

Hexagrammes

Ce puzzle a été repéré dans « ...lege Spiele ! Eine Anthologie der Legespiele » (Karl-Heinz Koch) dumont taschenbücher 1987.

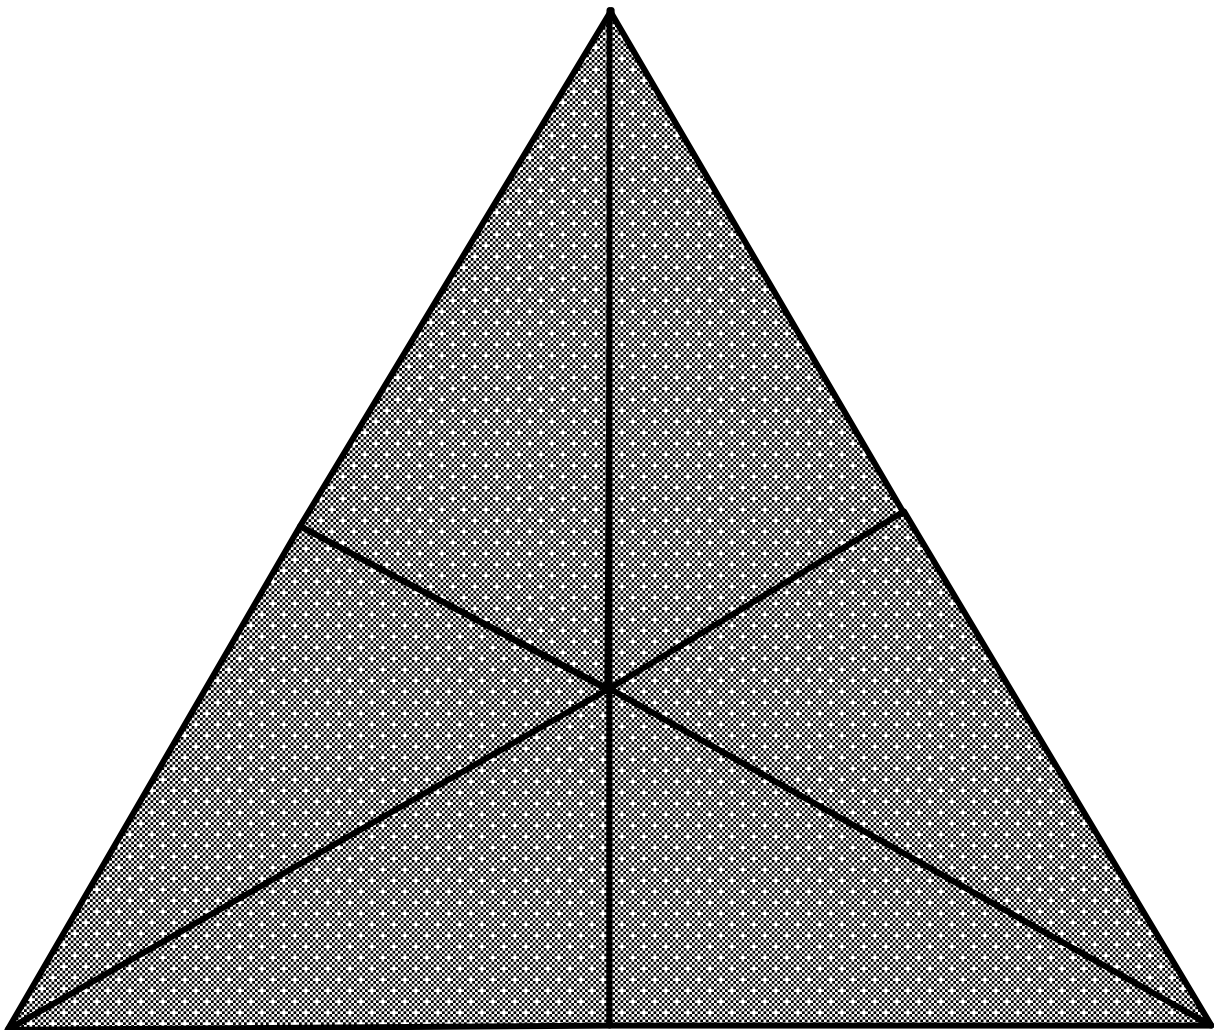

Ce puzzle a été l'objet d'un livre : « Hexagram » de Ulrich Namislow édité à Munich en 1982 par Hugendubel.

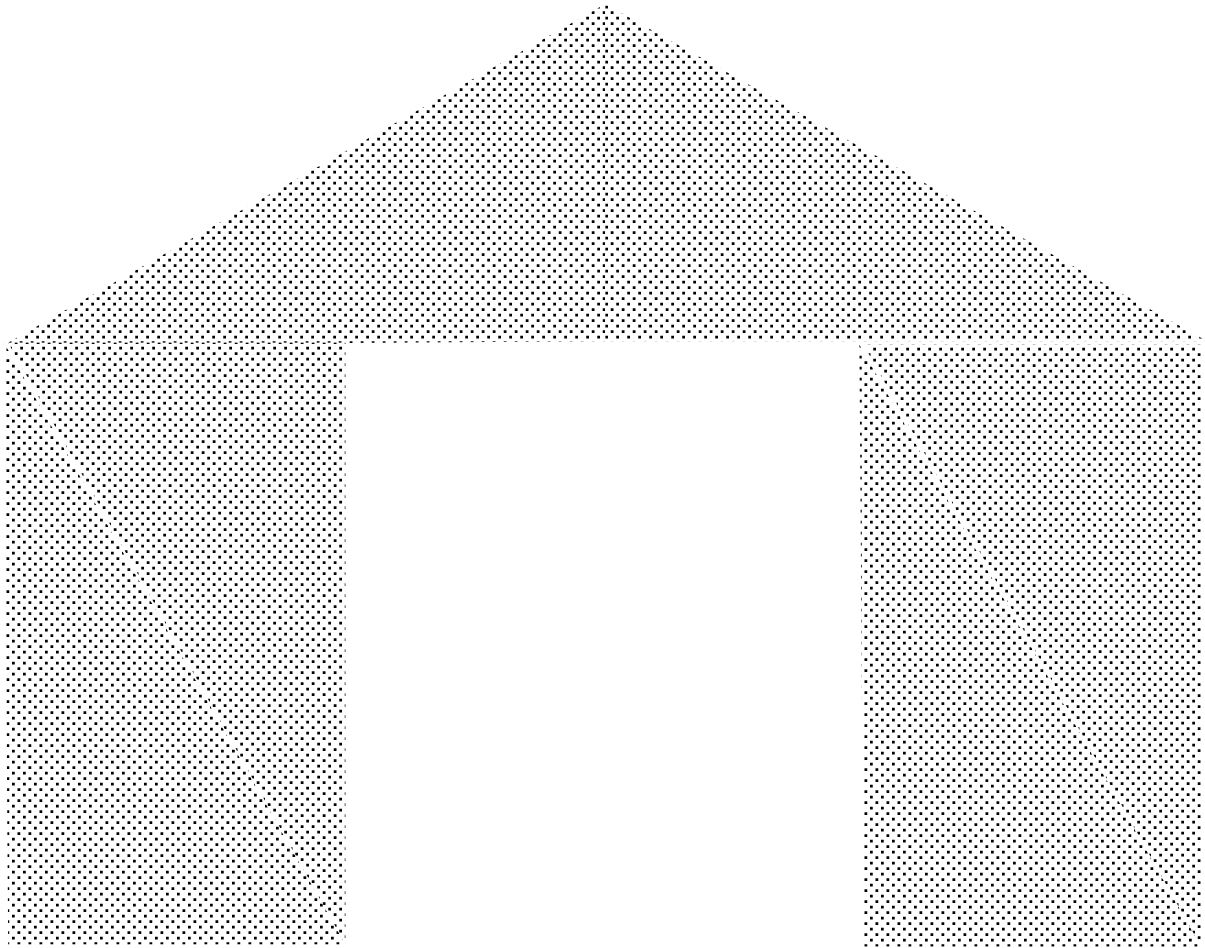

Ce dossier avait été déposé sur l'ancien site de l'APMEP Lorraine. Les propositions de ce document résultent d'un travail fait en 2009 2010 à l'IUFM de Lorraine par des PE2 du site de Metz.

Les créations des étudiants sont présentées en trois séries : La première (page 2) ne présente que les silhouettes. La deuxième (page 29) présente les silhouettes auxquelles sont jointes des solutions à échelle réduite. La troisième (page 60) présente une solution à l'échelle des pièces manipulées.

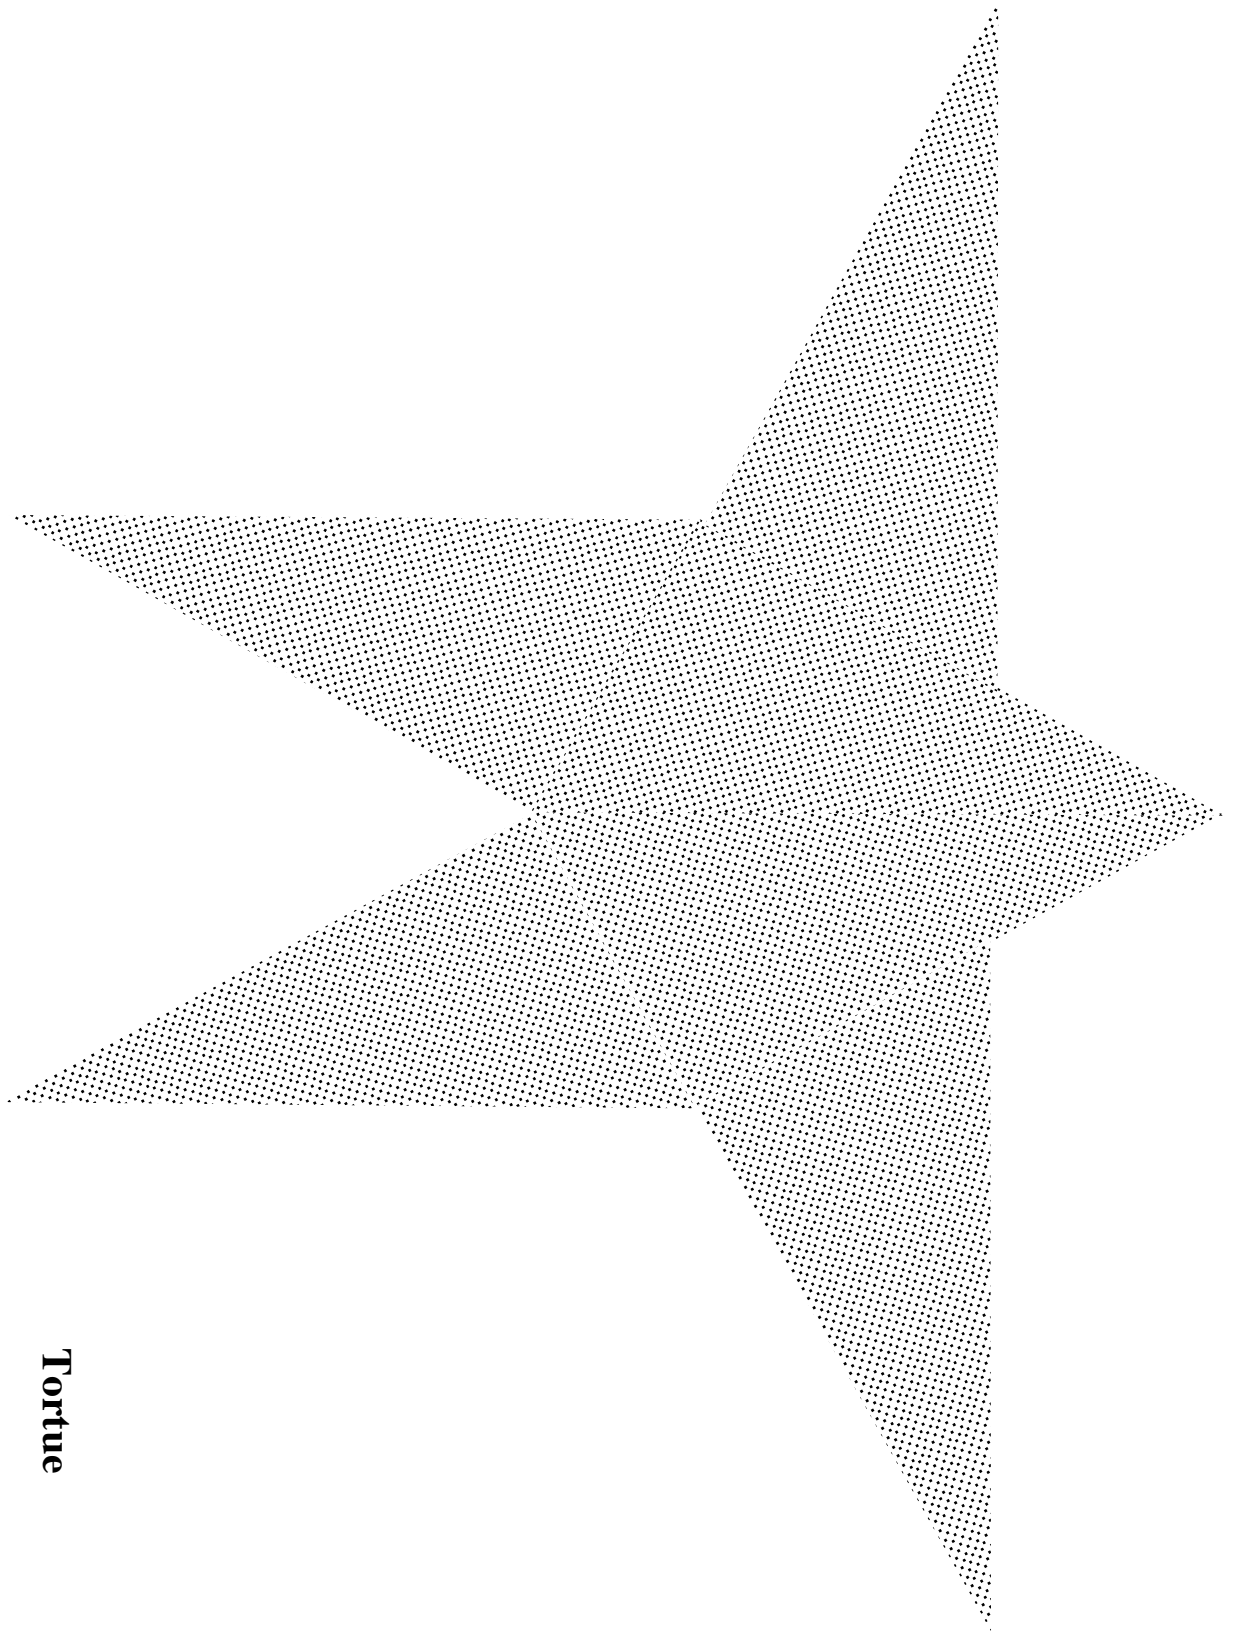

L'utilisateur de ce document y trouvera peut-être de quoi mettre en œuvre des éléments de différenciation. Il pourra éventuellement le compléter avec des silhouettes dans laquelle une pièce est déjà placée.

Les six pièces de l'hexagramme assemblées forment un triangle équilatéral. Cette disposition permet un tracé puis un découpage rapide des pièces. Les étudiants ont utilisé un jeu de mêmes dimensions que celui proposé ci-dessous.

