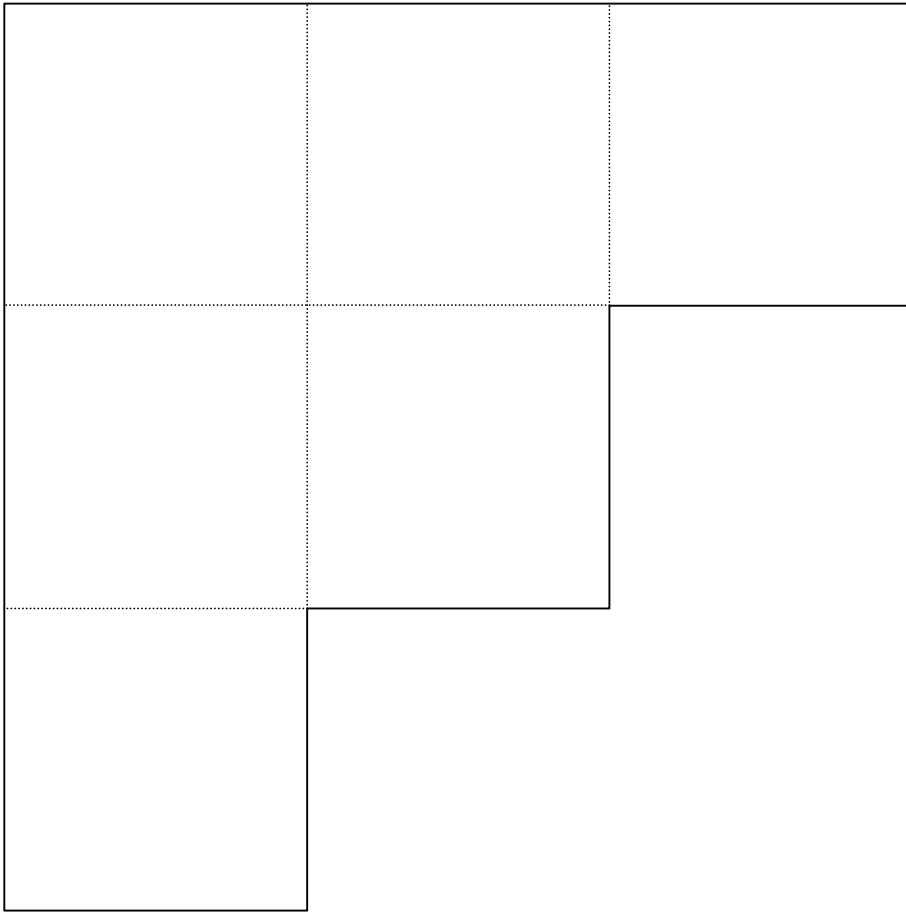

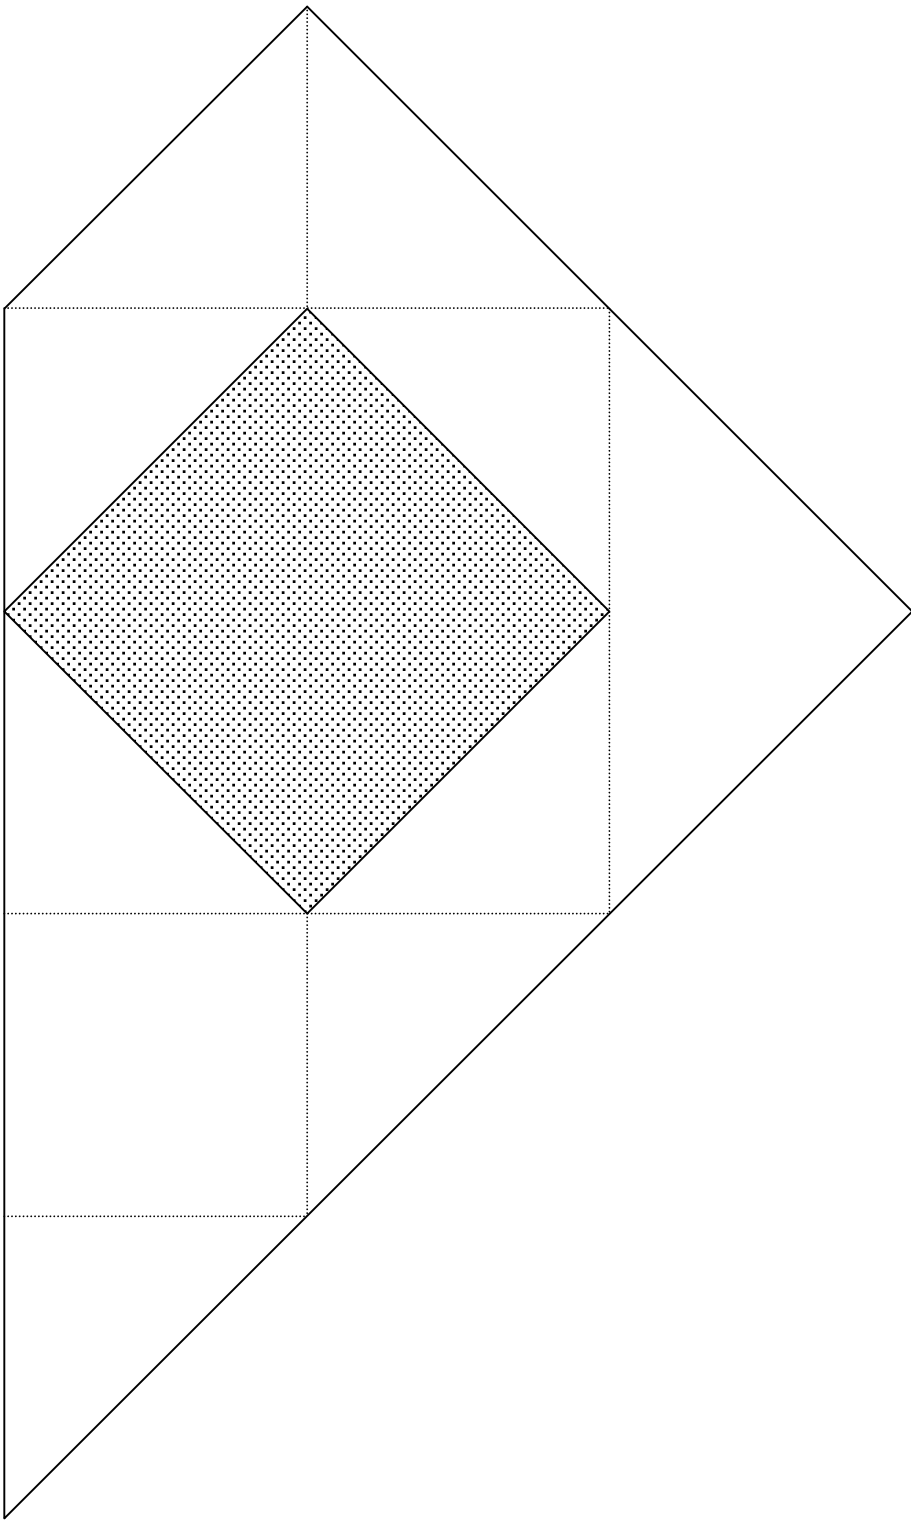

Une fleur

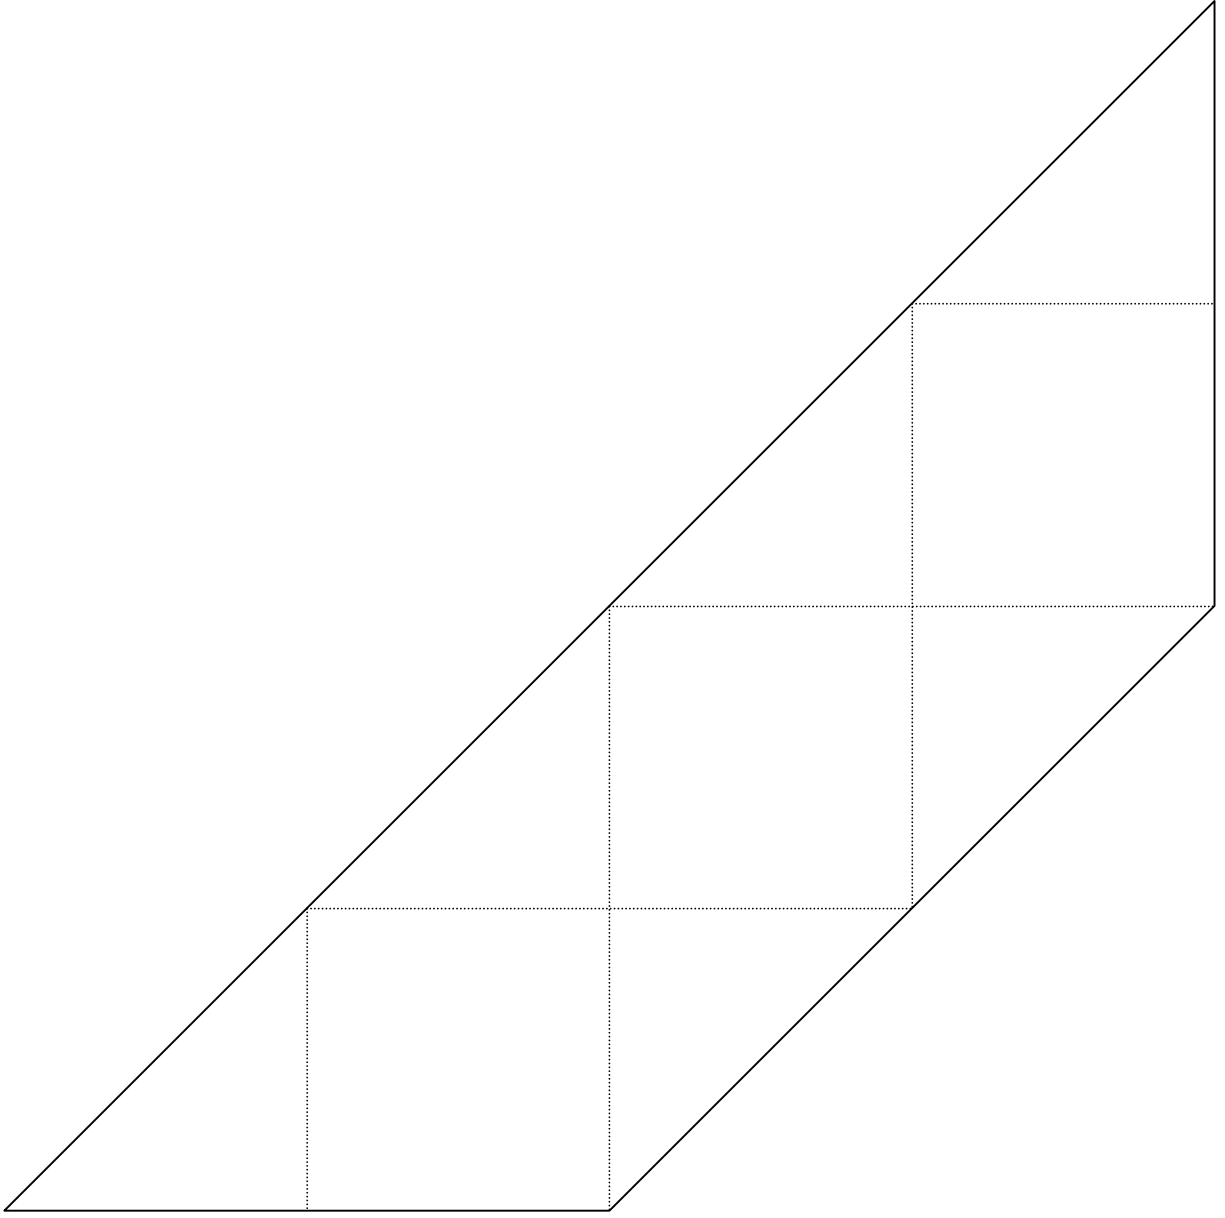

