

Labyrinthe

Entrée

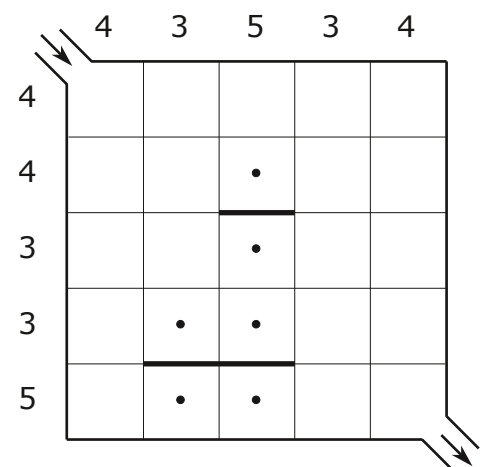

On fournit la grille ci-contre avec tous ses murs, ses nombres et on demande de placer les réglettes indiquées pour recréer le labyrinthe et tracer le chemin.

Pour cette première entrée dans Labyrinthe, tu vas **suivre** pas à pas **les instructions** données **ci-dessous**.

On va **placer des points dans les cases** dont on est sûr qu'elles sont **empruntées par le chemin** dans le labyrinthe :

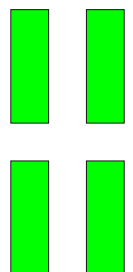

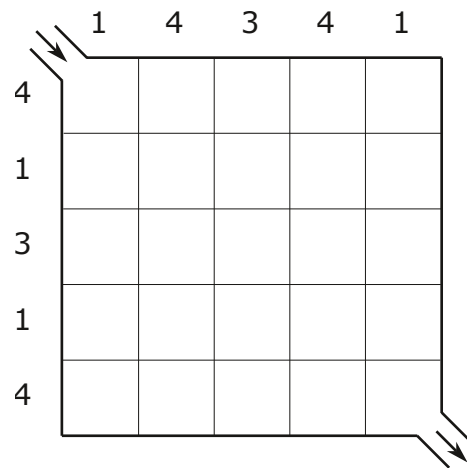

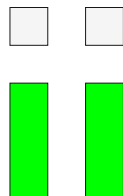

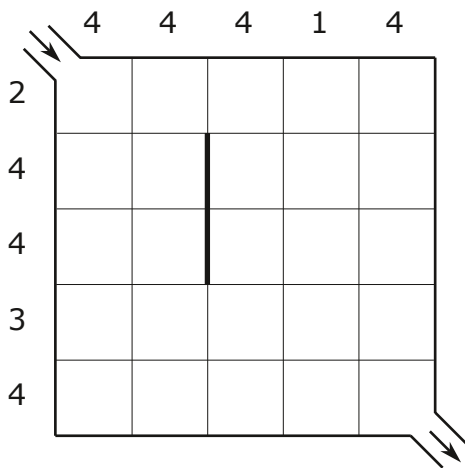

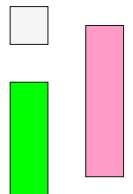

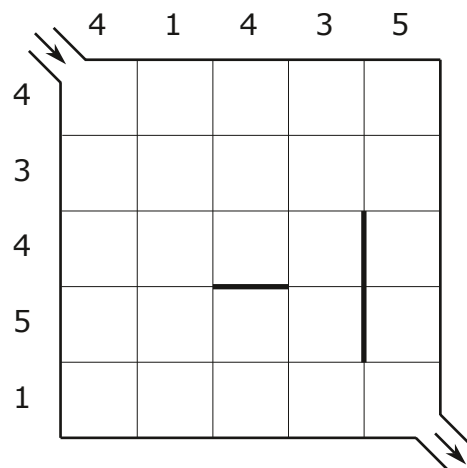

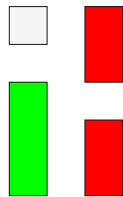

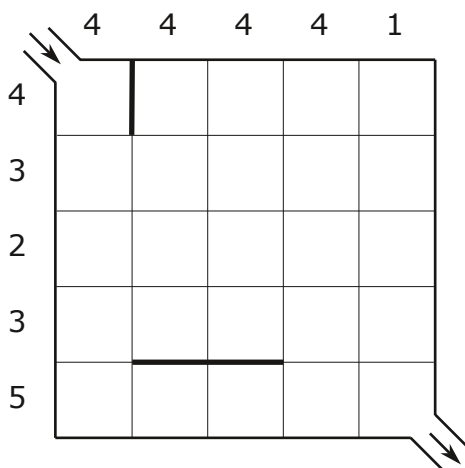