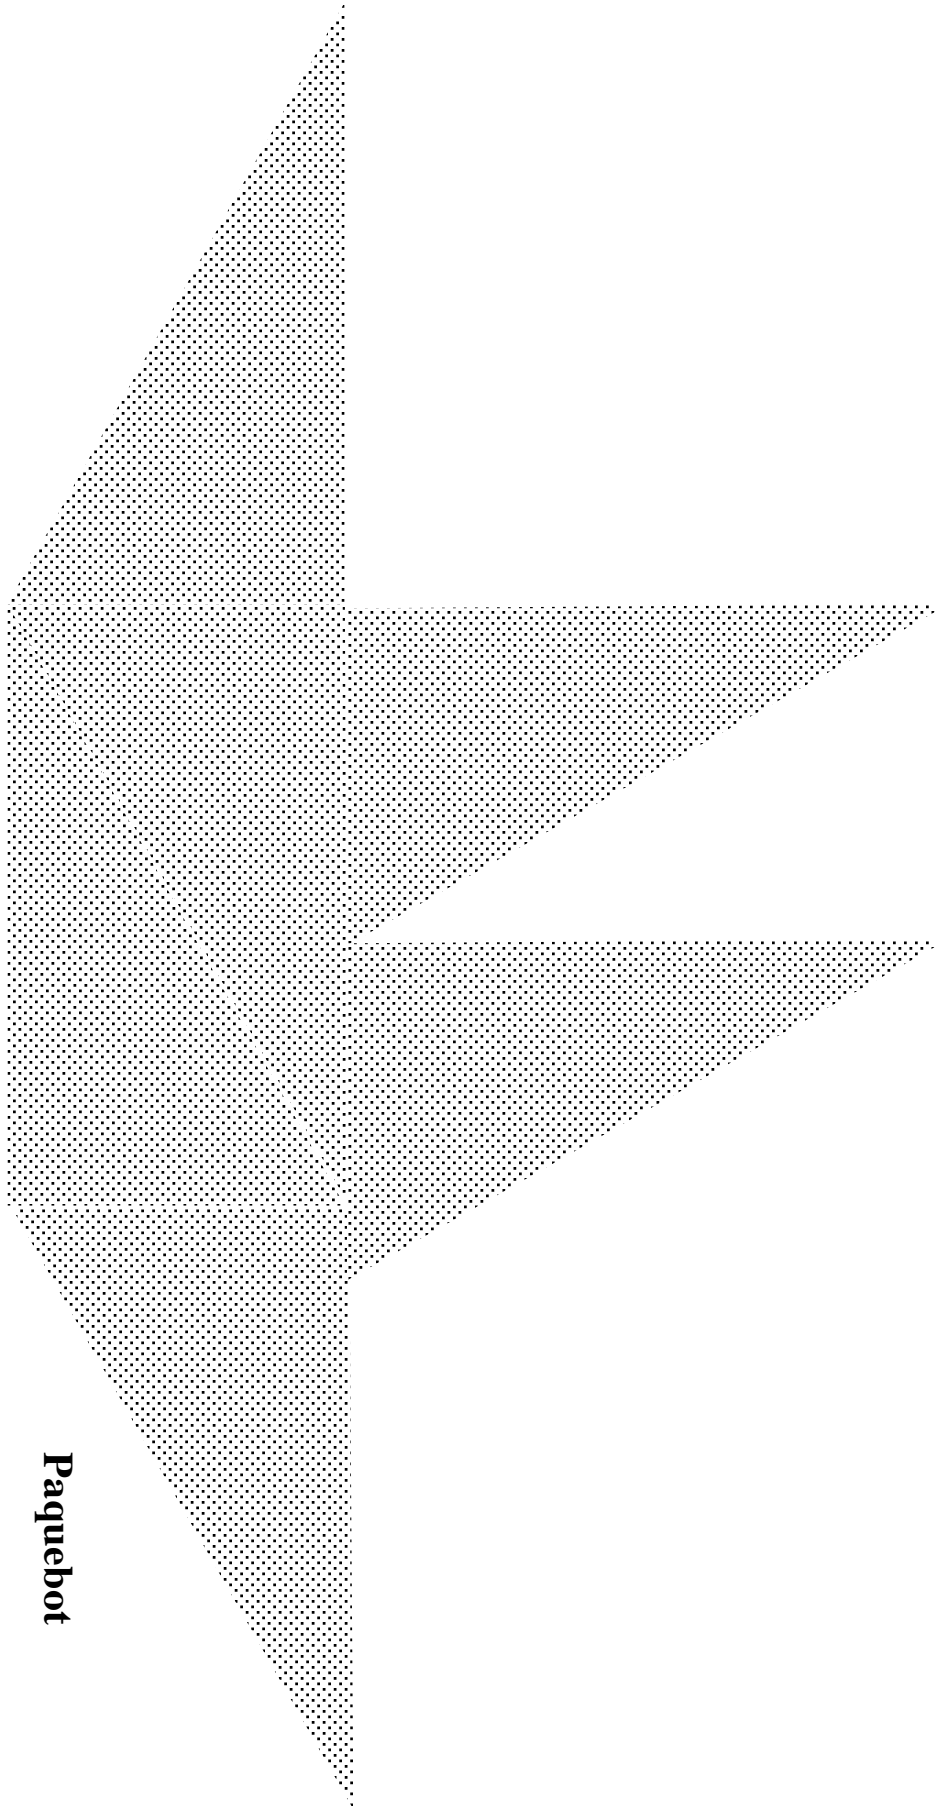

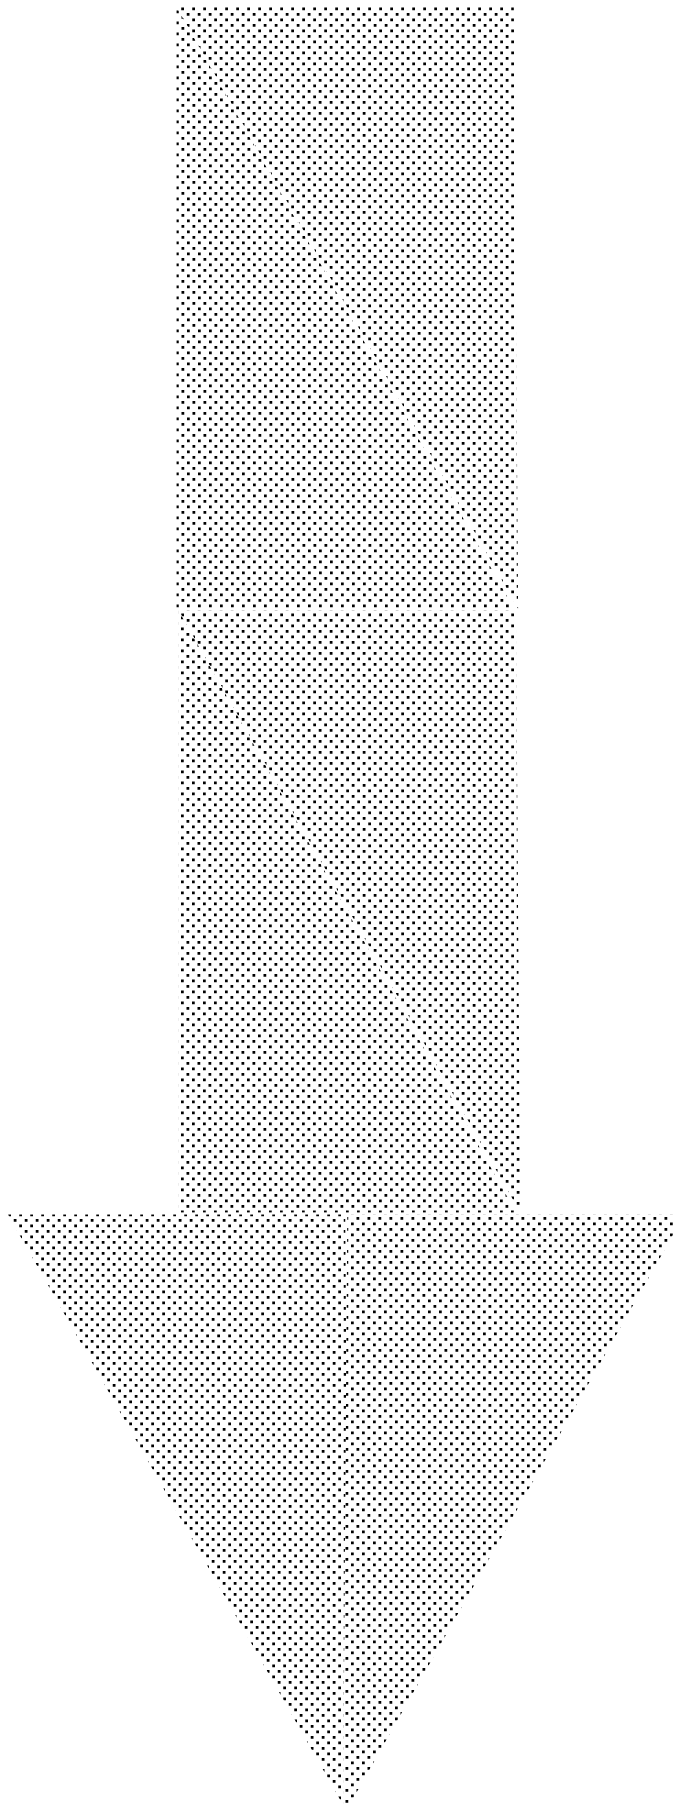

Cabane

Tortue

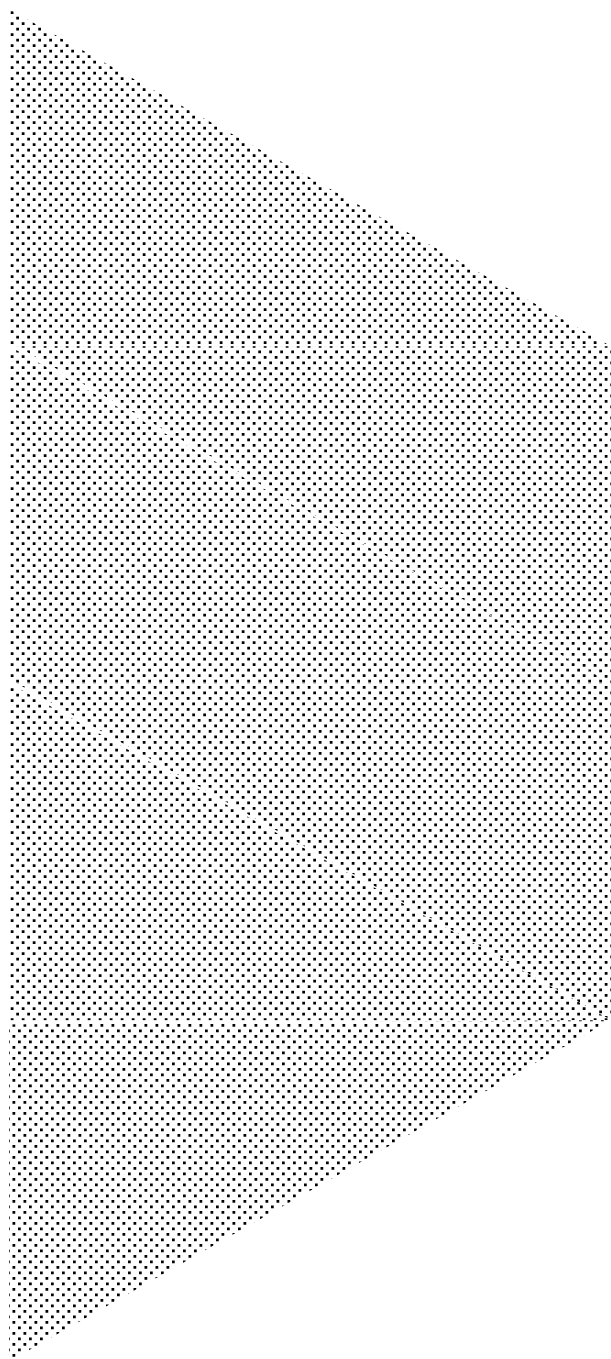

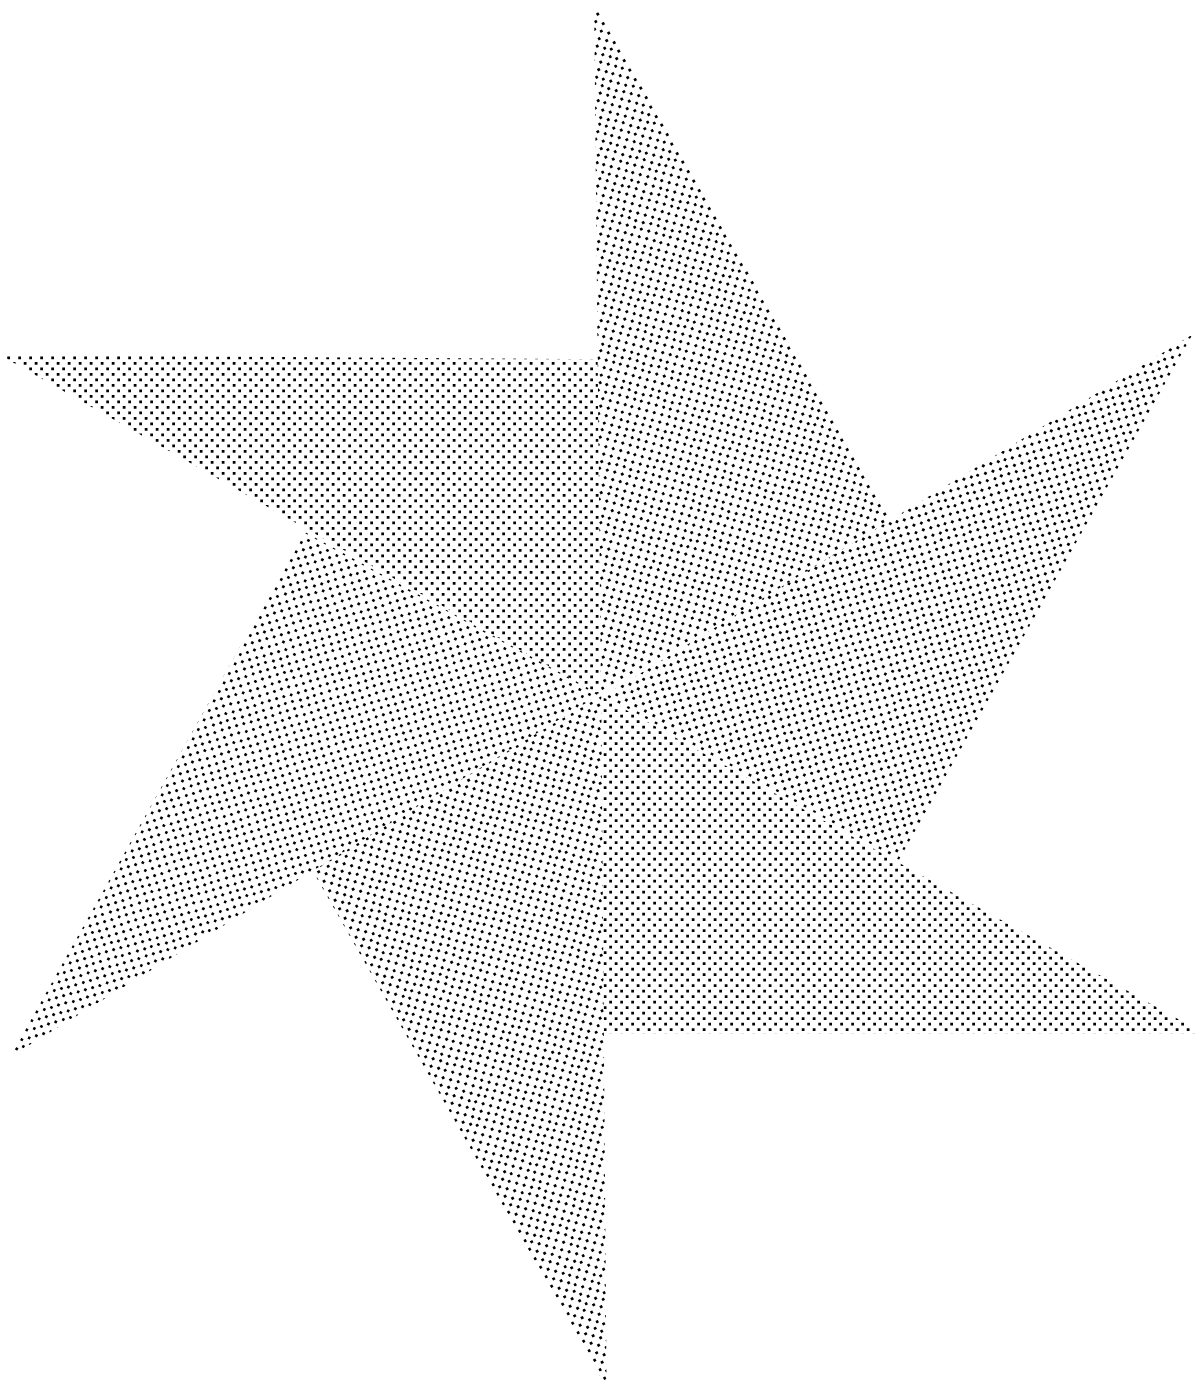

Paquebot

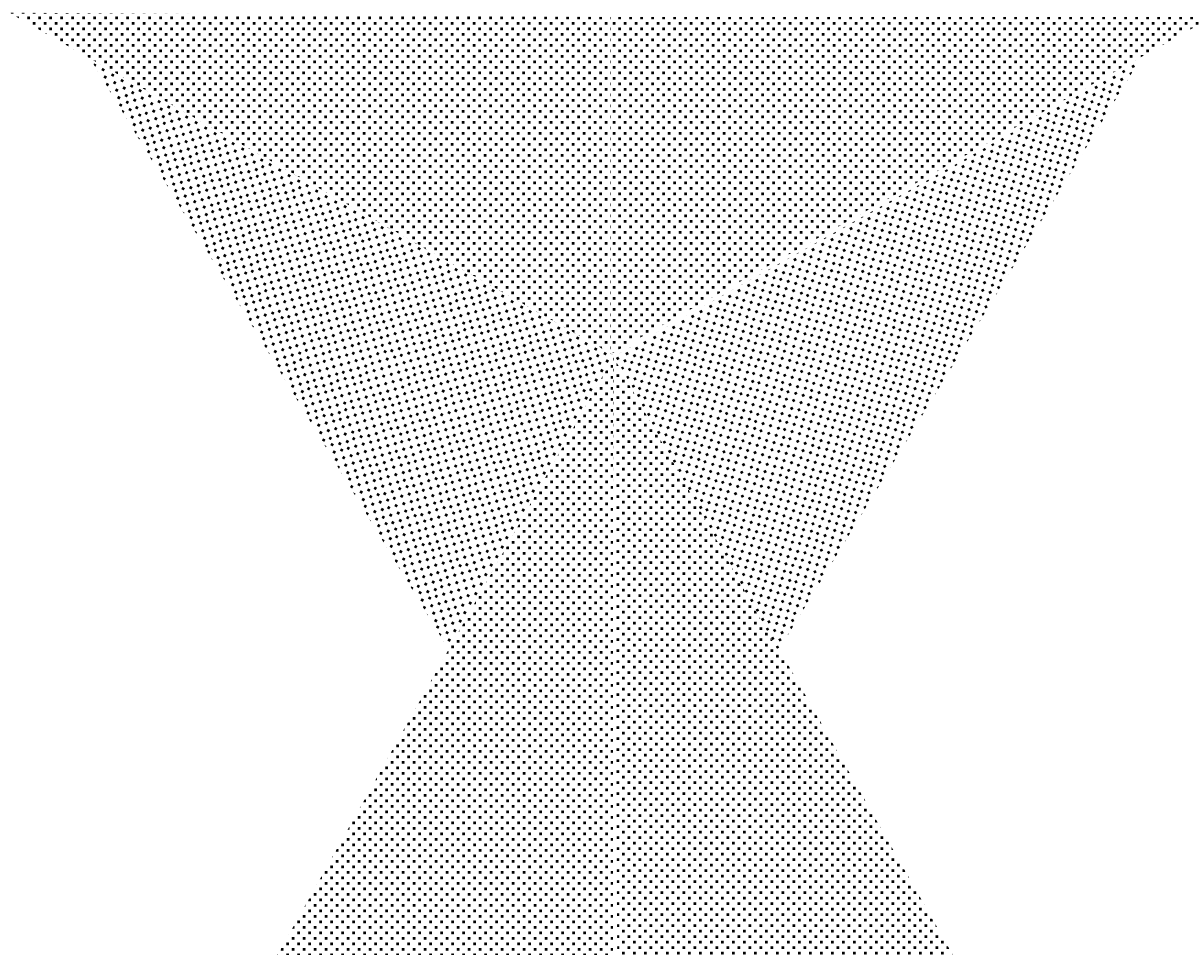