Un capteur solaire

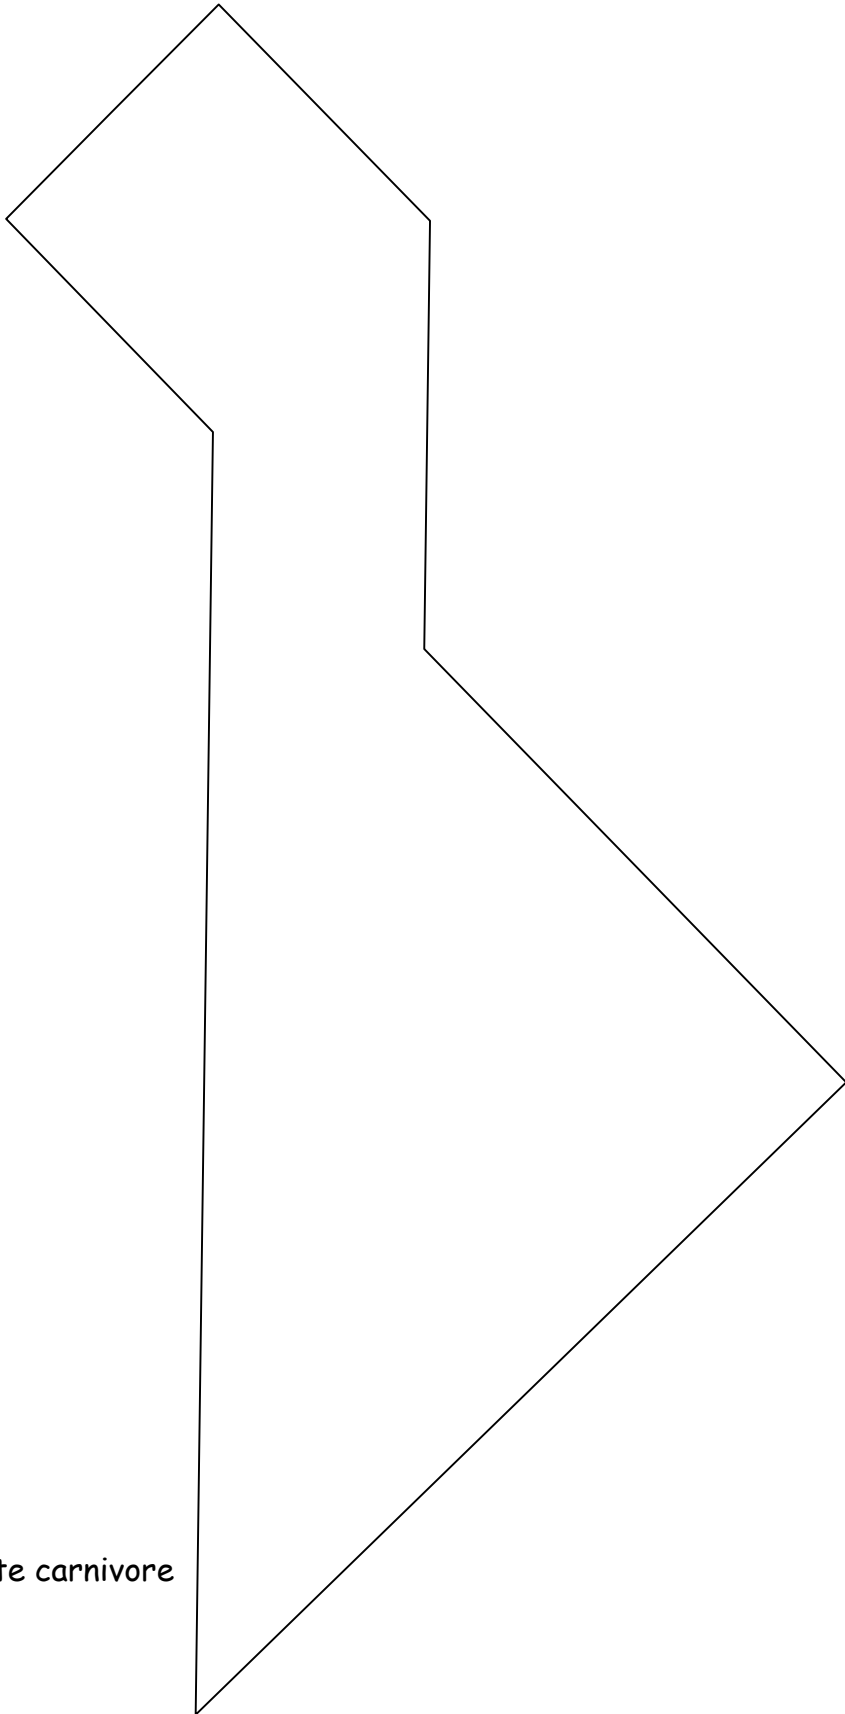

Une soucoupe volante

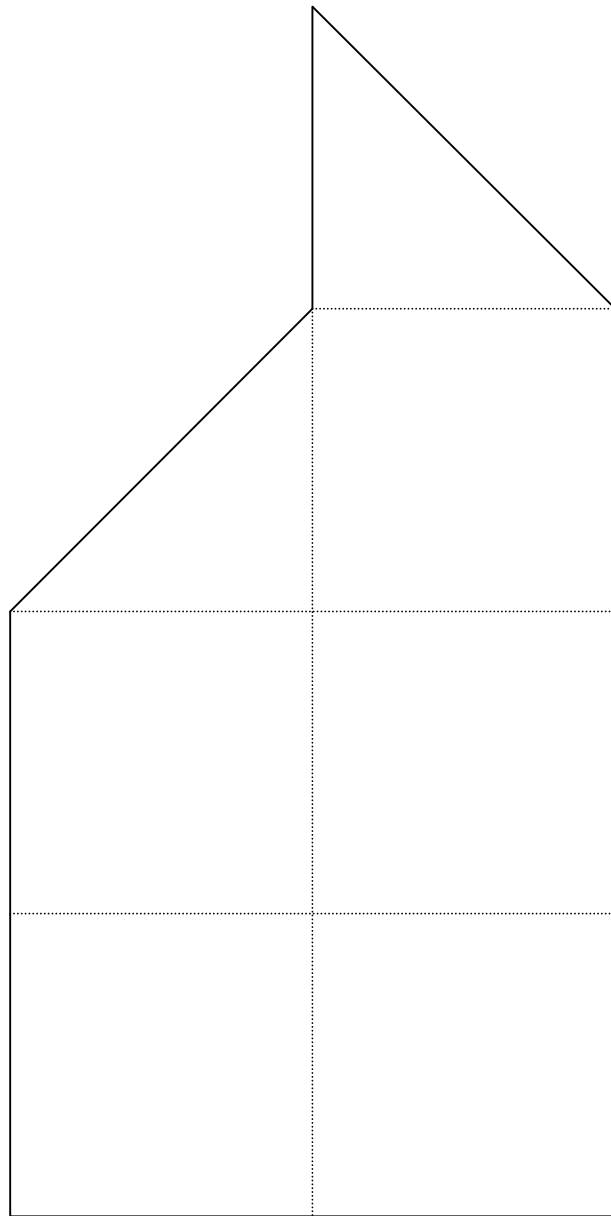

Le carré manquant