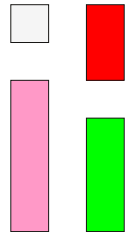

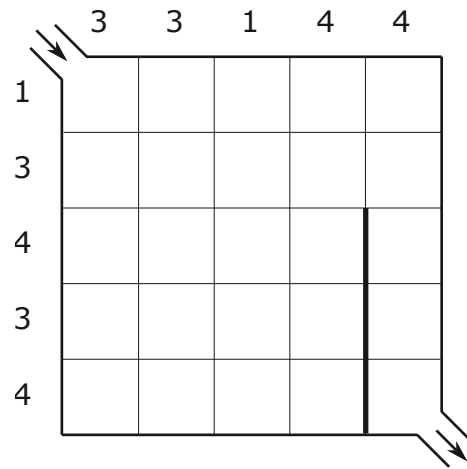

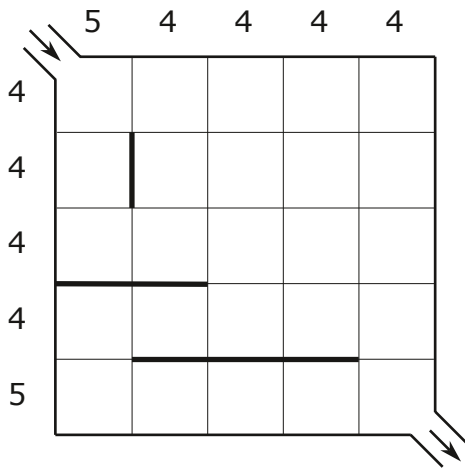

- on a déjà pointé les cases situées de part et d'autre des murs ;
- finis de pointer les cases de la colonne et de la ligne marquées 5 ;
- pour atteindre la case pointée en bas à gauche, il faudra passer par la case située juste au-dessus, pointe-là ;
- l'avant dernière ligne est servie (de ces trois points), place une réglette 2 au bout de celle-ci ;
- place les point manquants de la dernière colonne ;
- pour atteindre la case pointée en haut à droite, il faudra passer par la case située juste avant, pointe-là ;
- place le troisième point de la ligne du milieu ;
- celle-ci et la quatrième colonne sont servies, place les réglettes nécessaires,
- termine et trace le chemin.