La flèche

L'estrade du lion

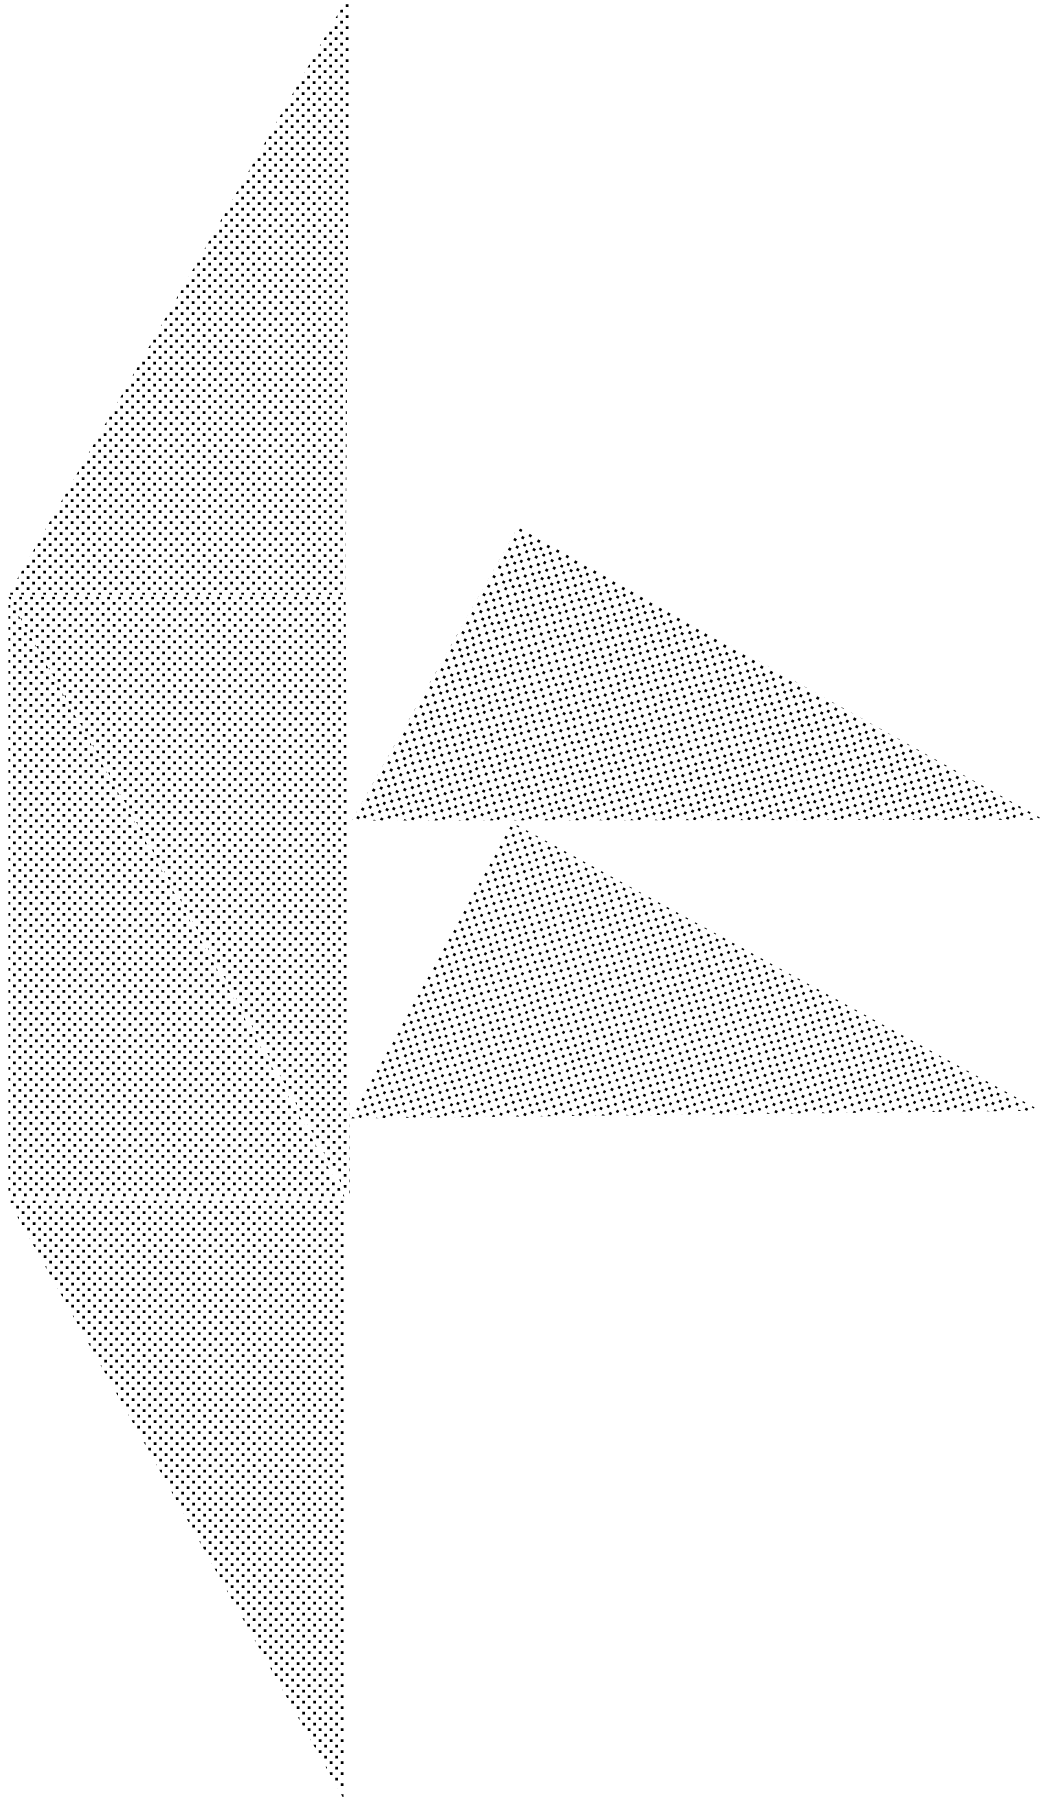

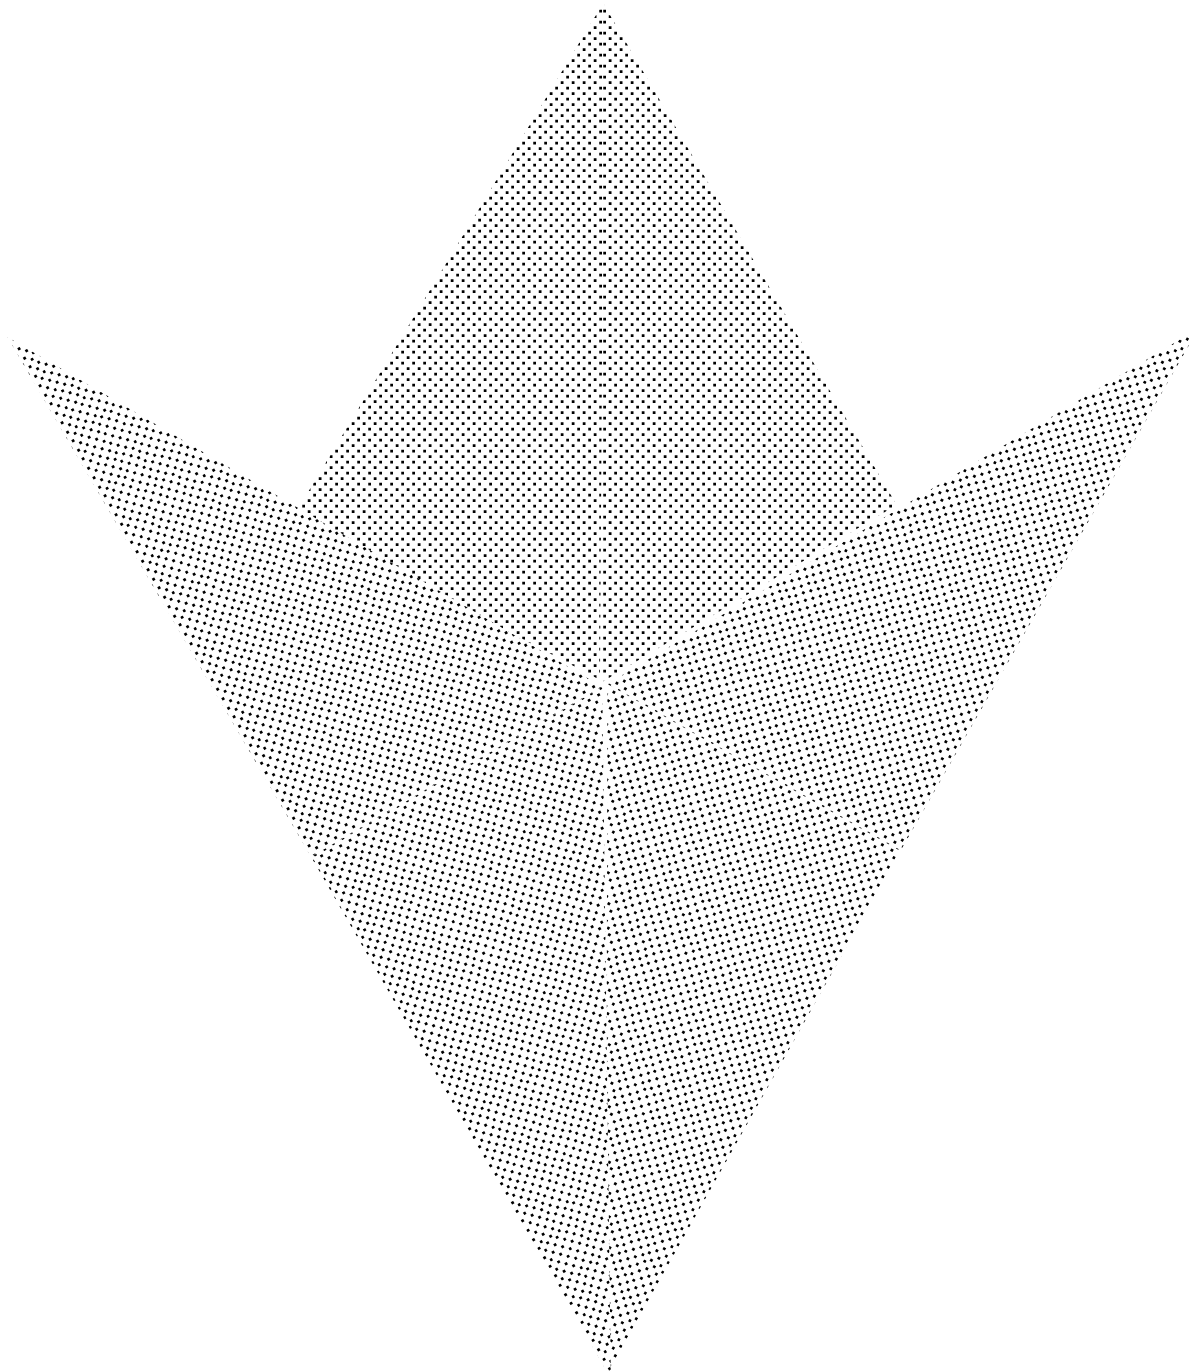

L'étoile

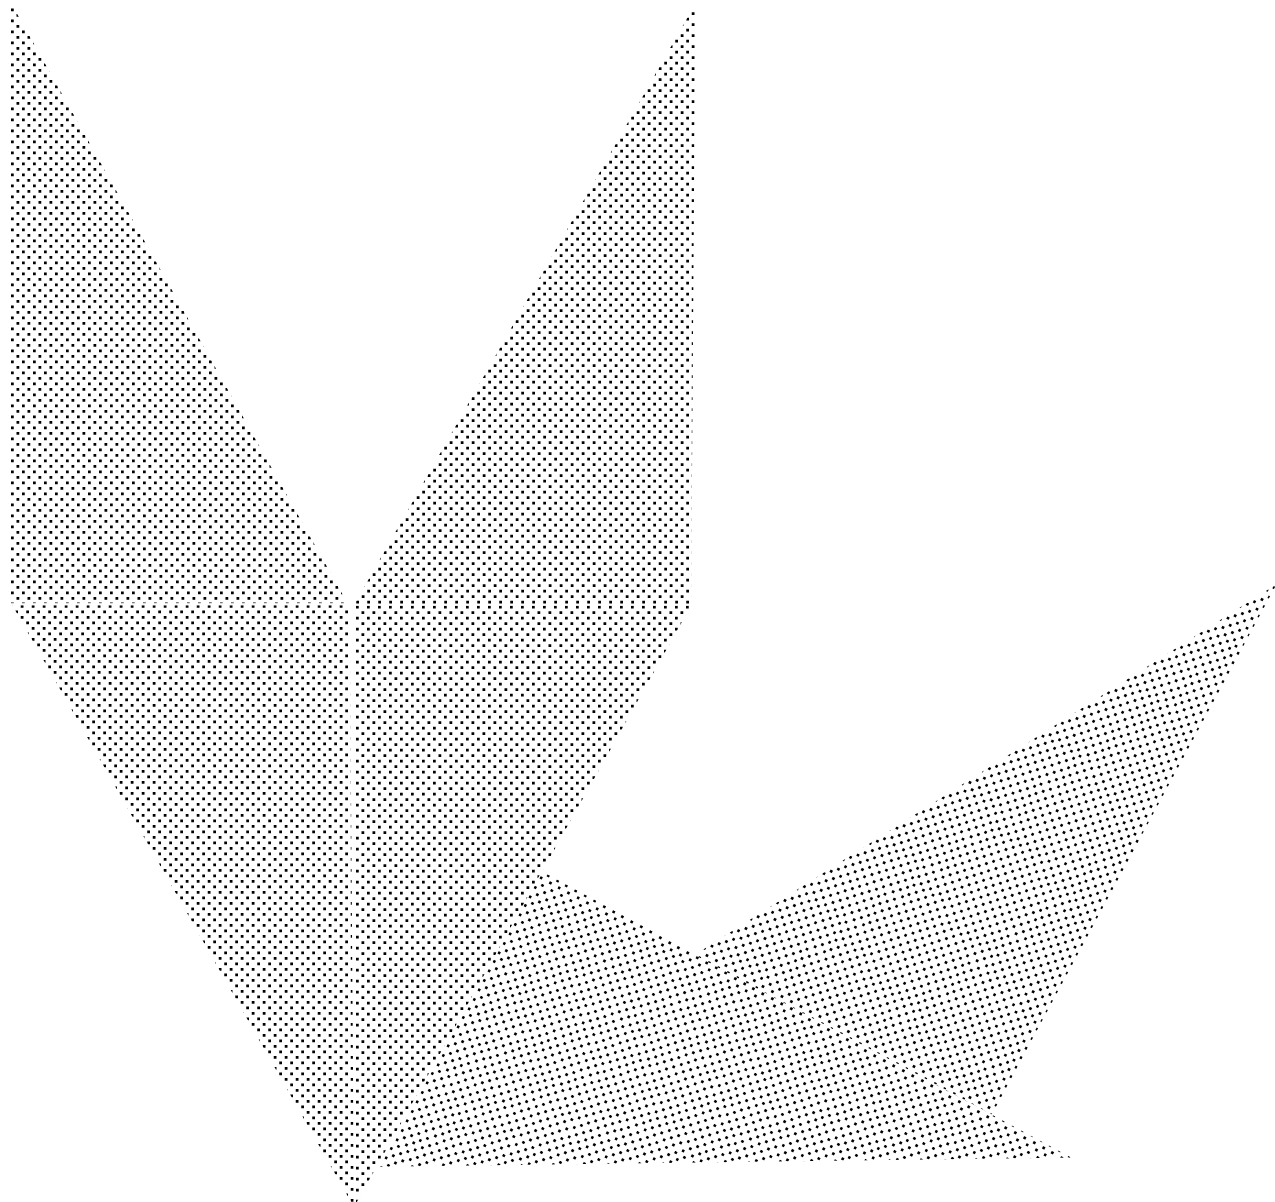

La coupe

Le voilier

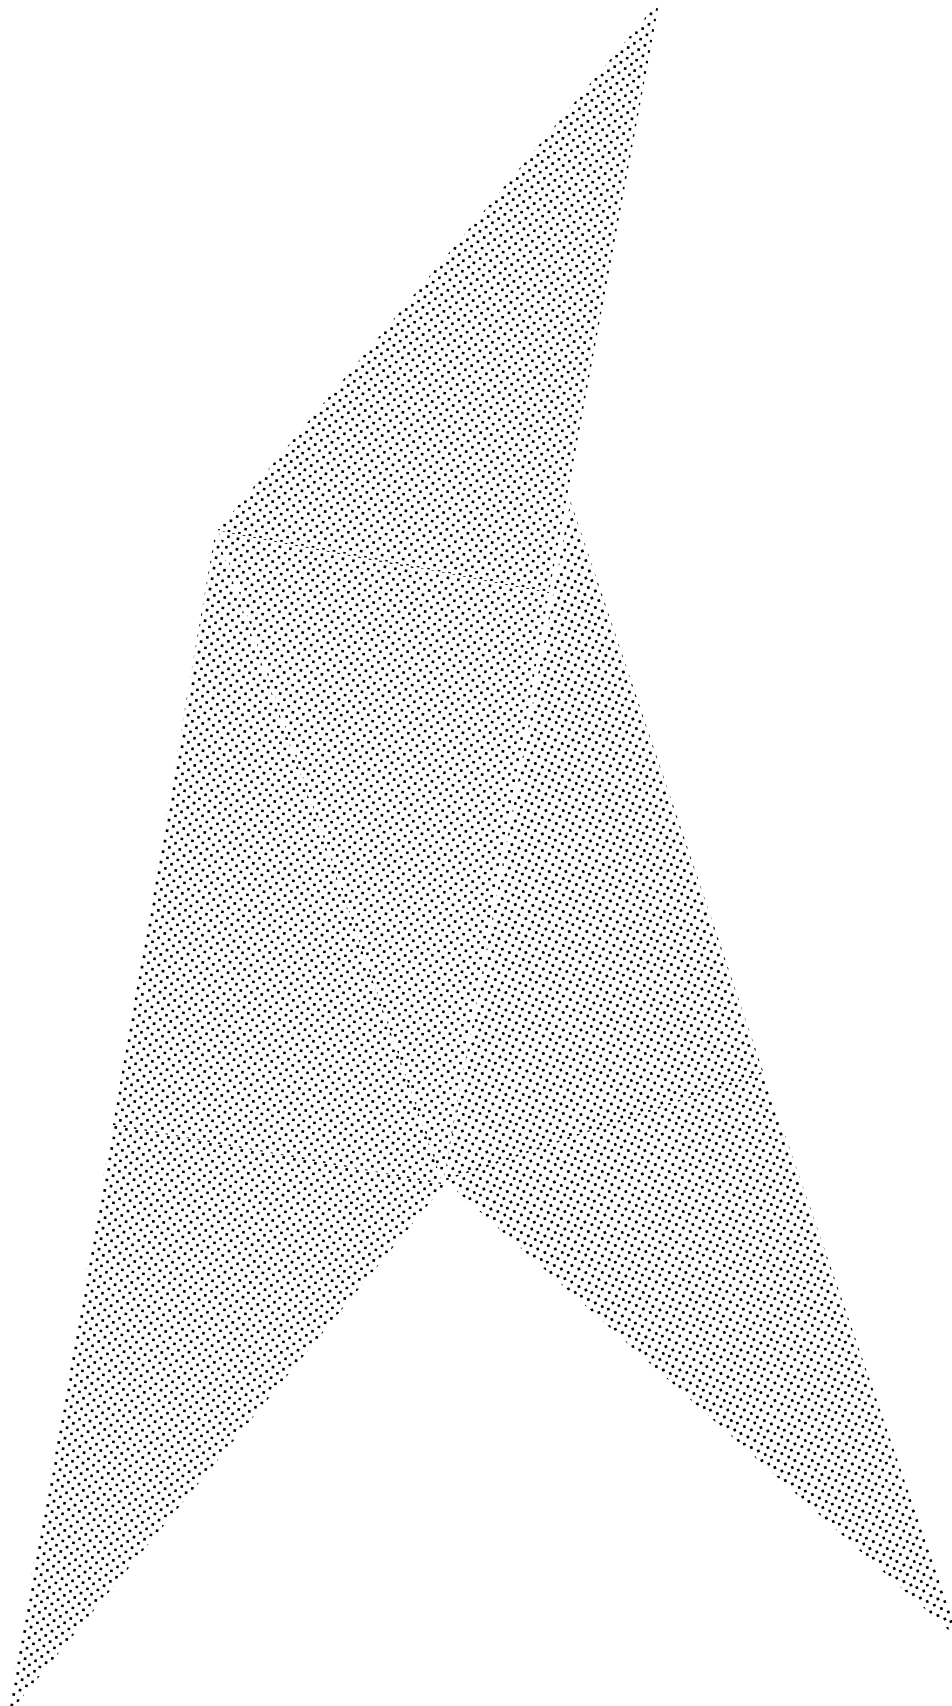