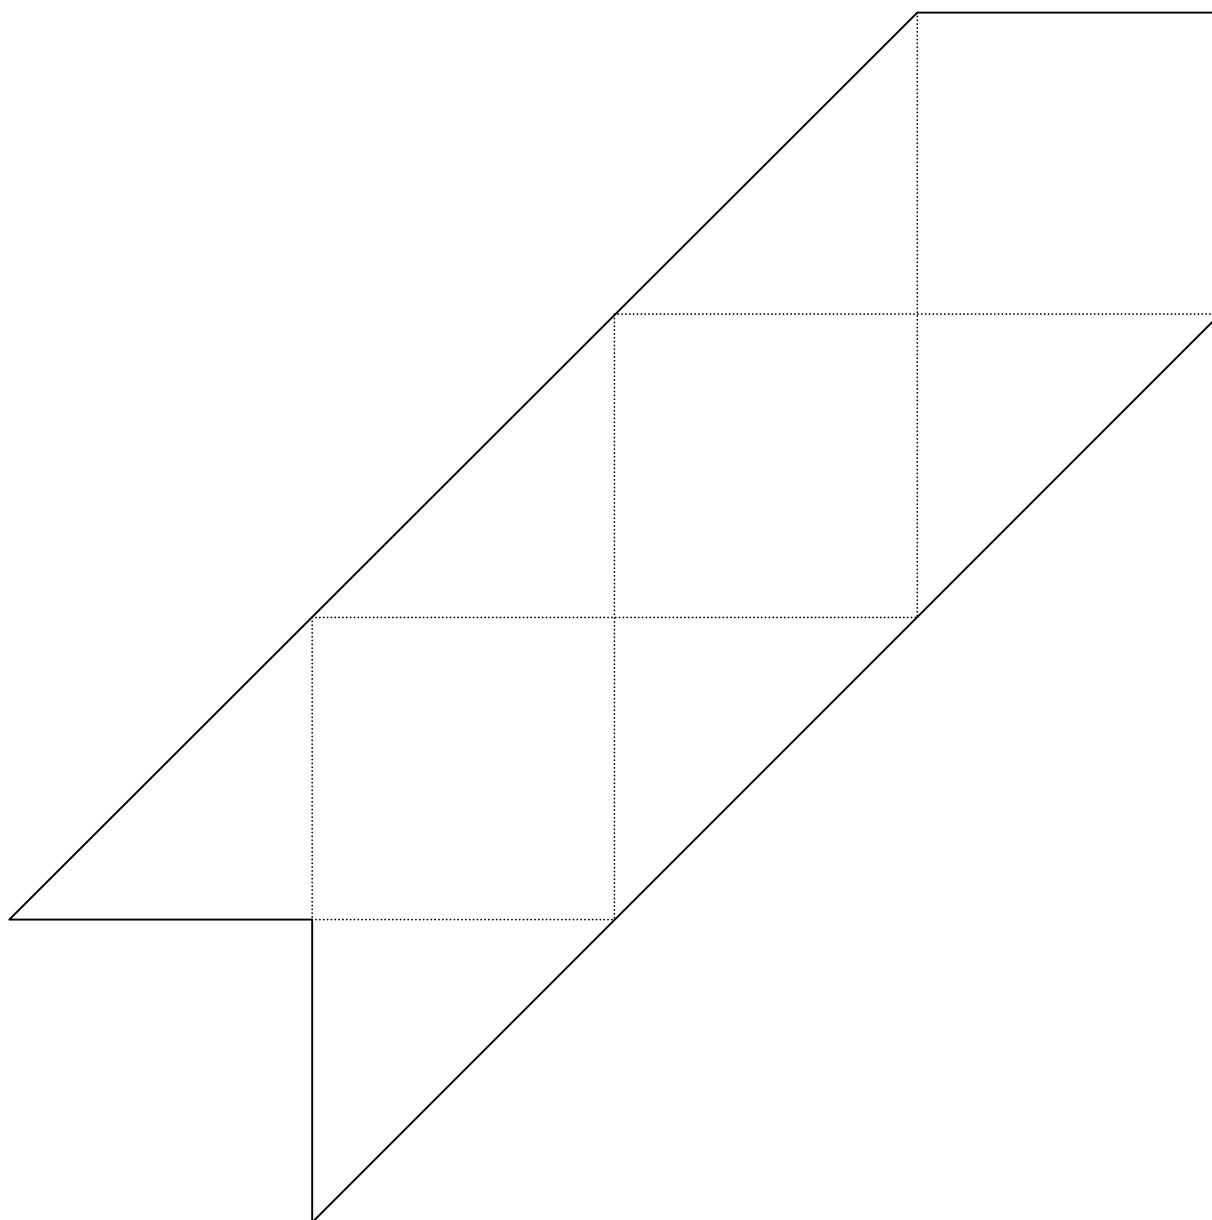

Une barque

Une plante carnivore

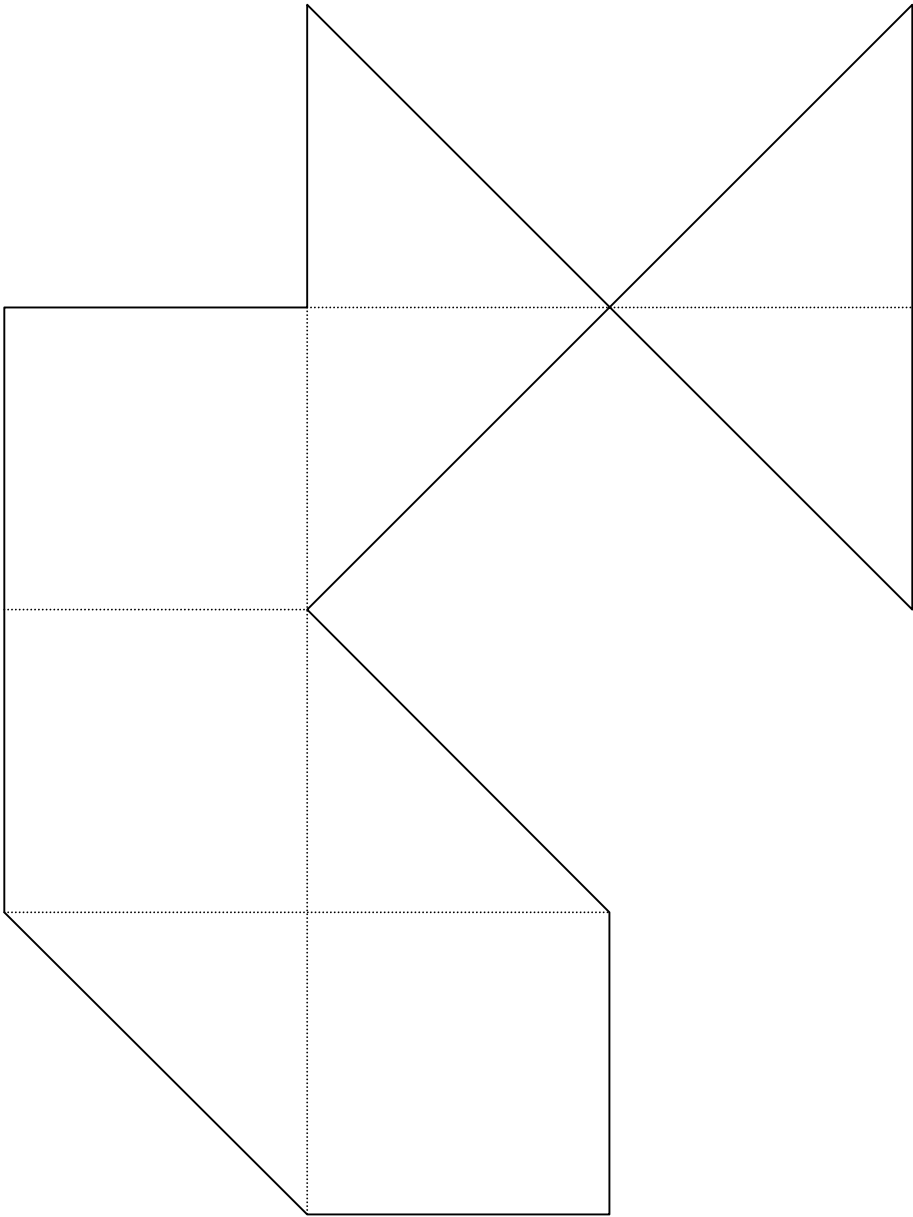

Un doigt levé