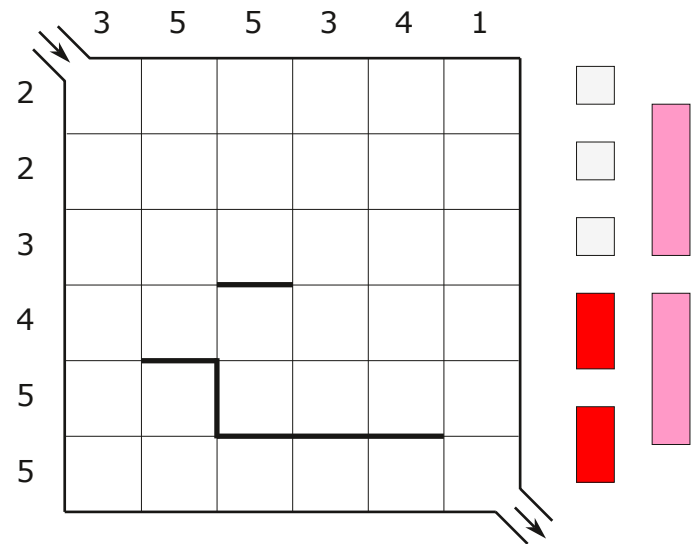

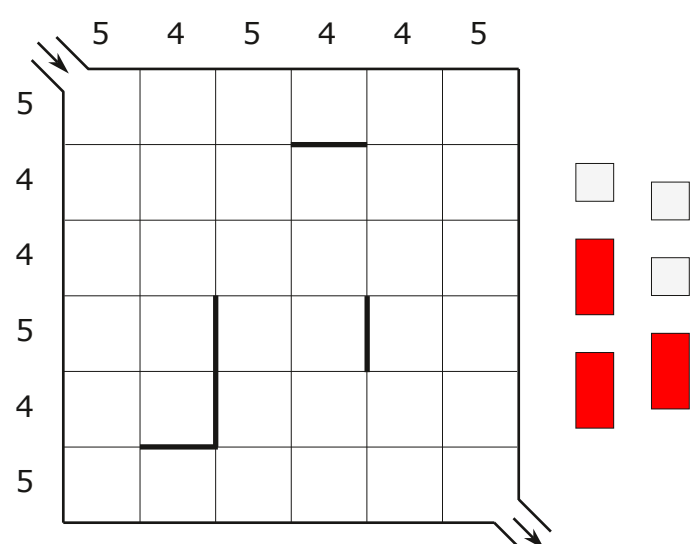

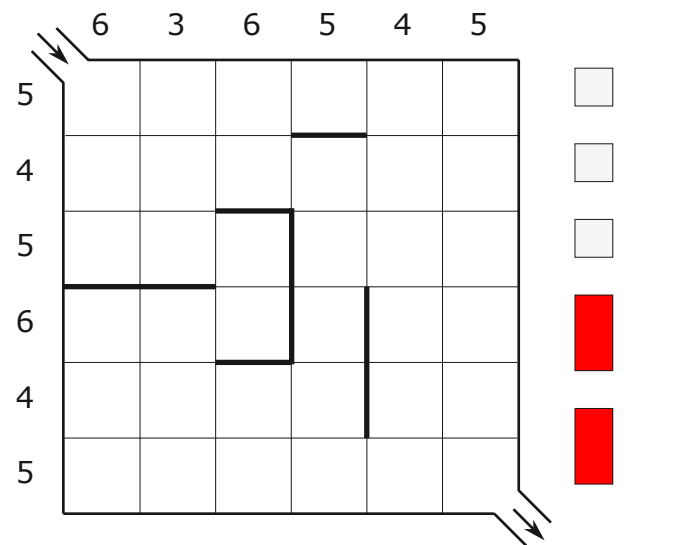

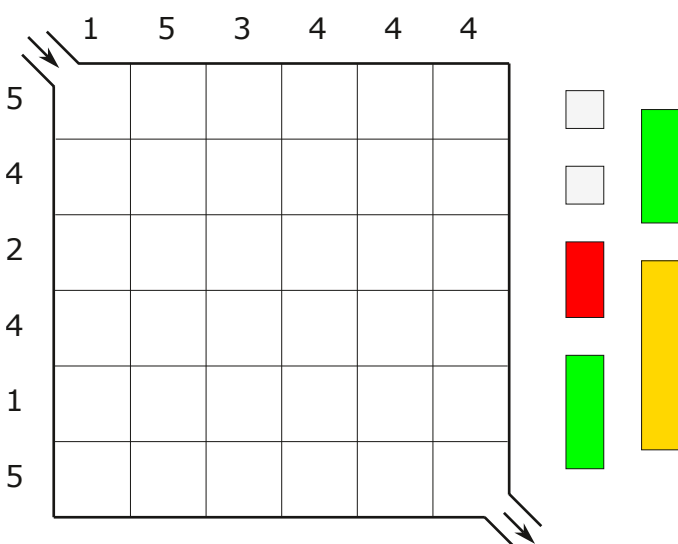

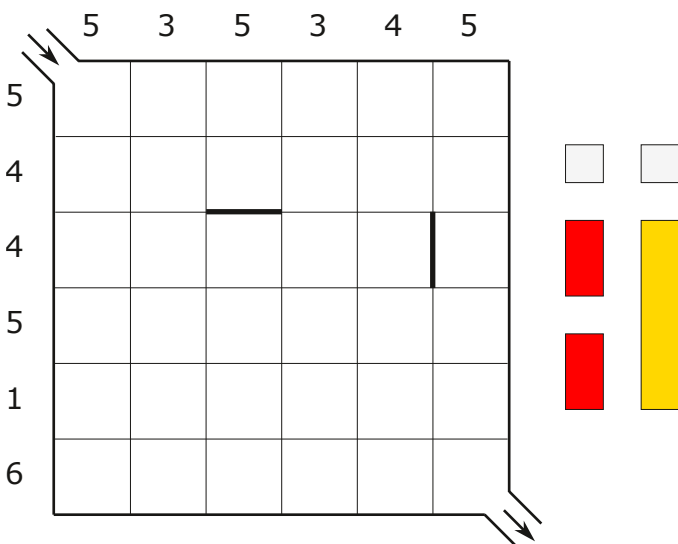

Labyrinthe

Grilles 5x5

Pour chaque grille, tous les murs sont placés
et les réglettes à poser sont indiquées.
Recrée le labyrinthe et trace le chemin.