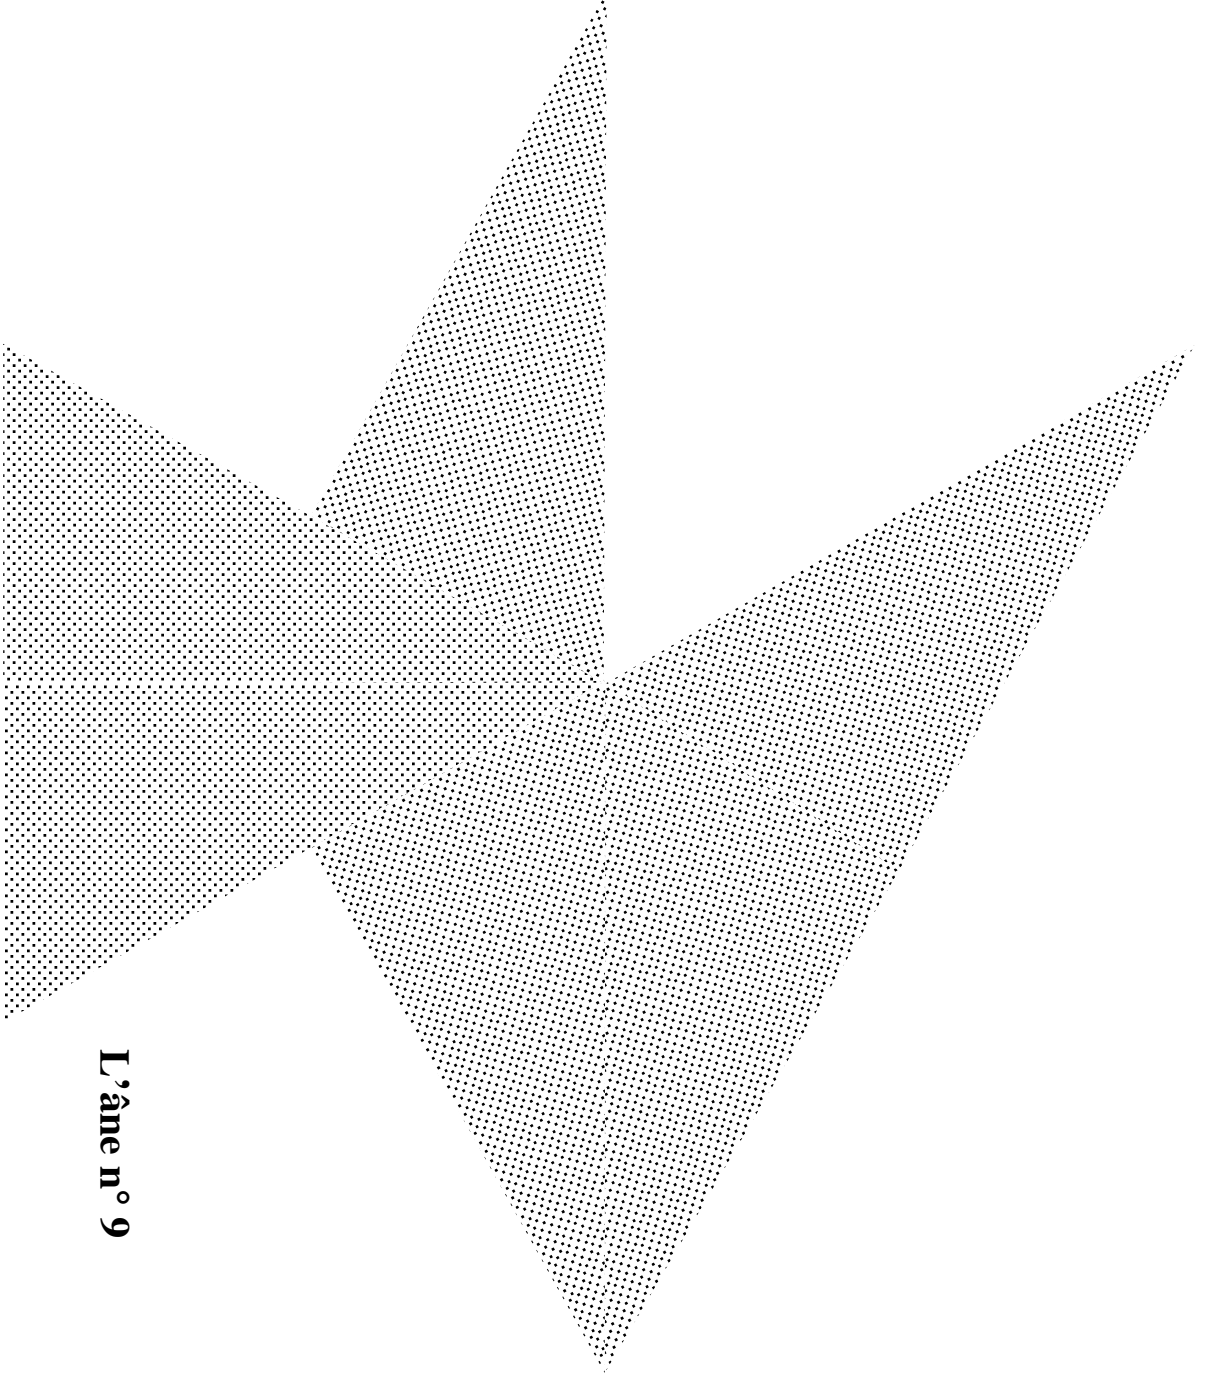

La rose

Le fennec

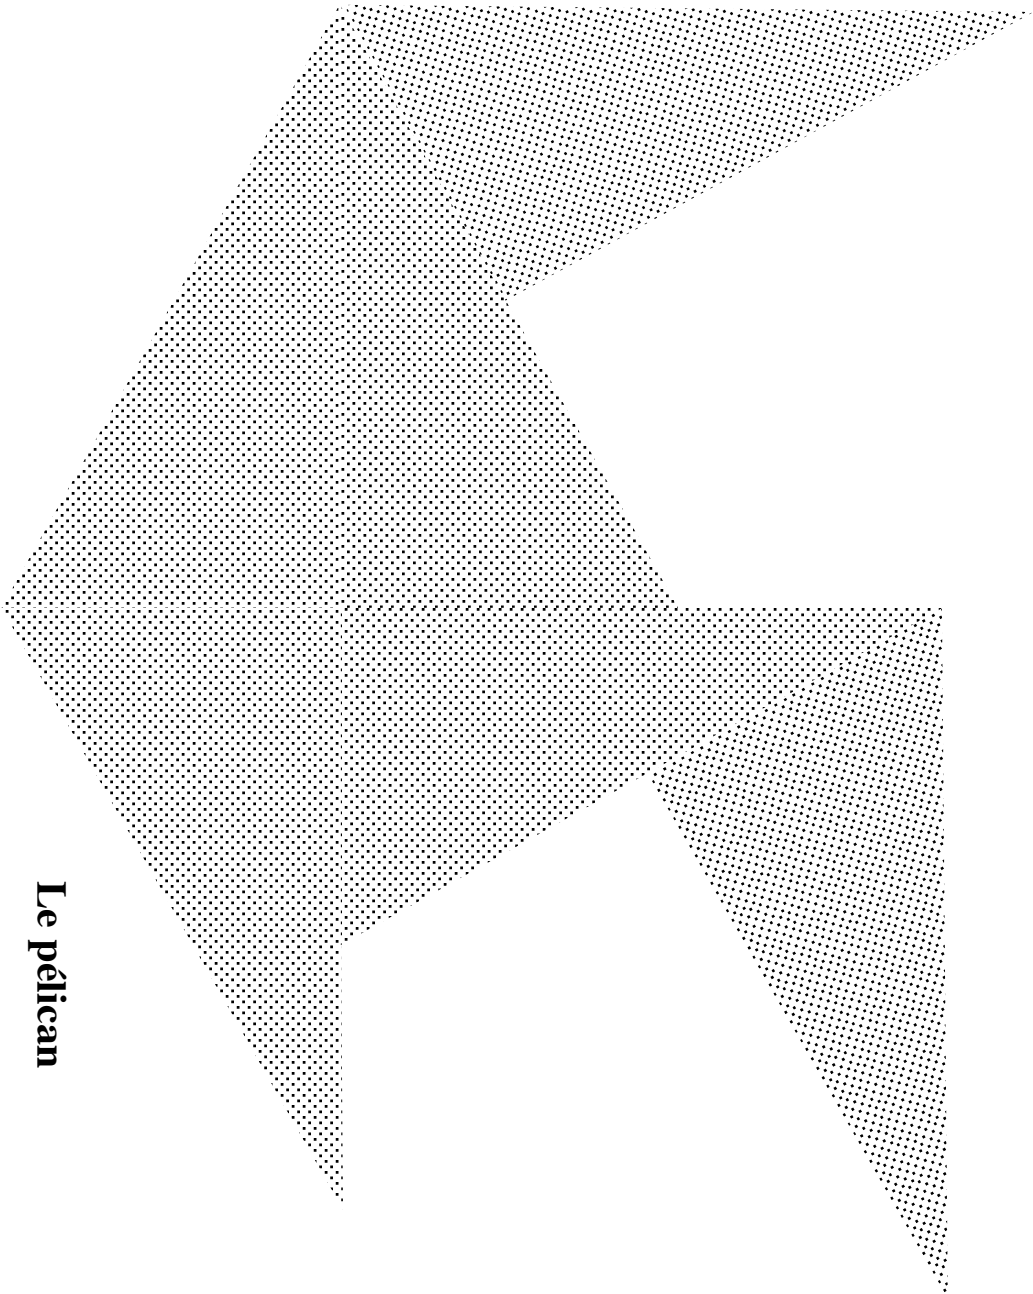

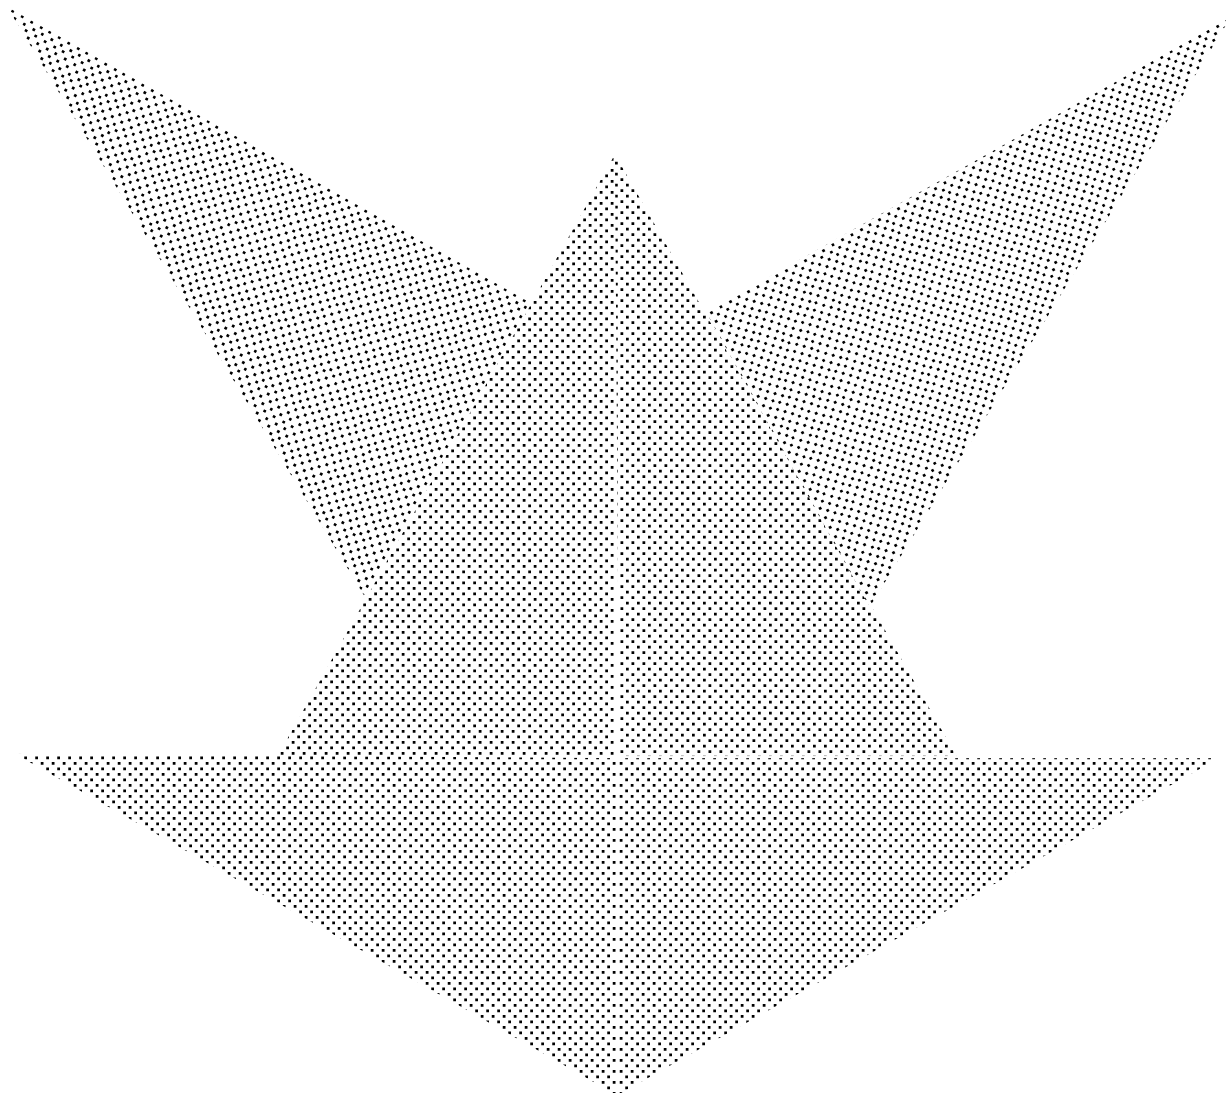

Le Spoutnik

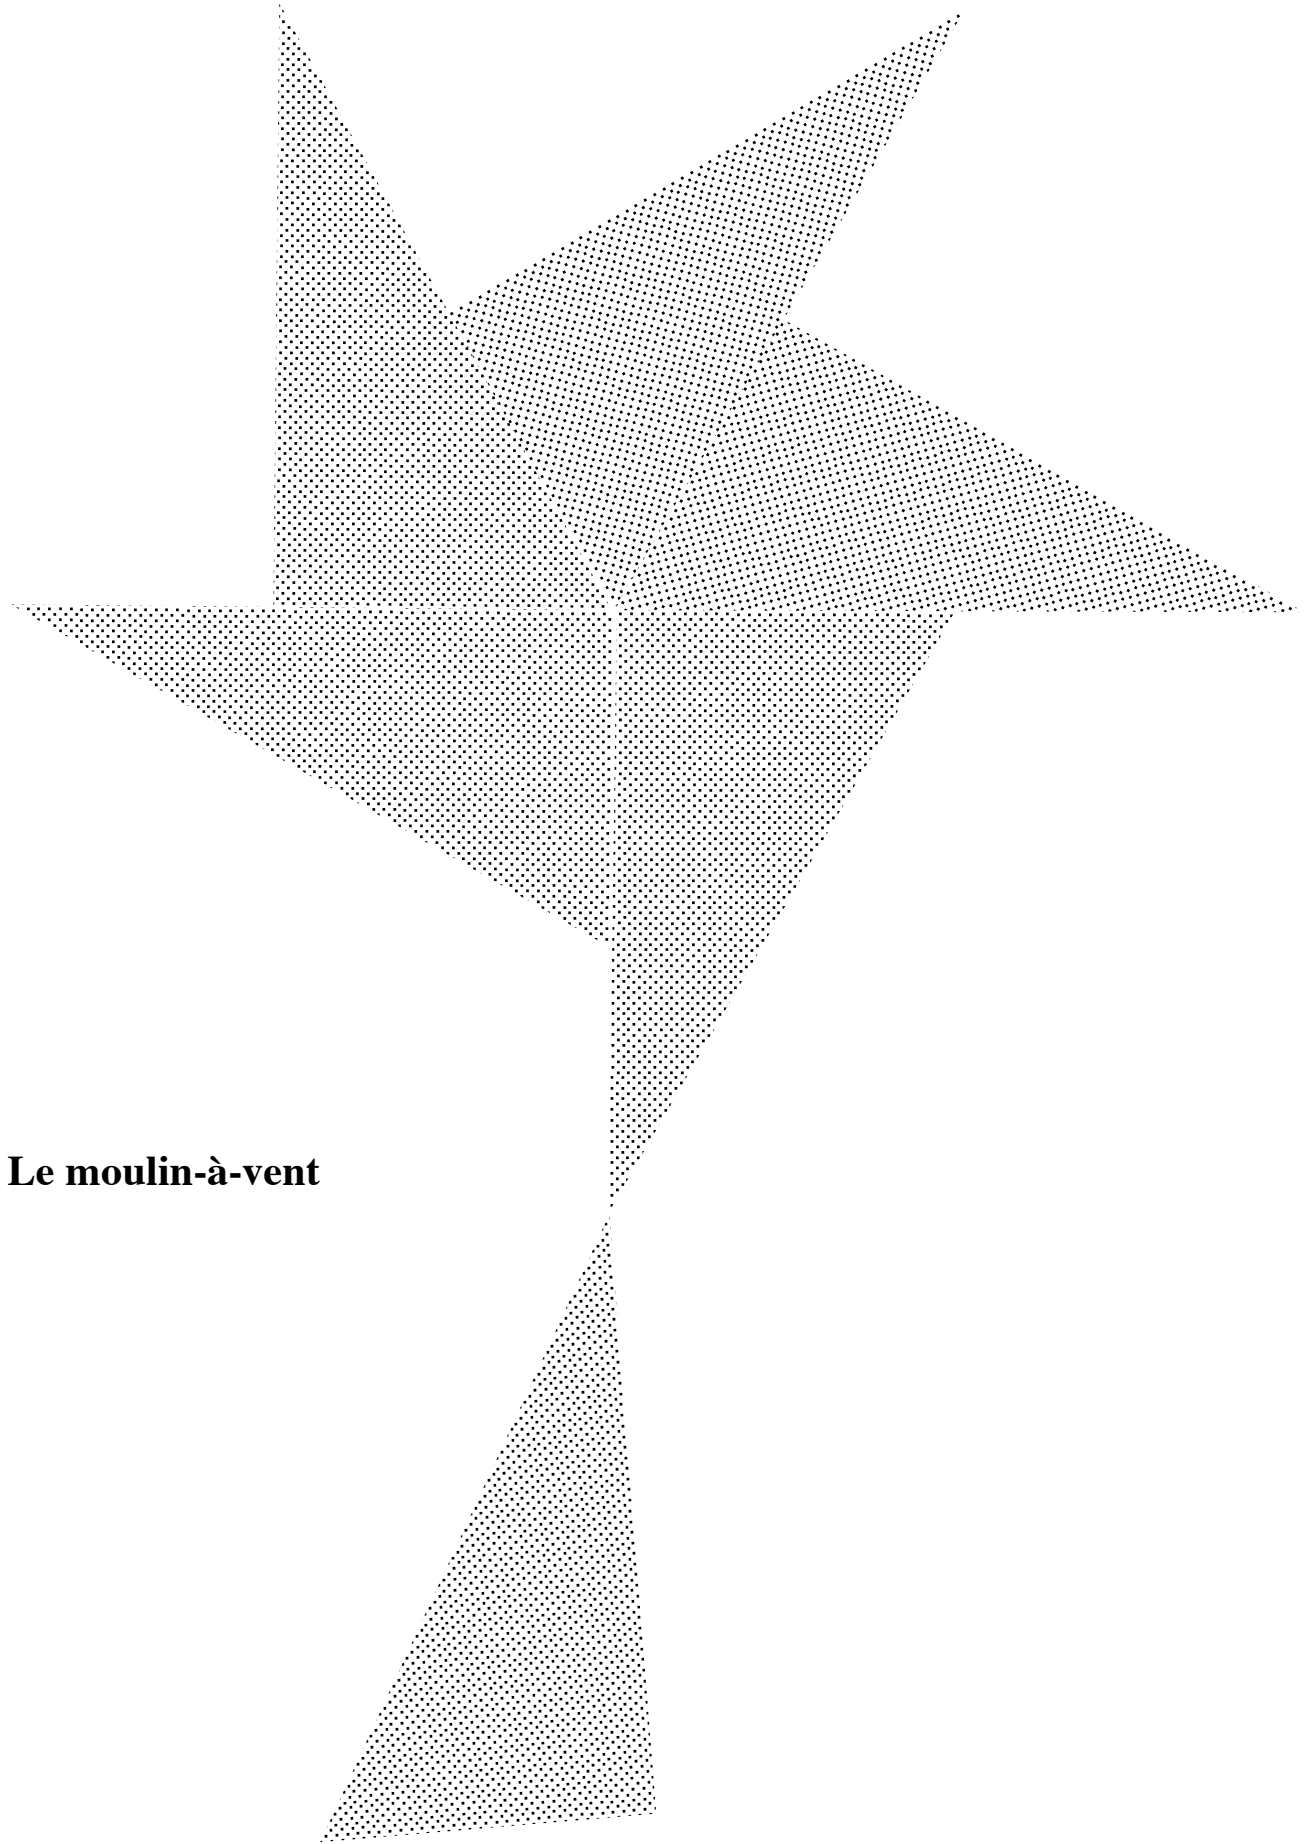

L'âne n° 9

Le pélican

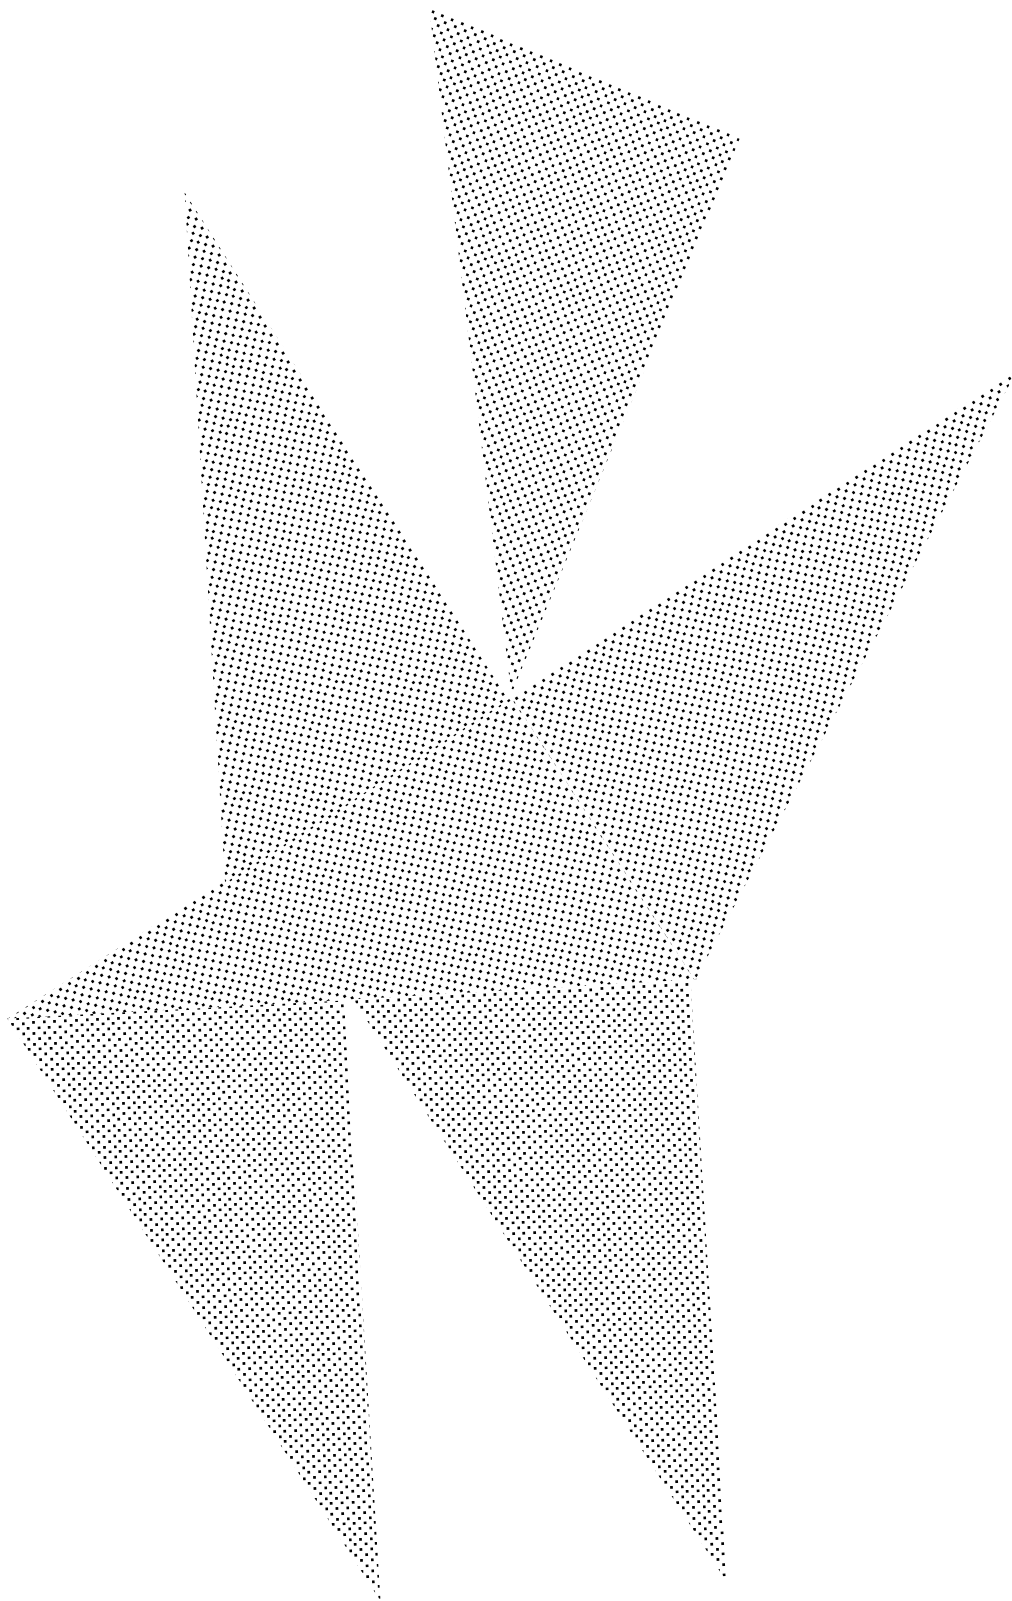