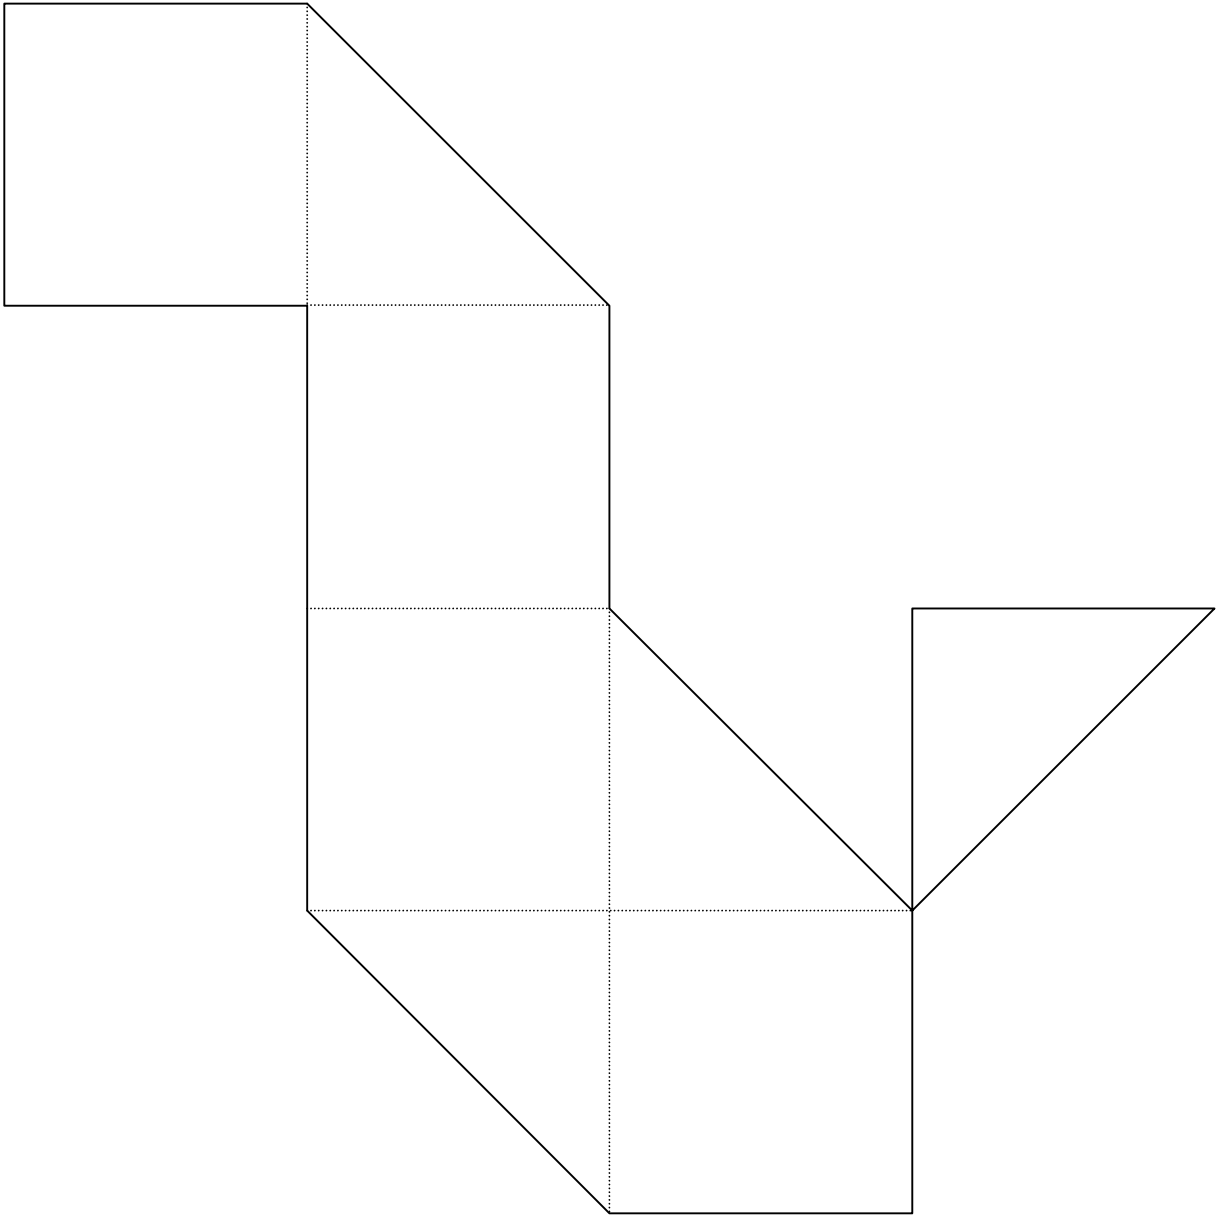

Une fusée

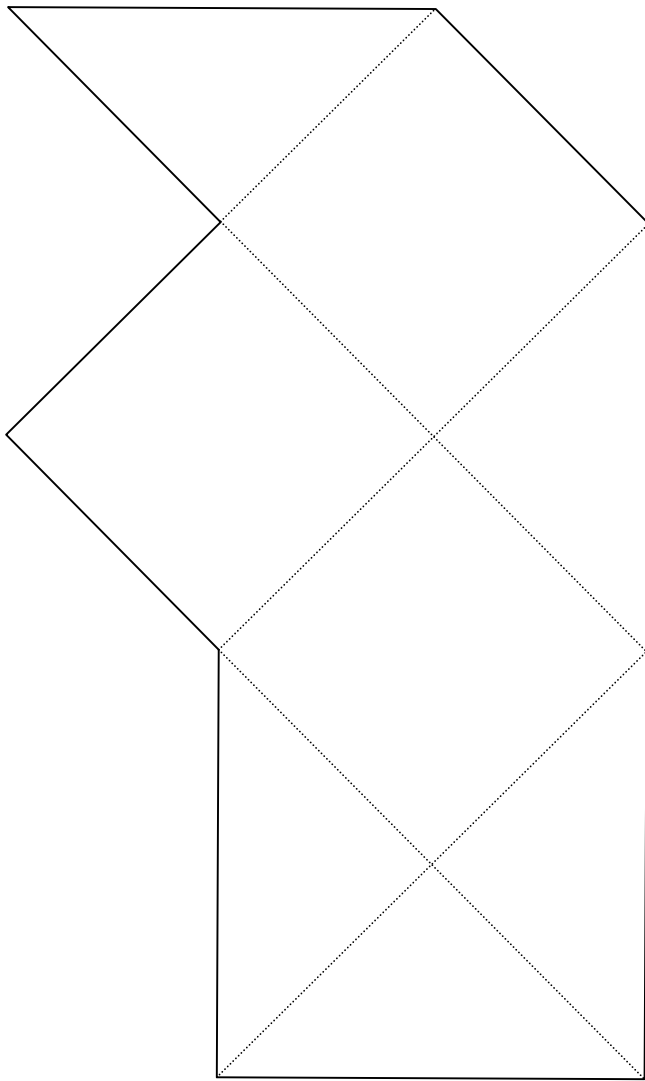

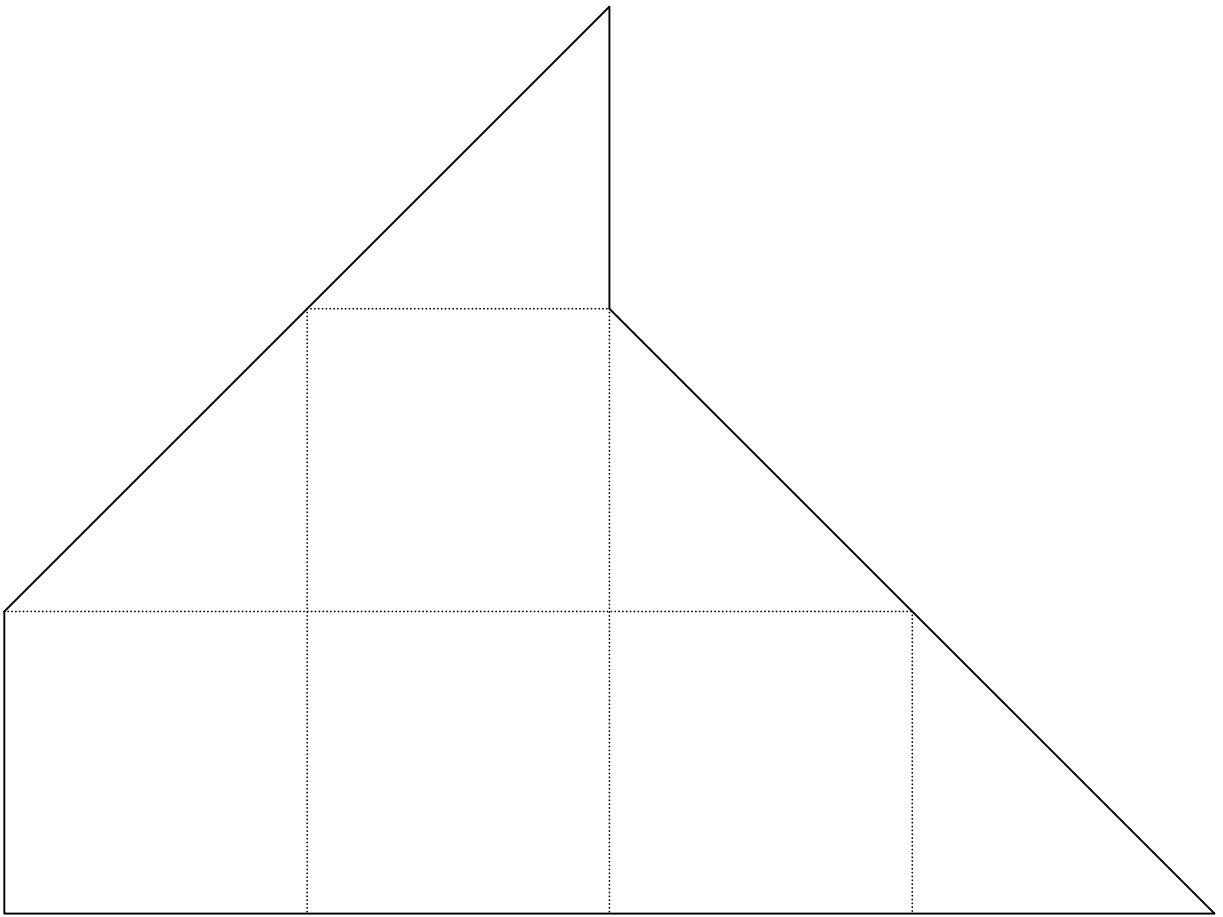

Un moulinet

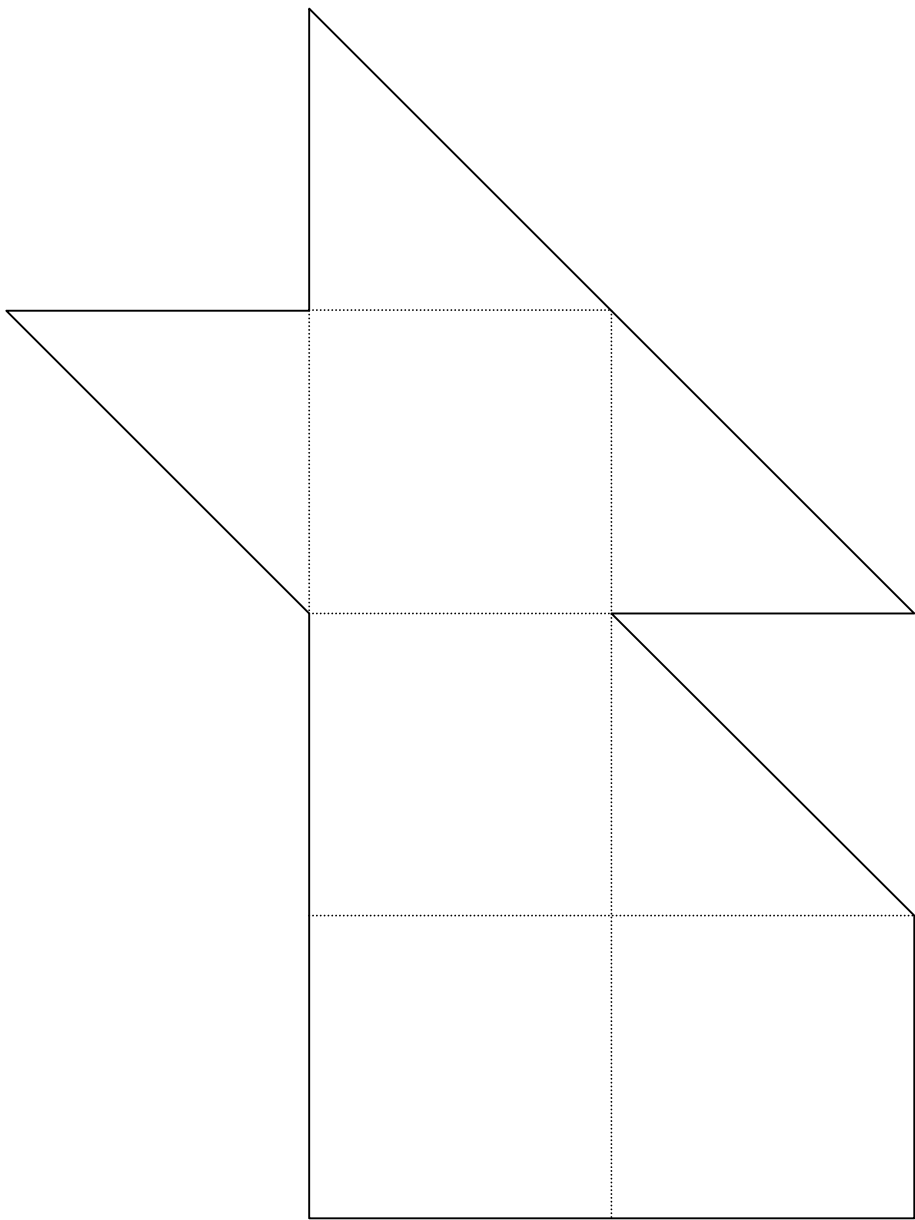

Un canard qui s'envole

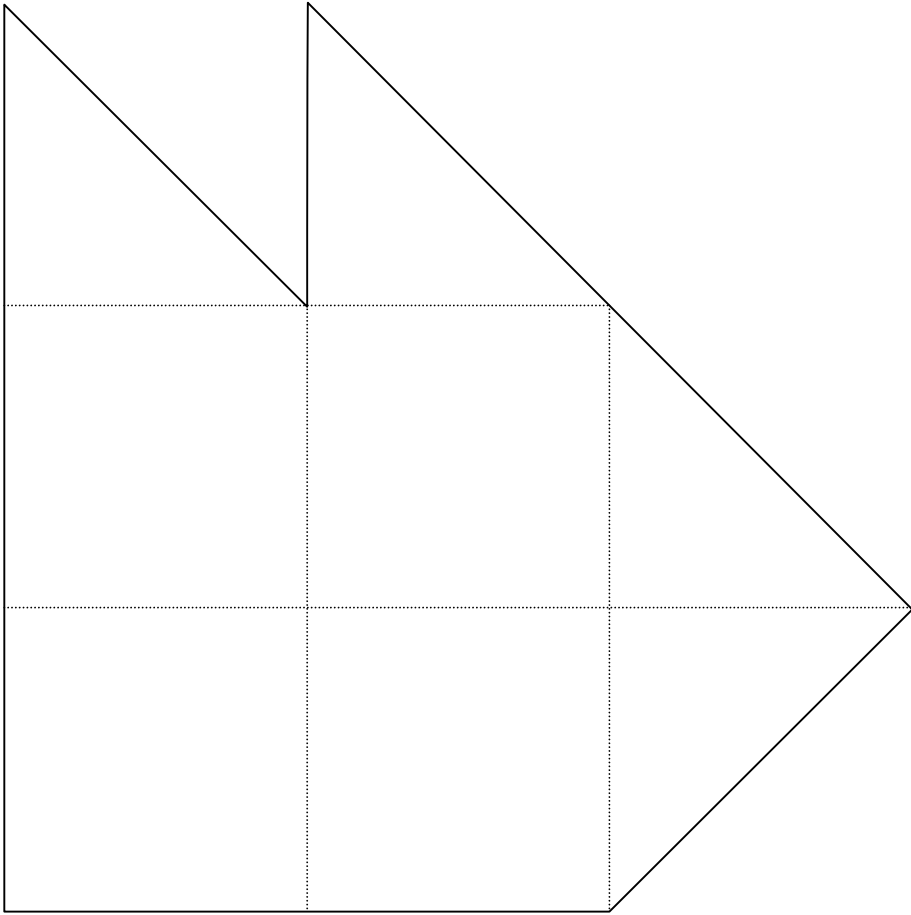

Un pingouin

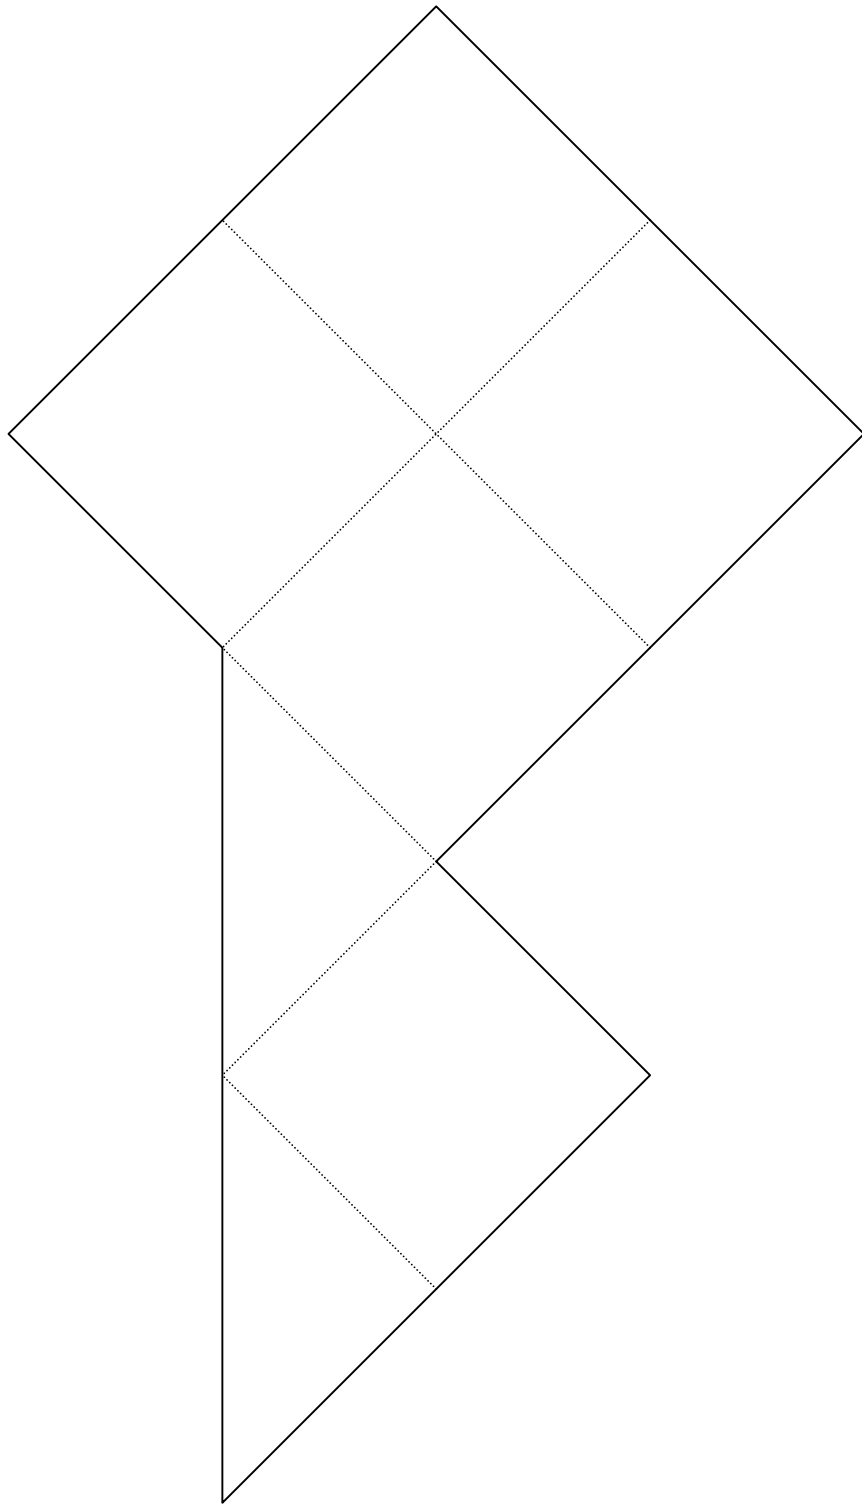