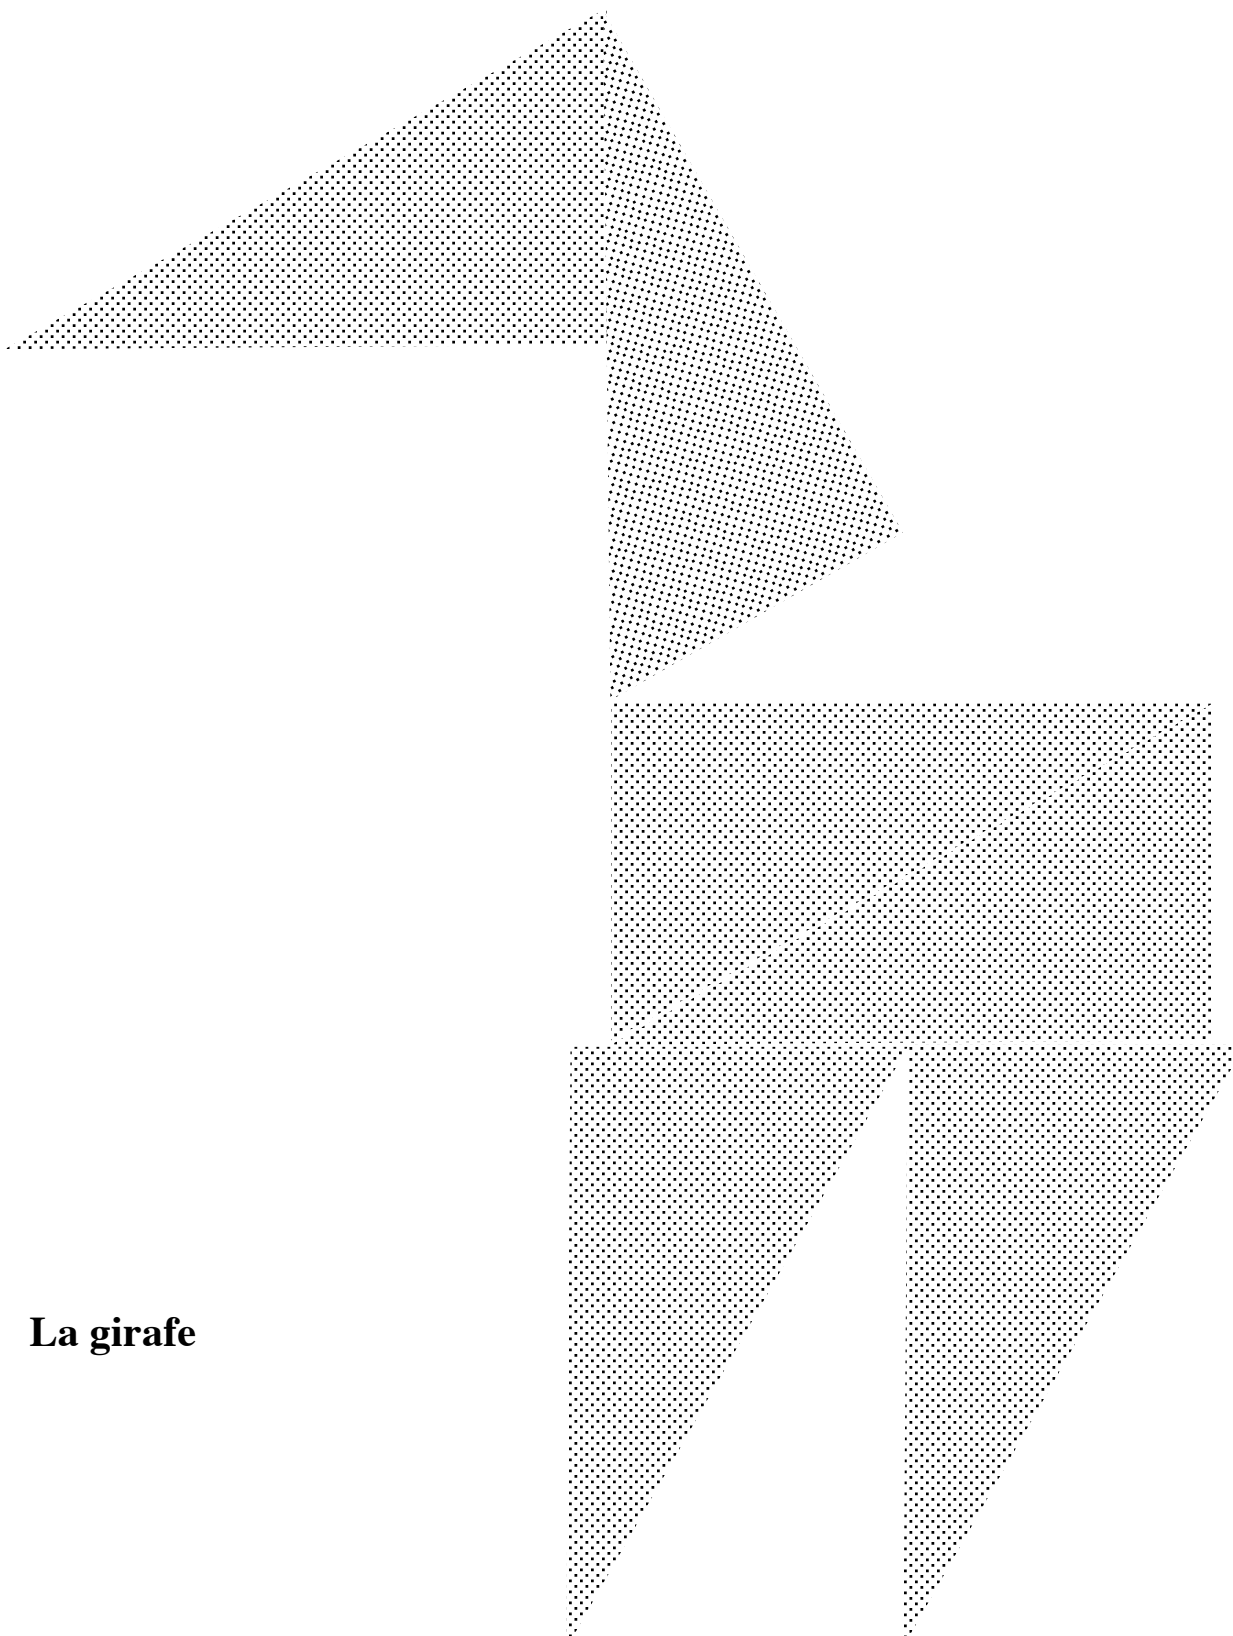

Le chapeau Viking

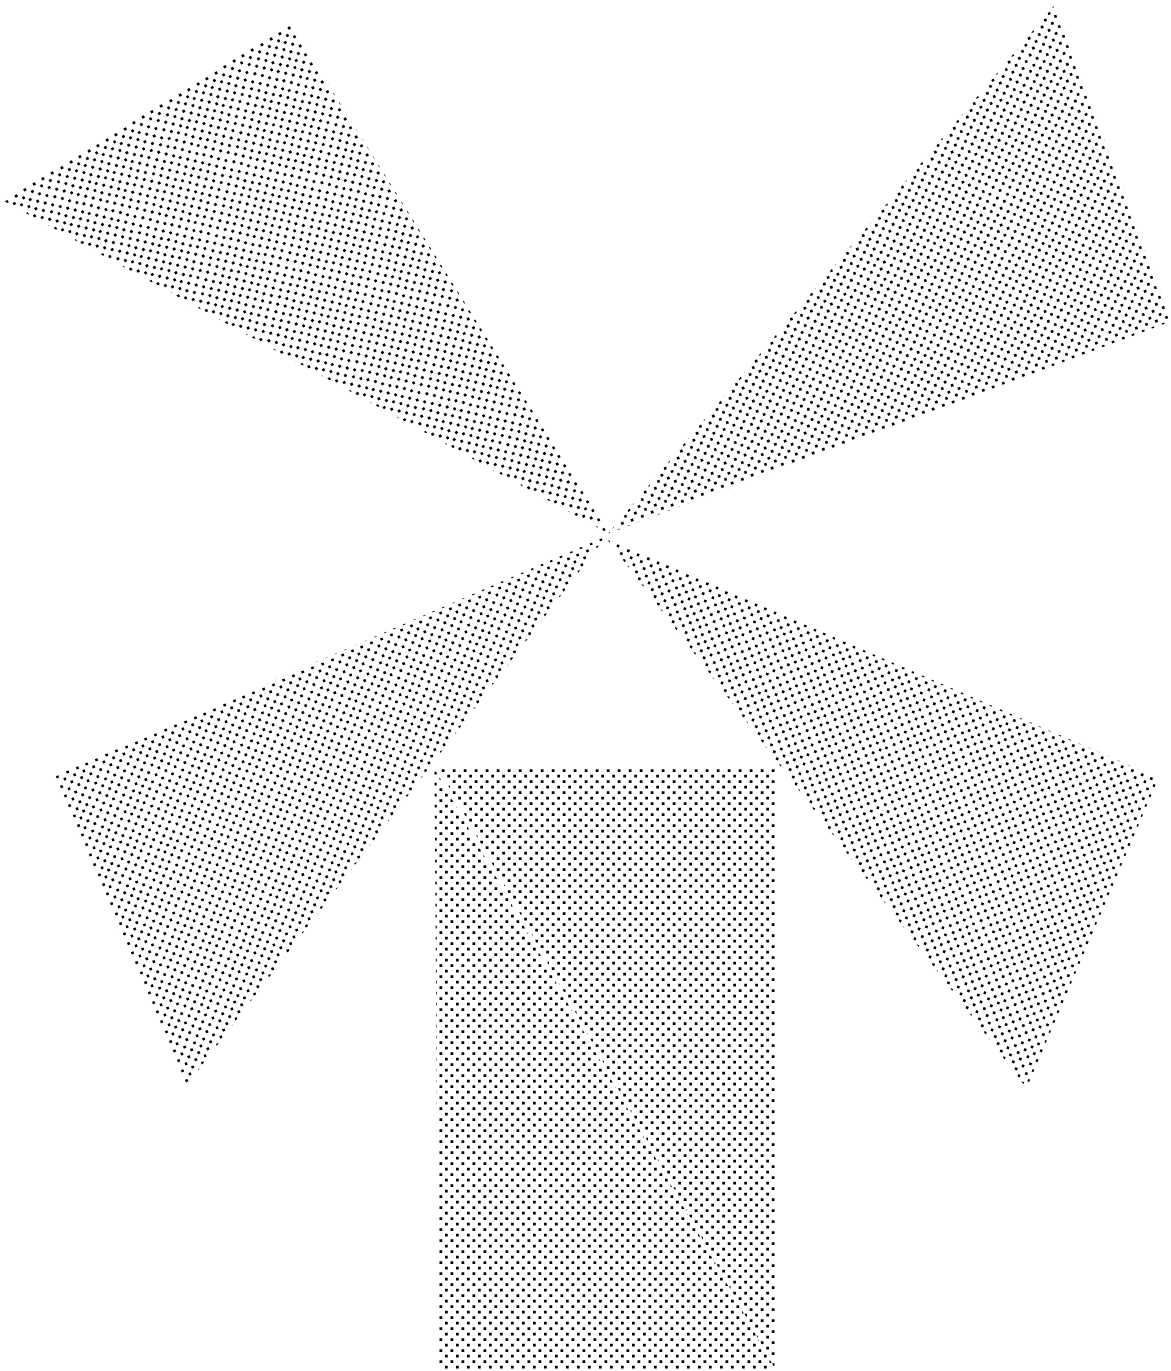

Le moulin-à-vent

Le bonhomme

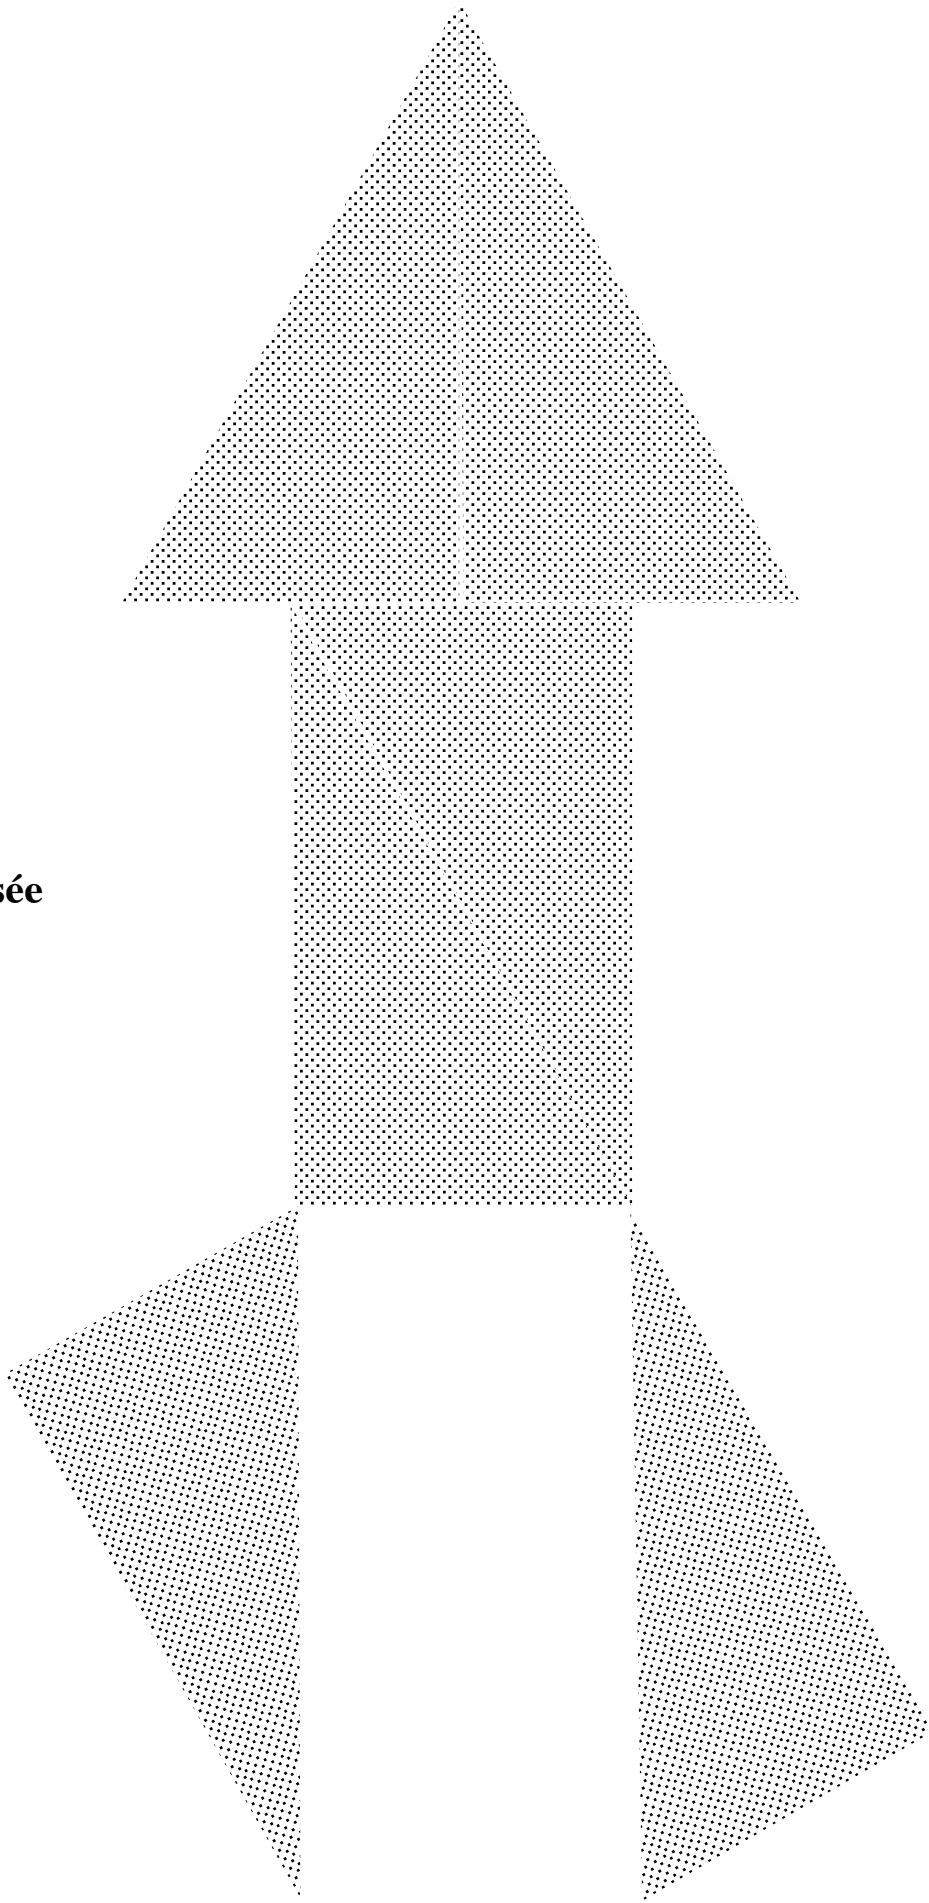

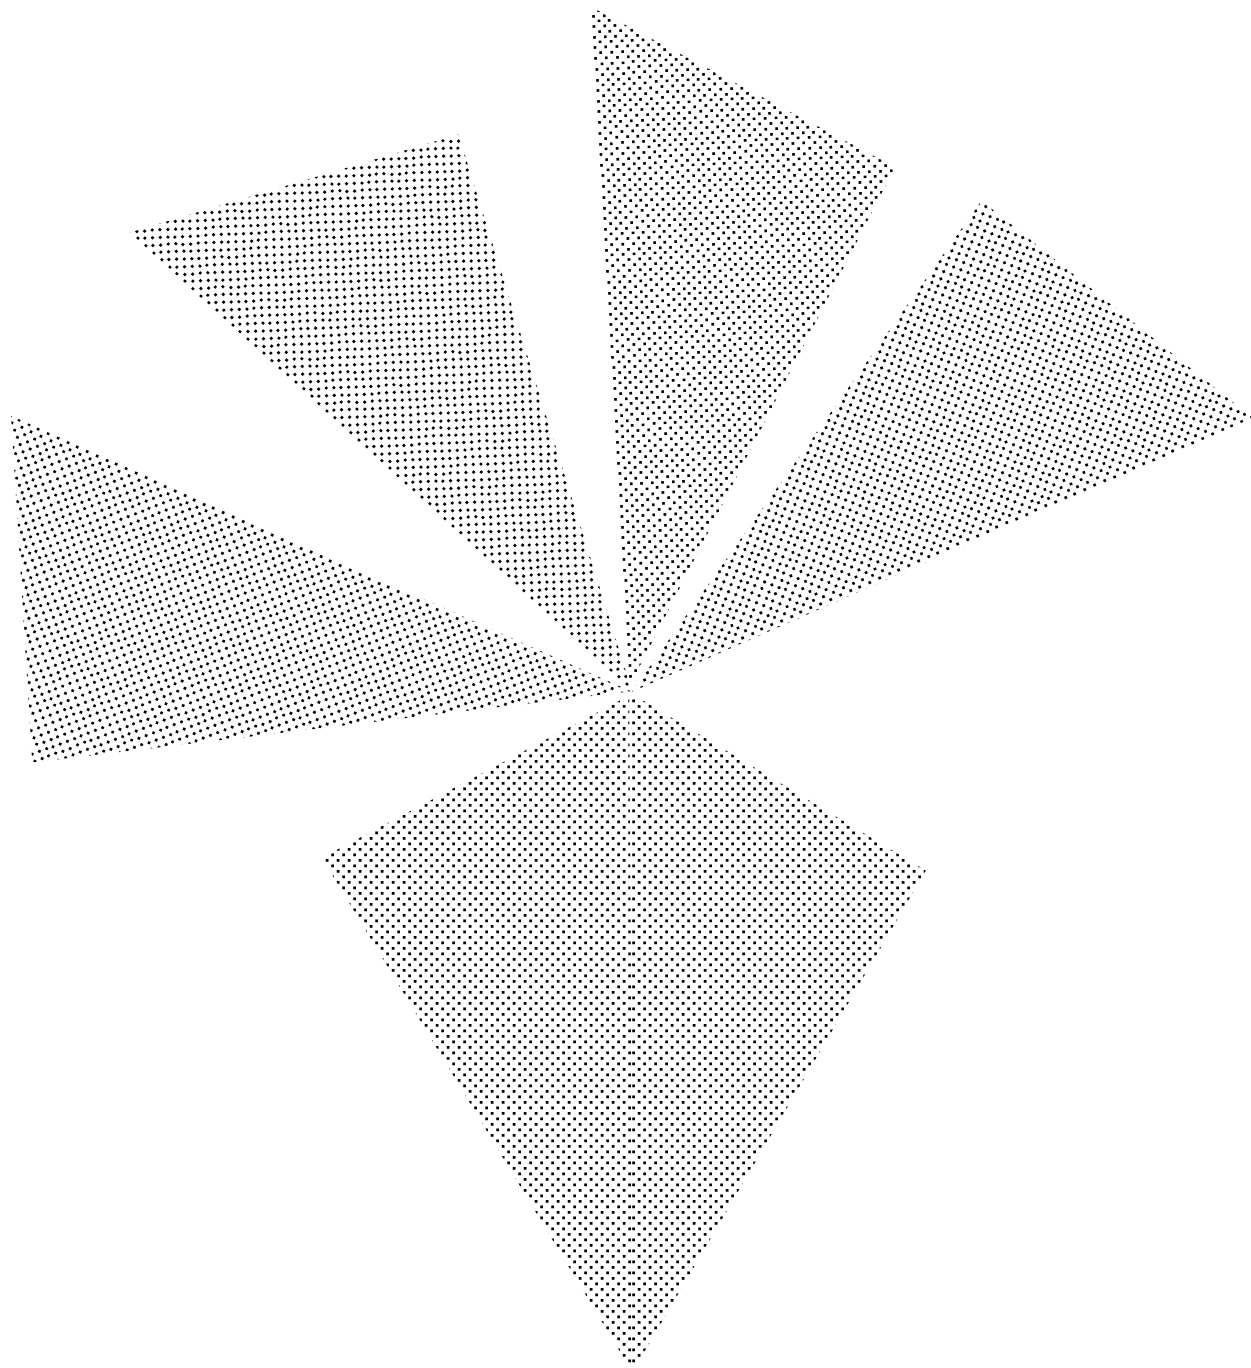