Une usine

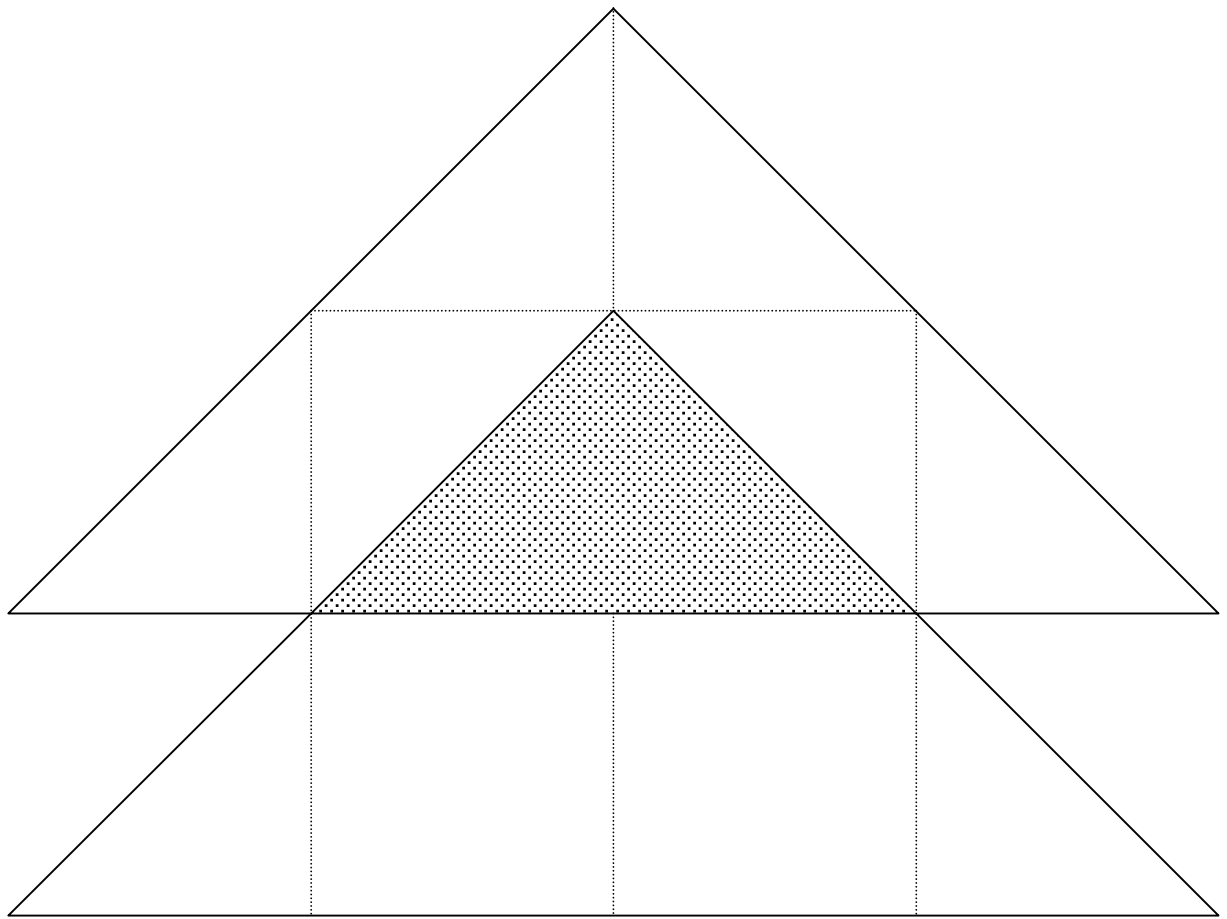

Le télescope

Les oreilles du loup

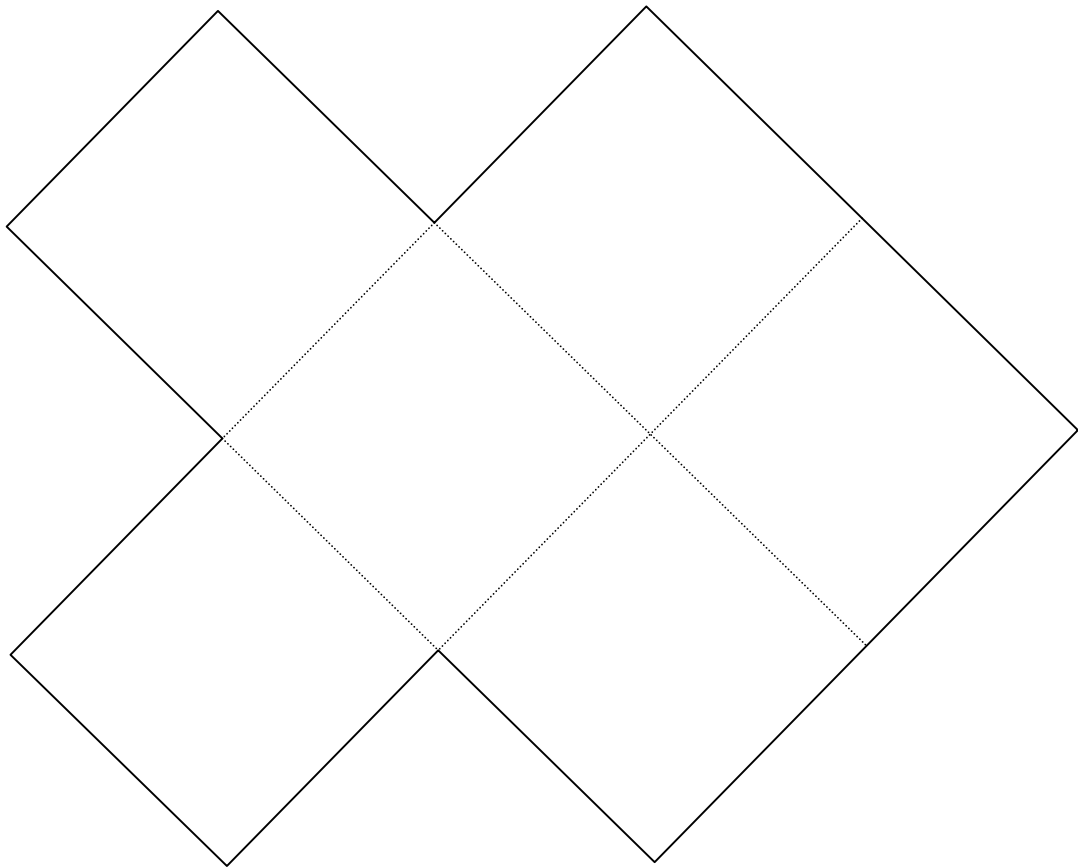

Une fleur

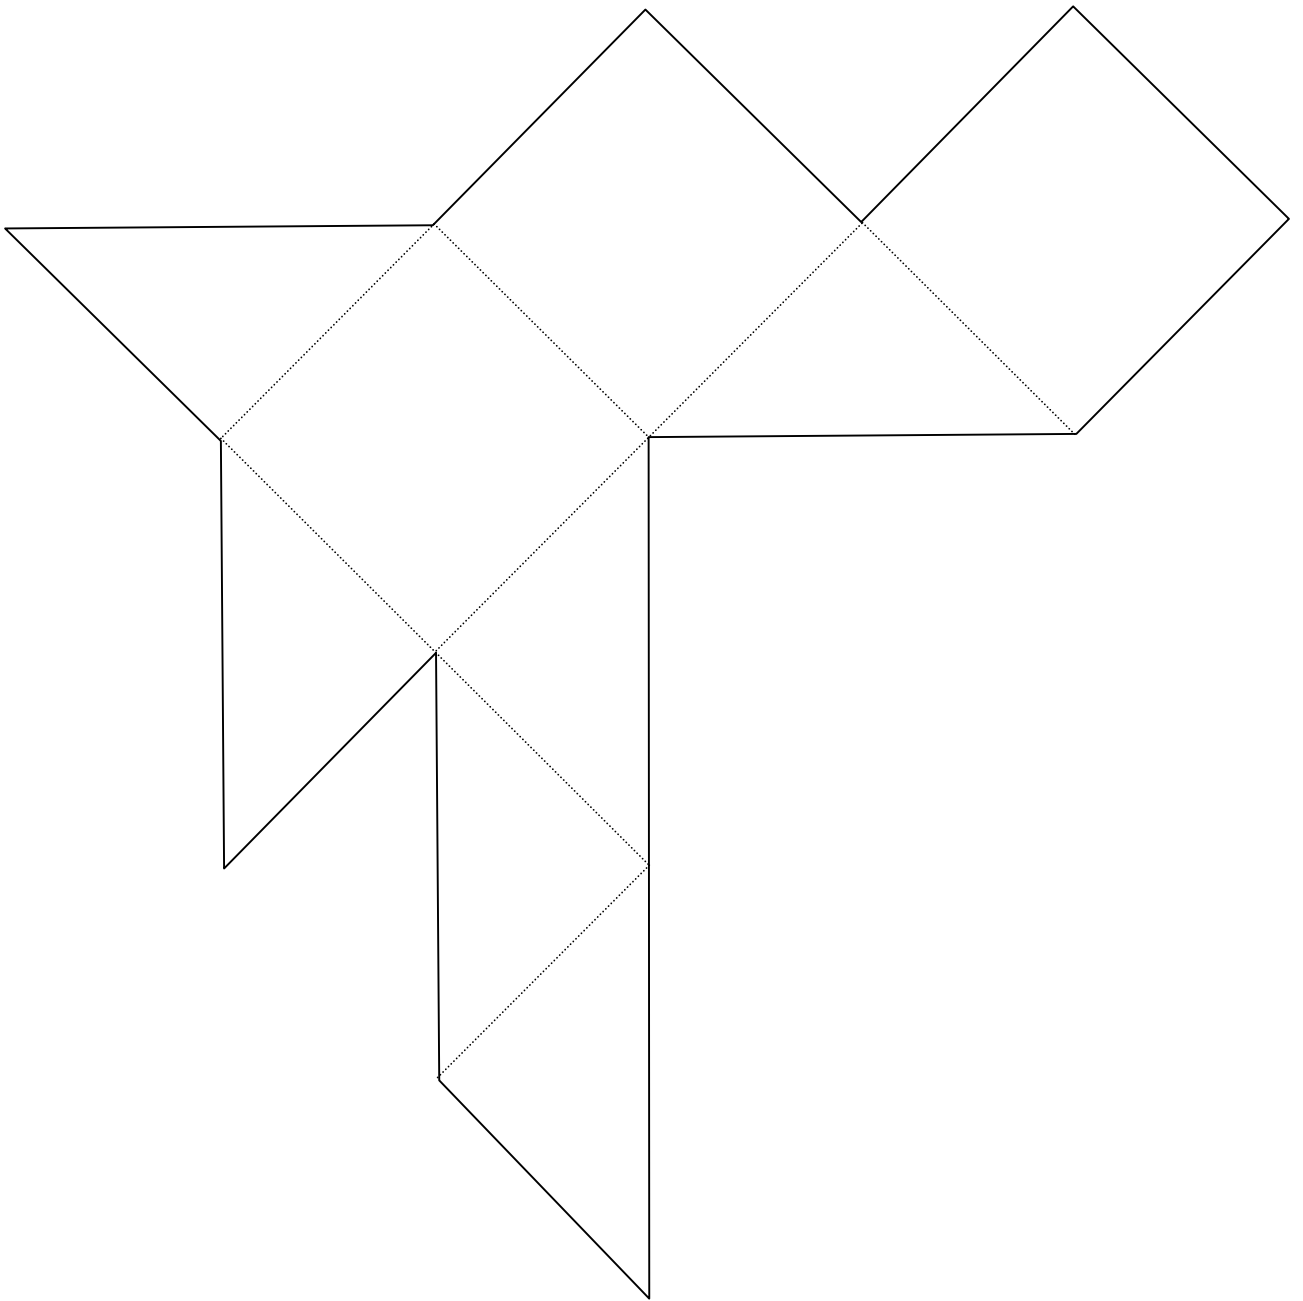

La pyramide du Louvre

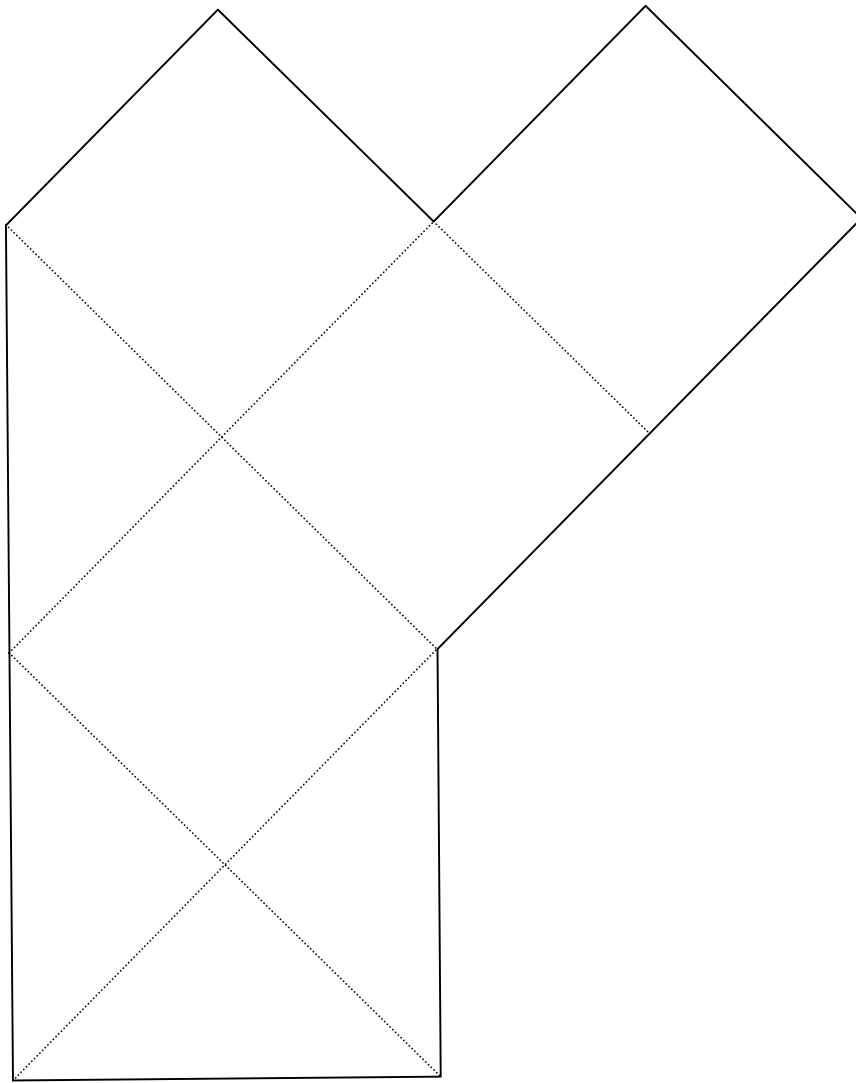

Un poisson exotique