La girafe

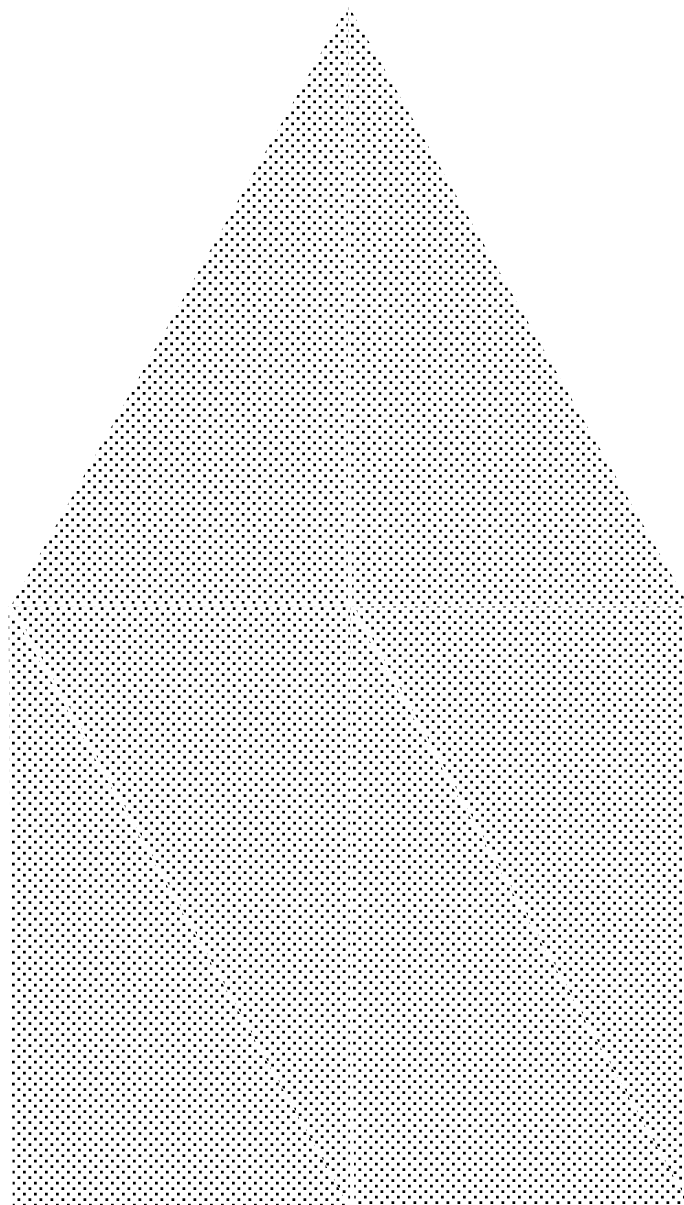

Le moulin

La fusée

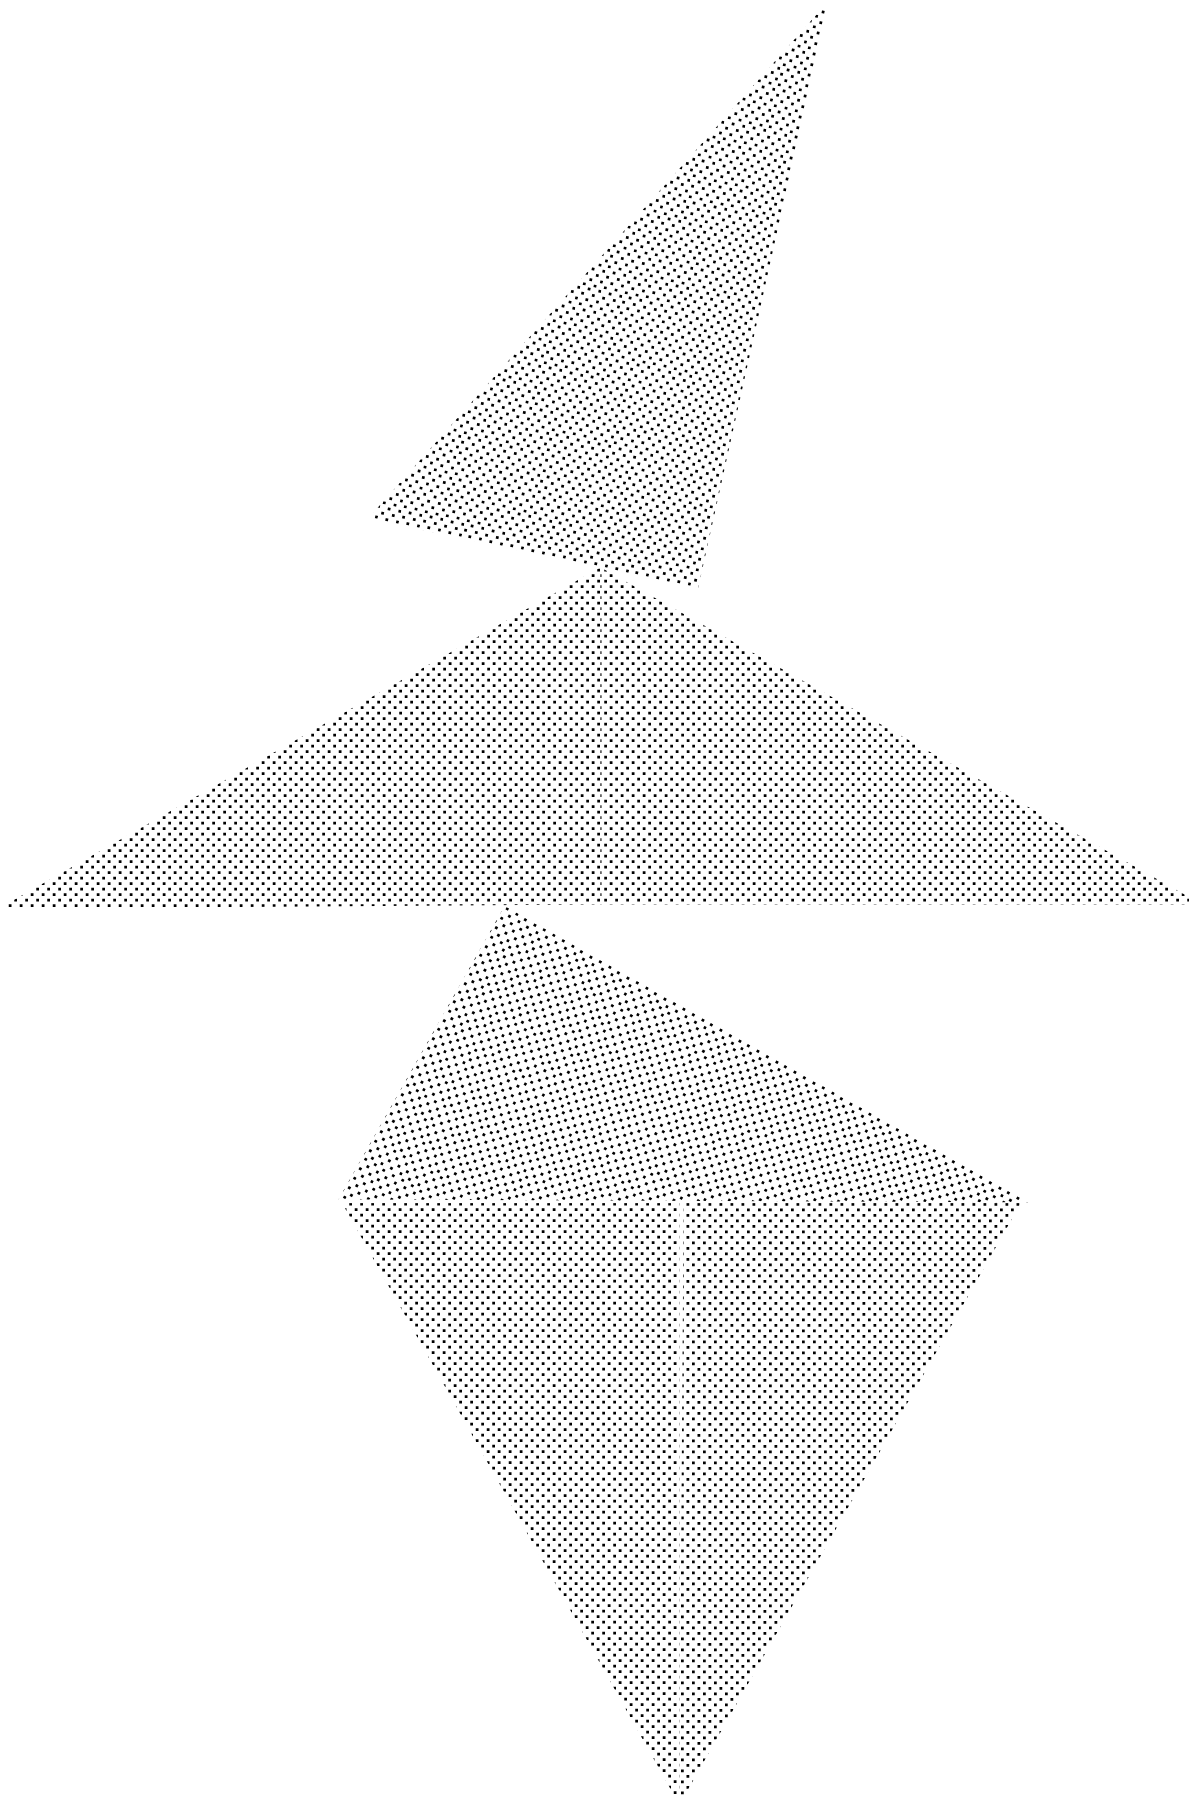

La carotte

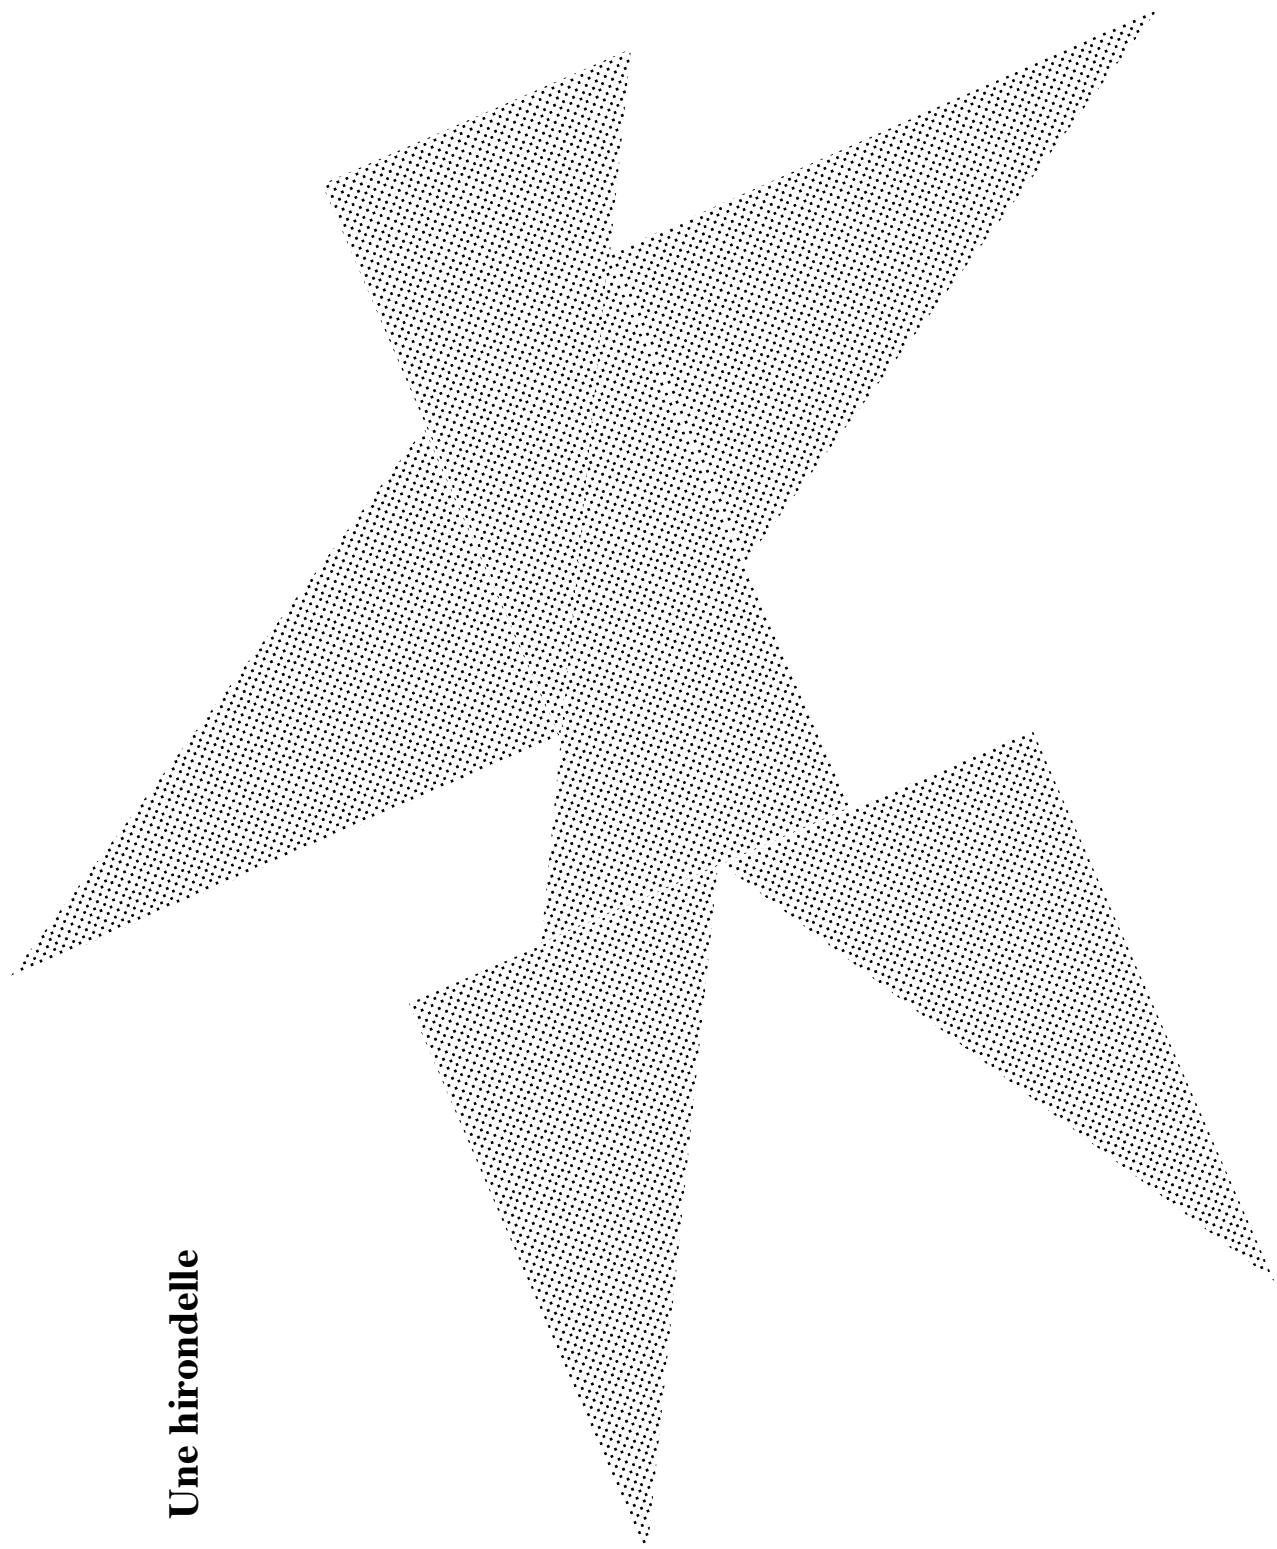

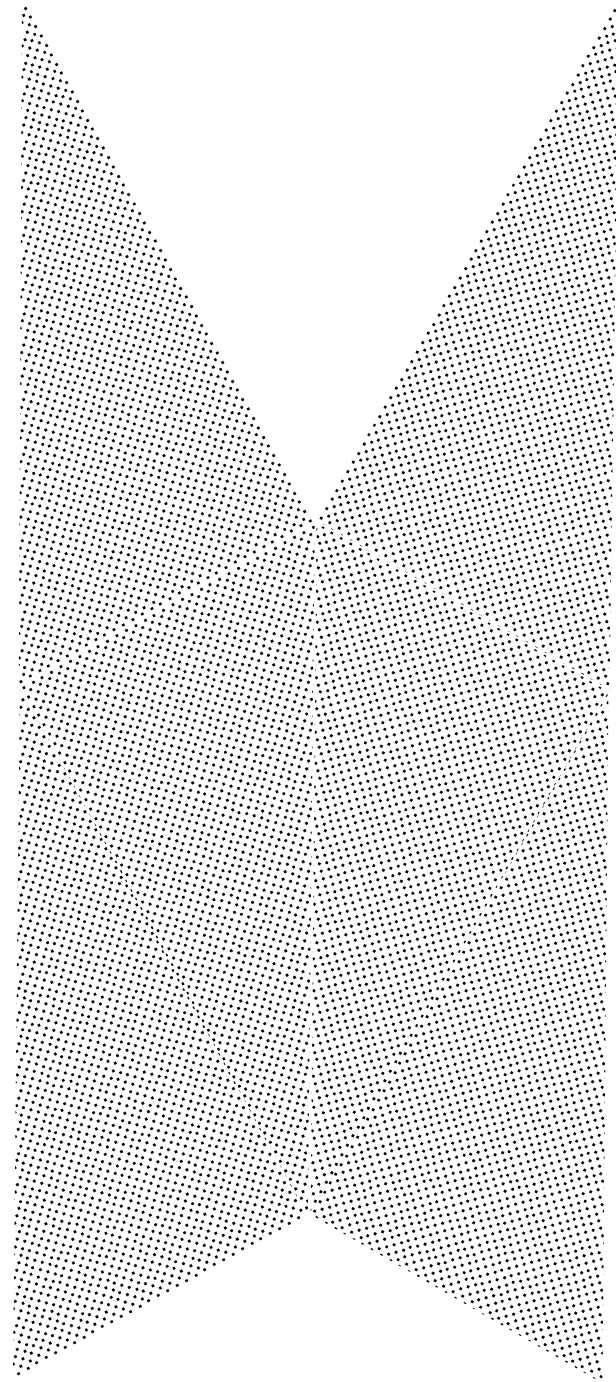

Une jolie maison