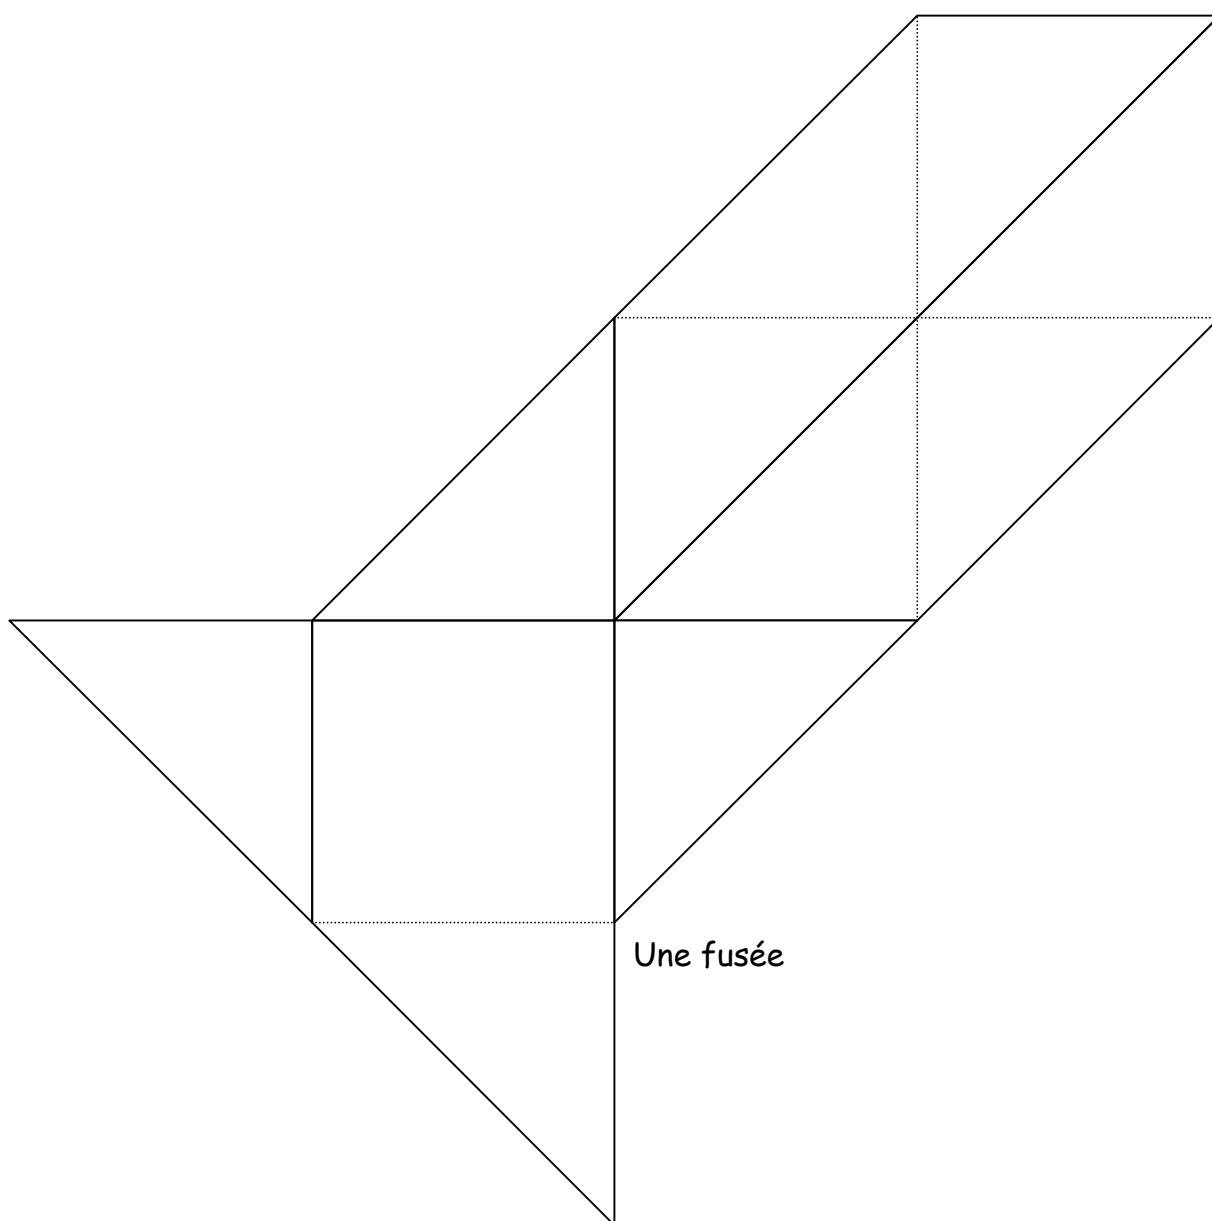

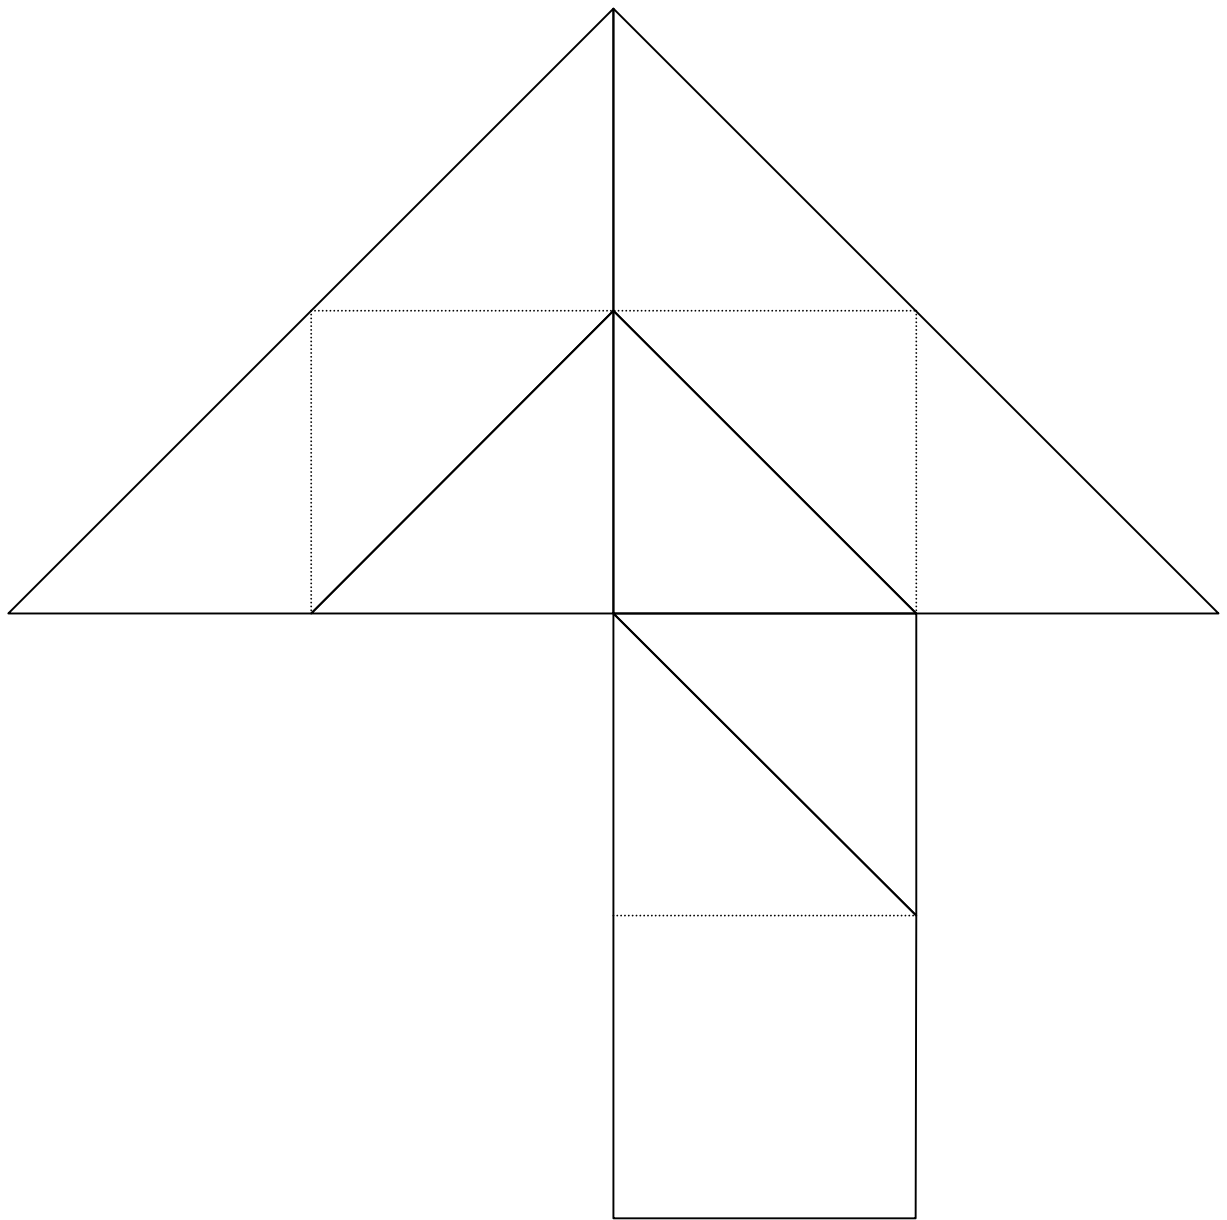

Un cheval qui rue

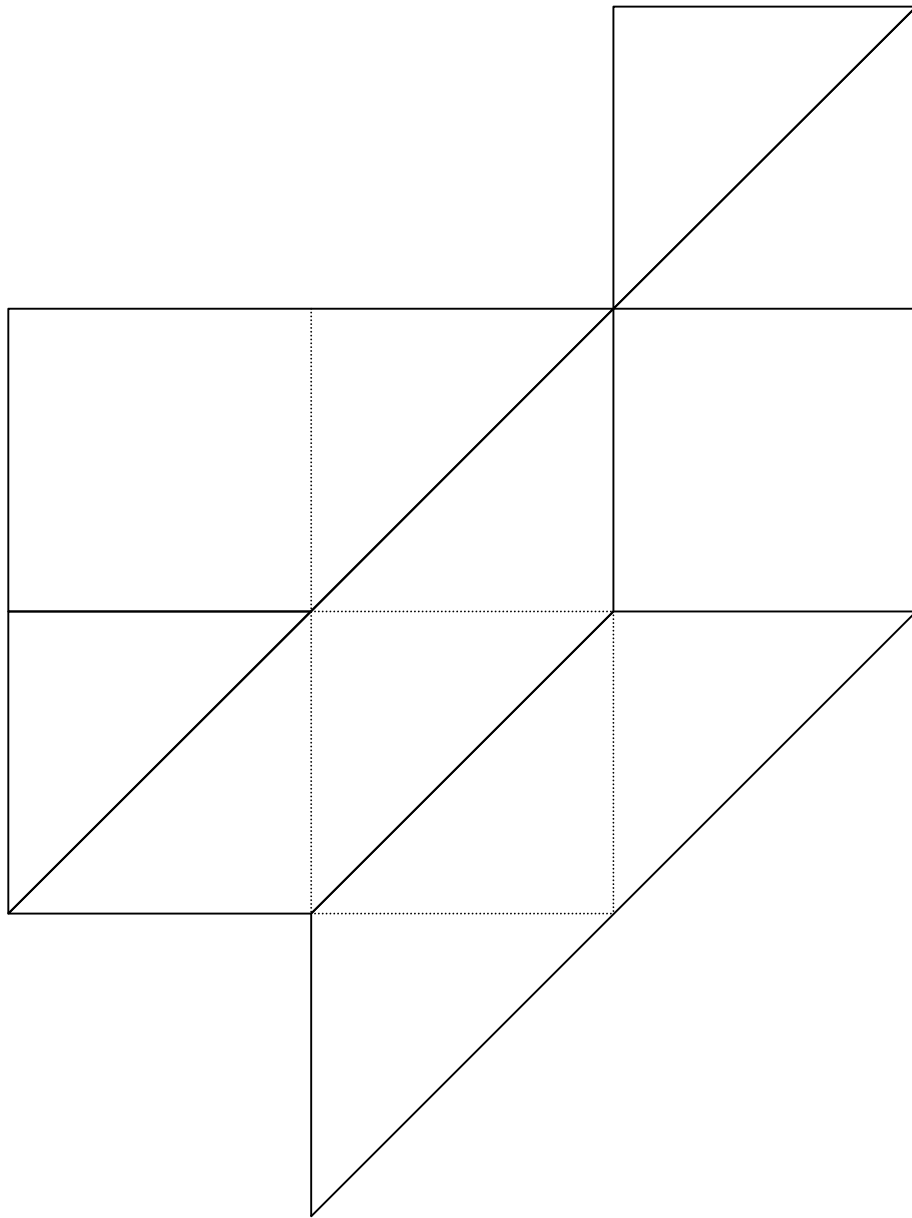

Un silo