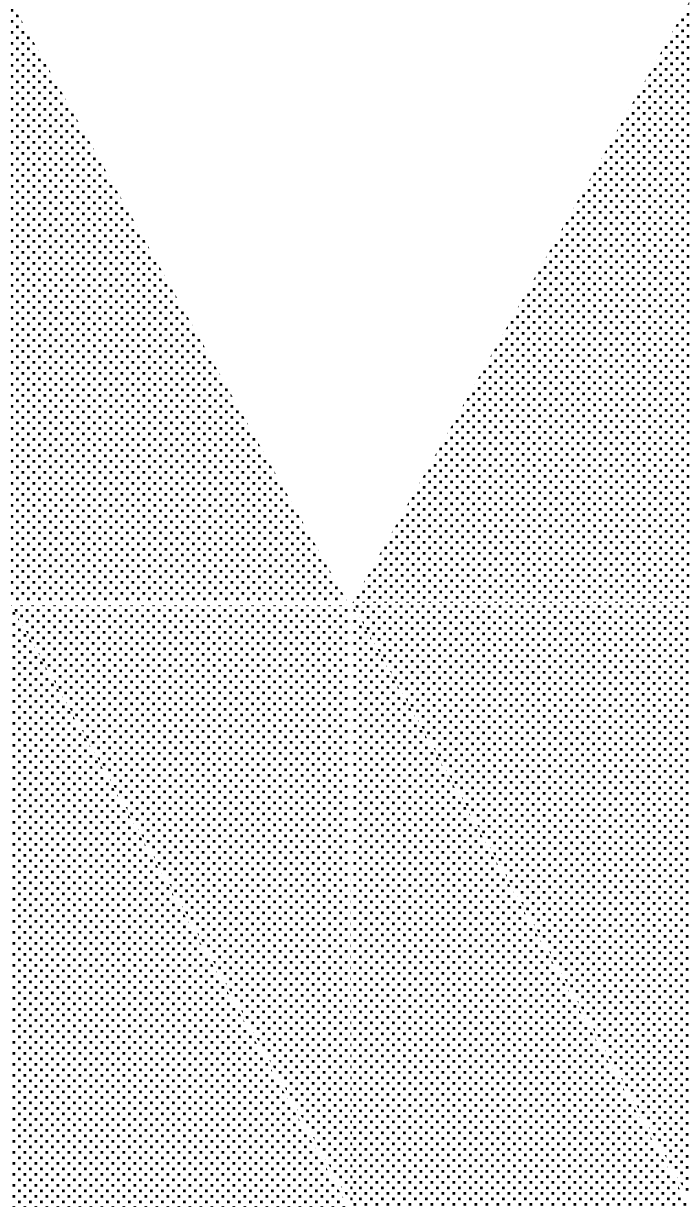

Une petite danseuse

Une hirondelle

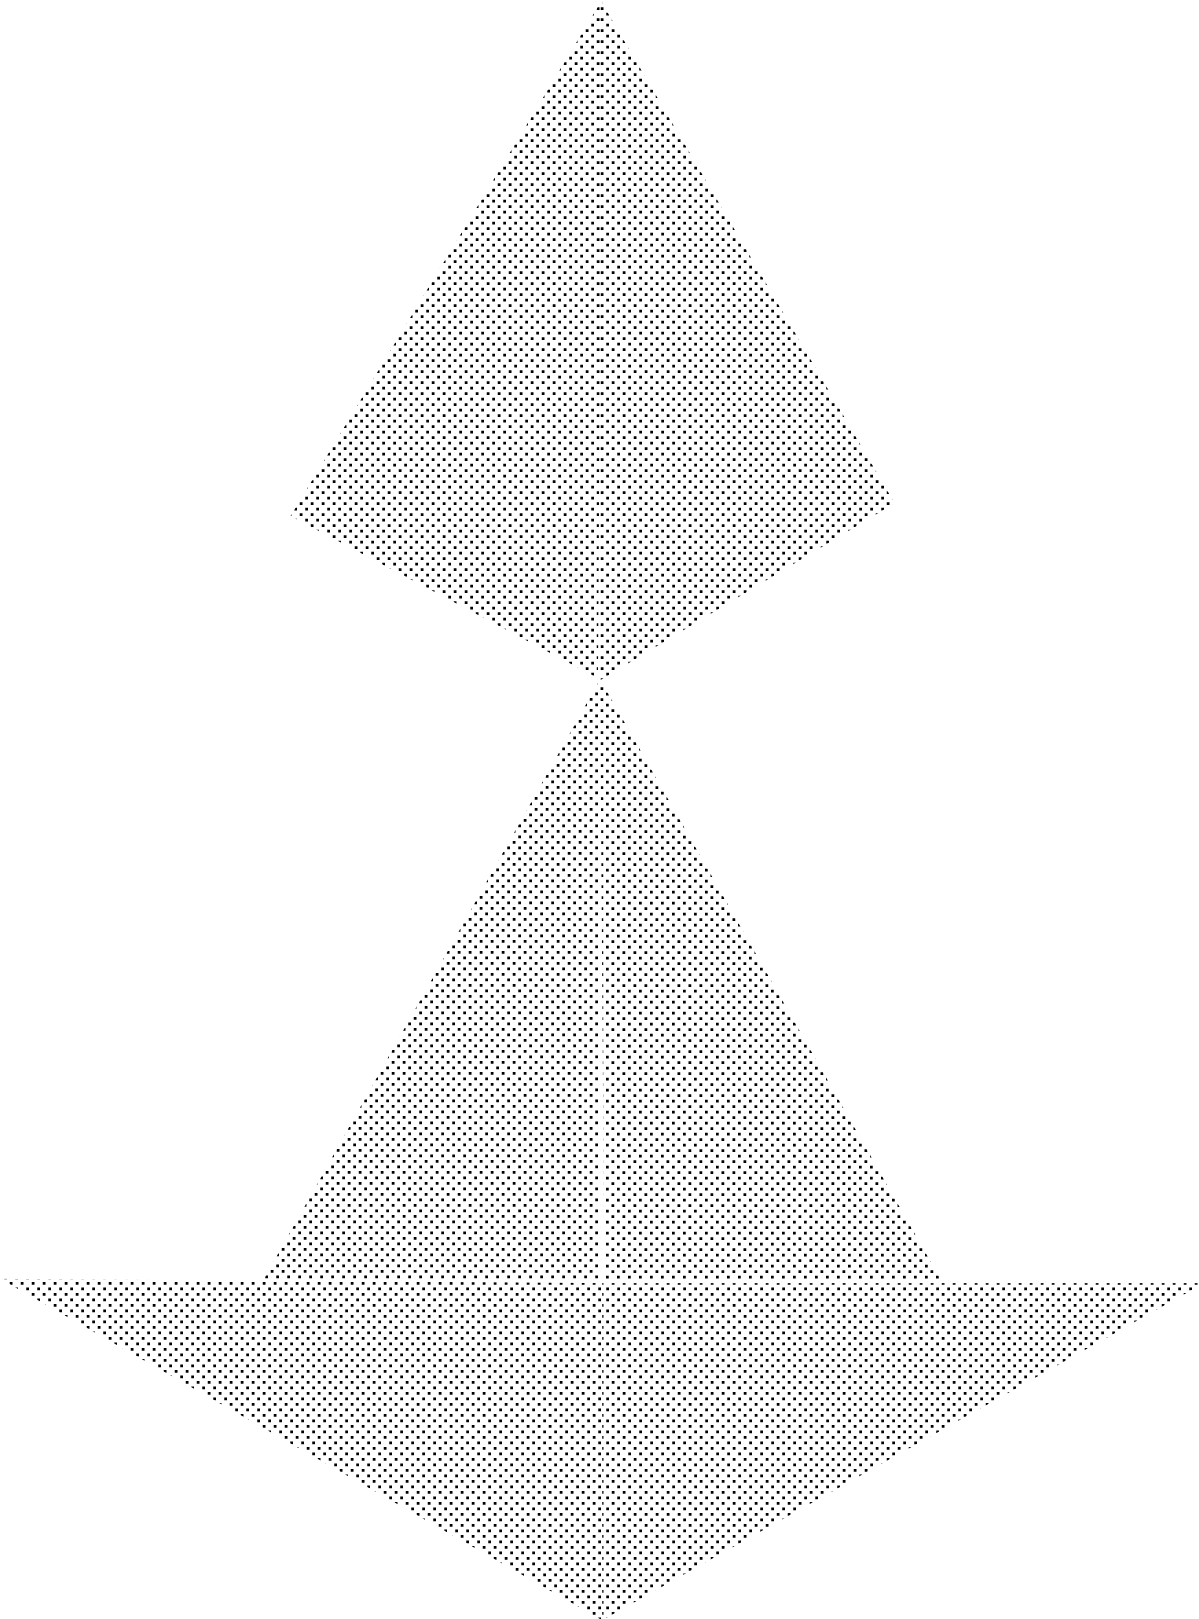

Une tête de chien

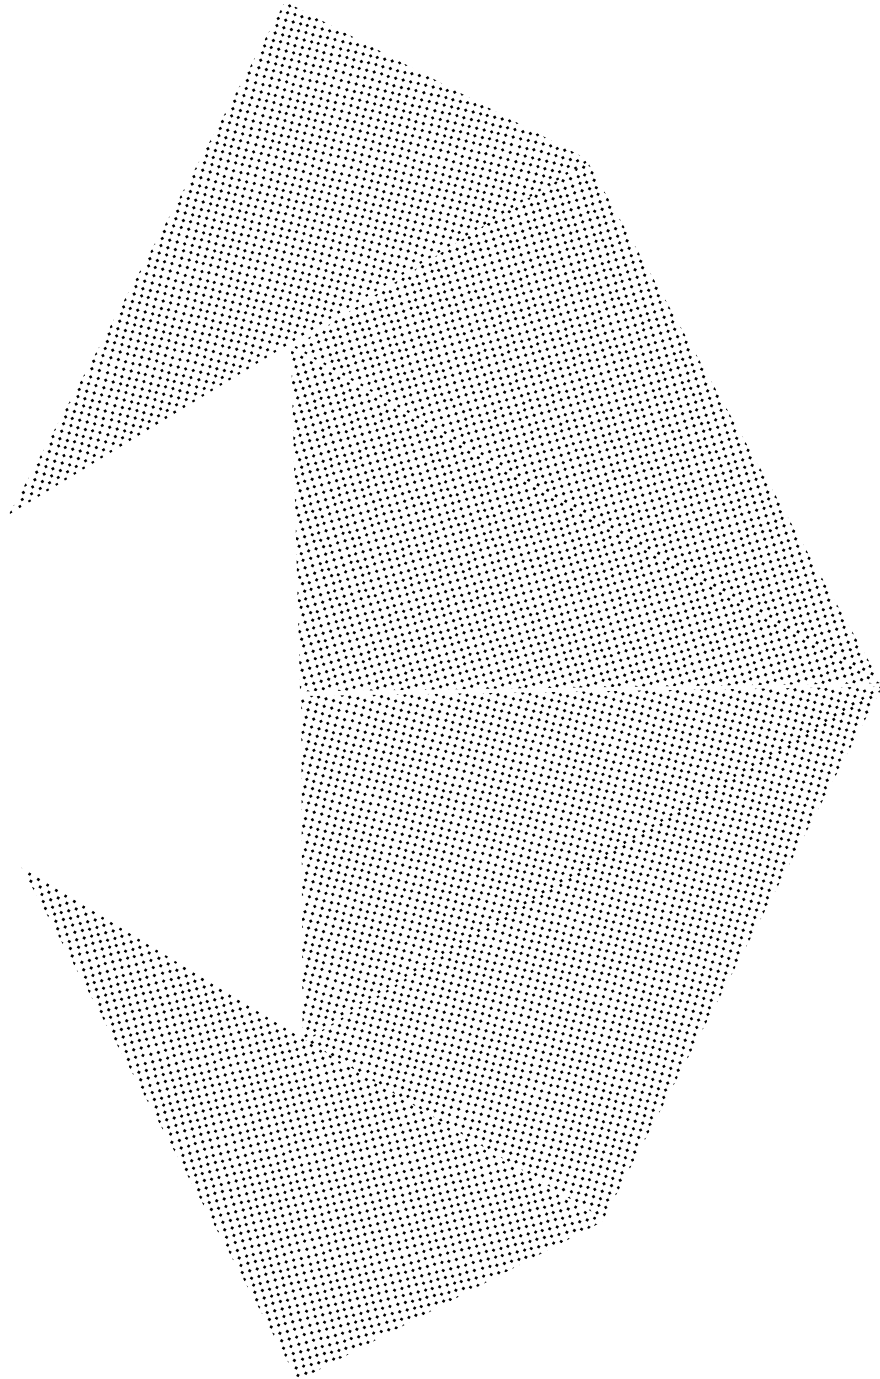

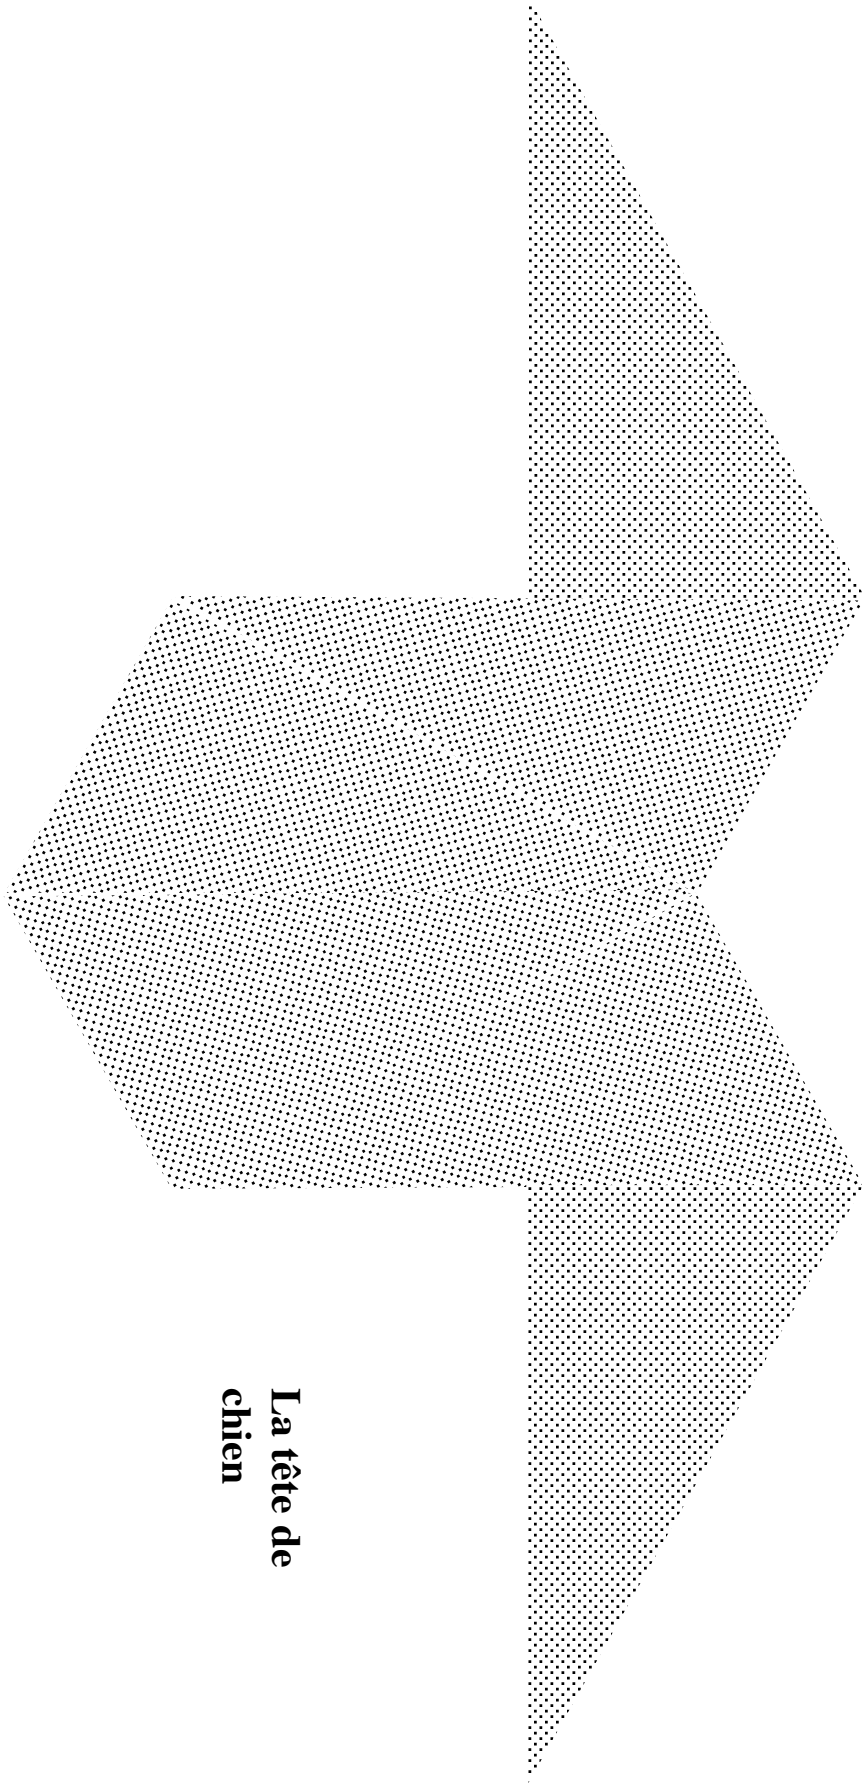

La tête de bouledogue

Un poisson

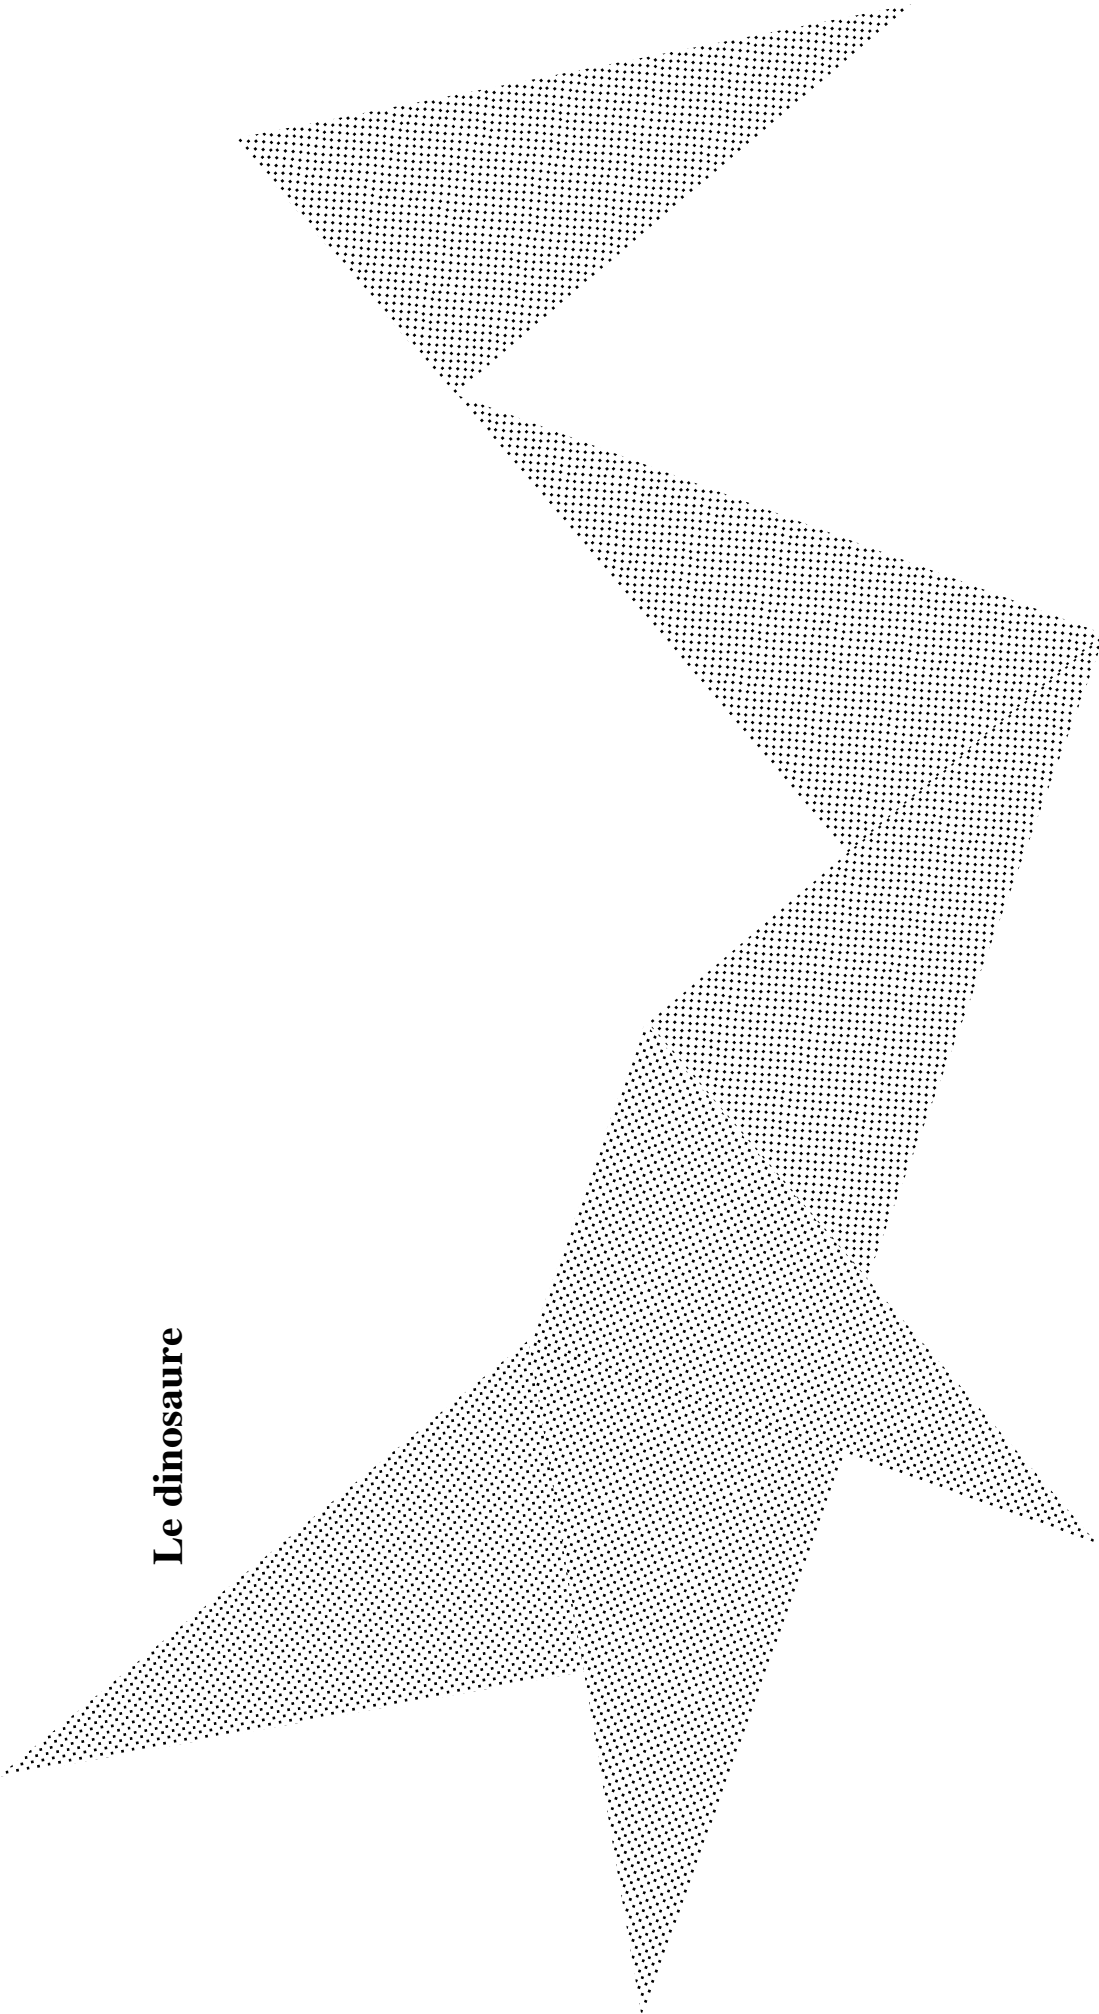

Le crabe ou le casque

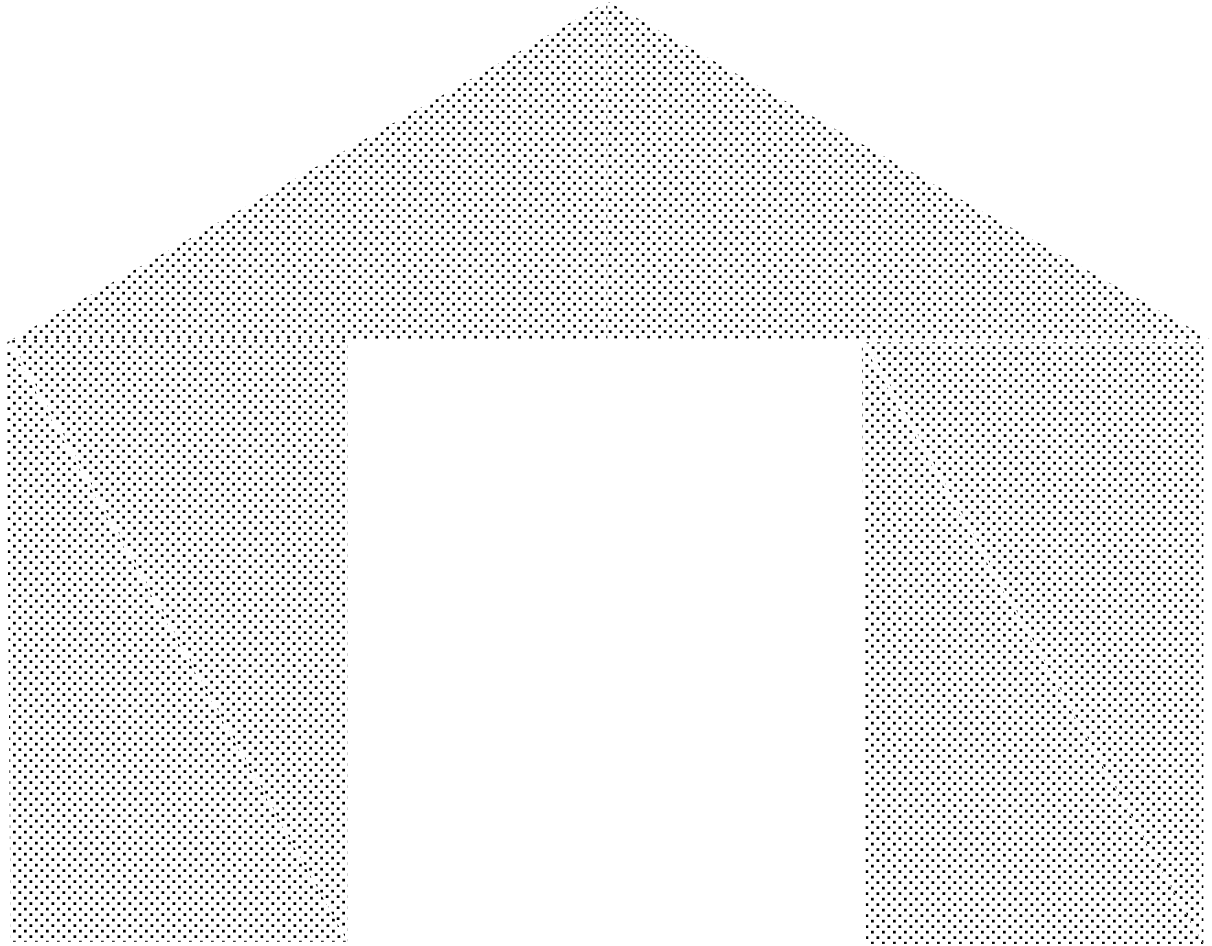

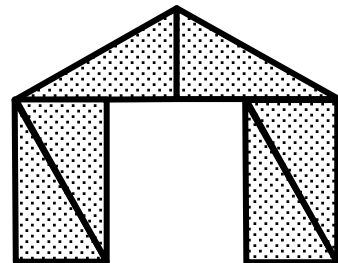

**La tête de
chien**

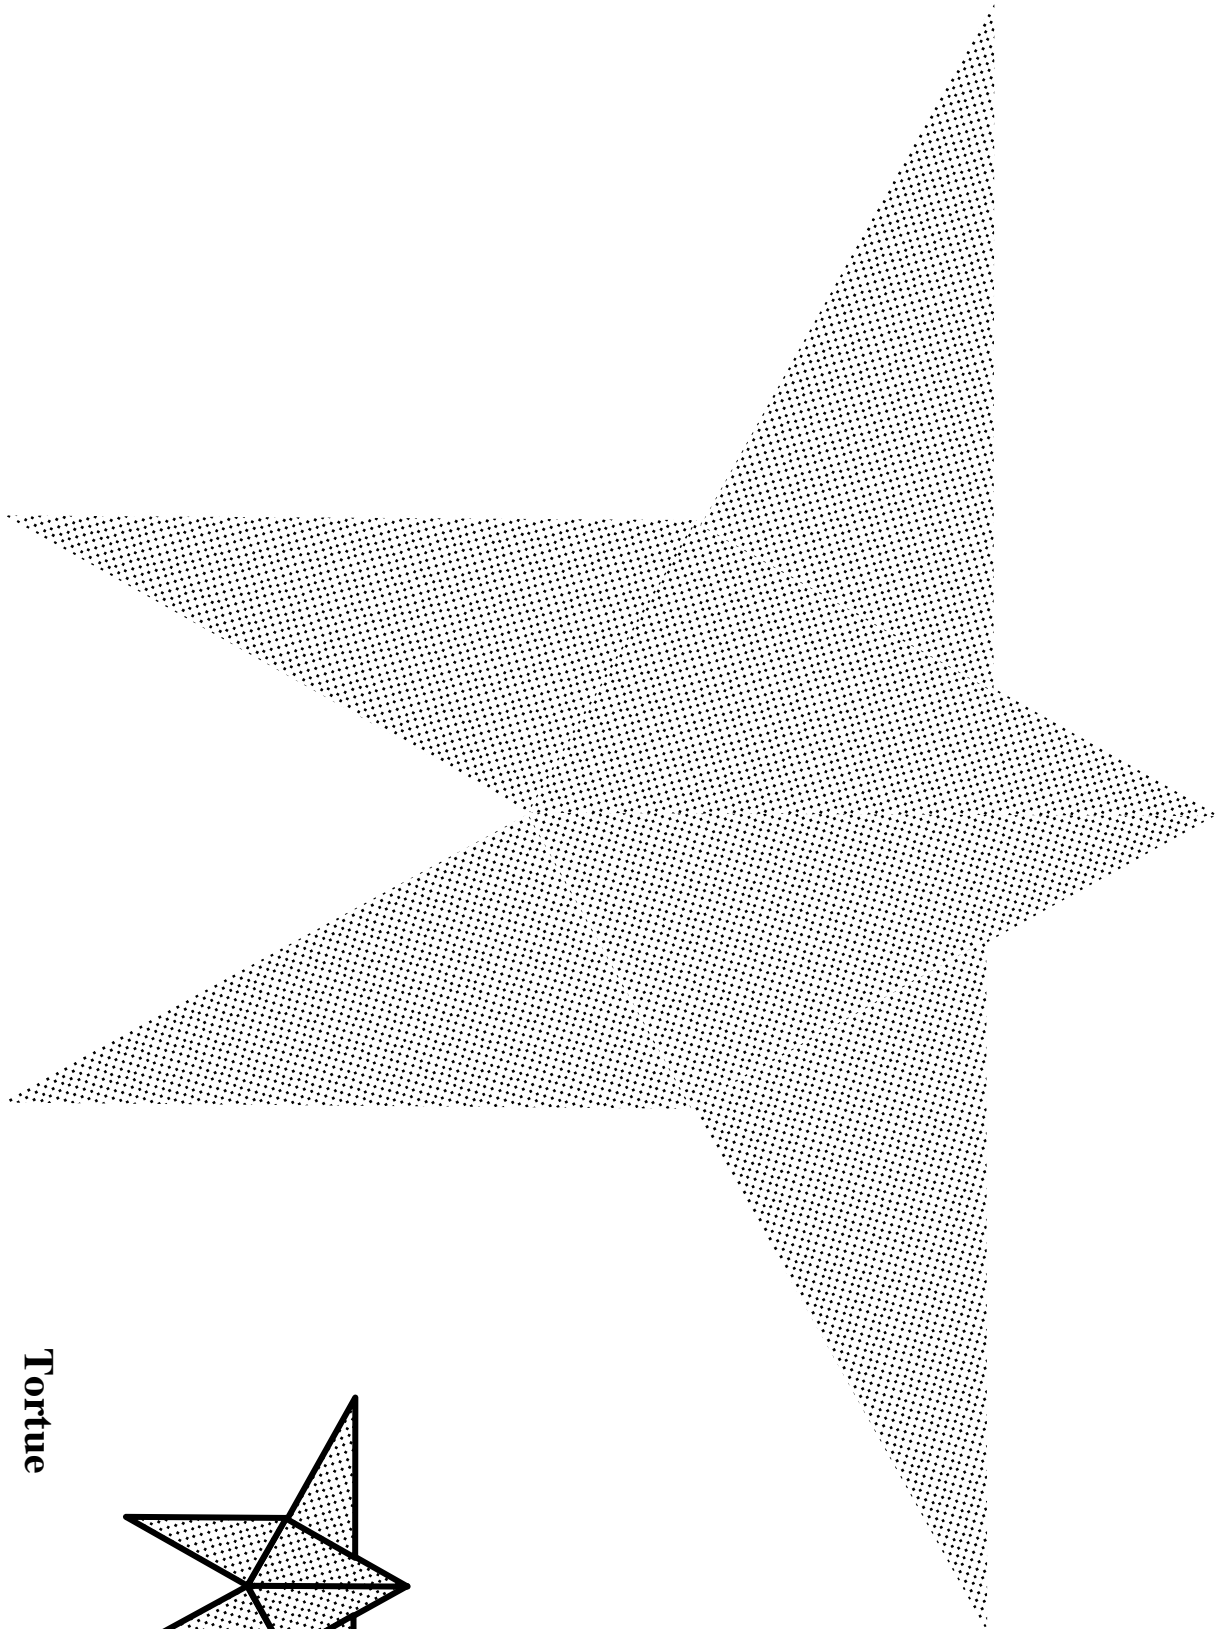

Le dinosaure
